

# STARTUP SOLUTIONS FOR COVID-19 SUPPORTED BY COVID-19 TASKFORCE

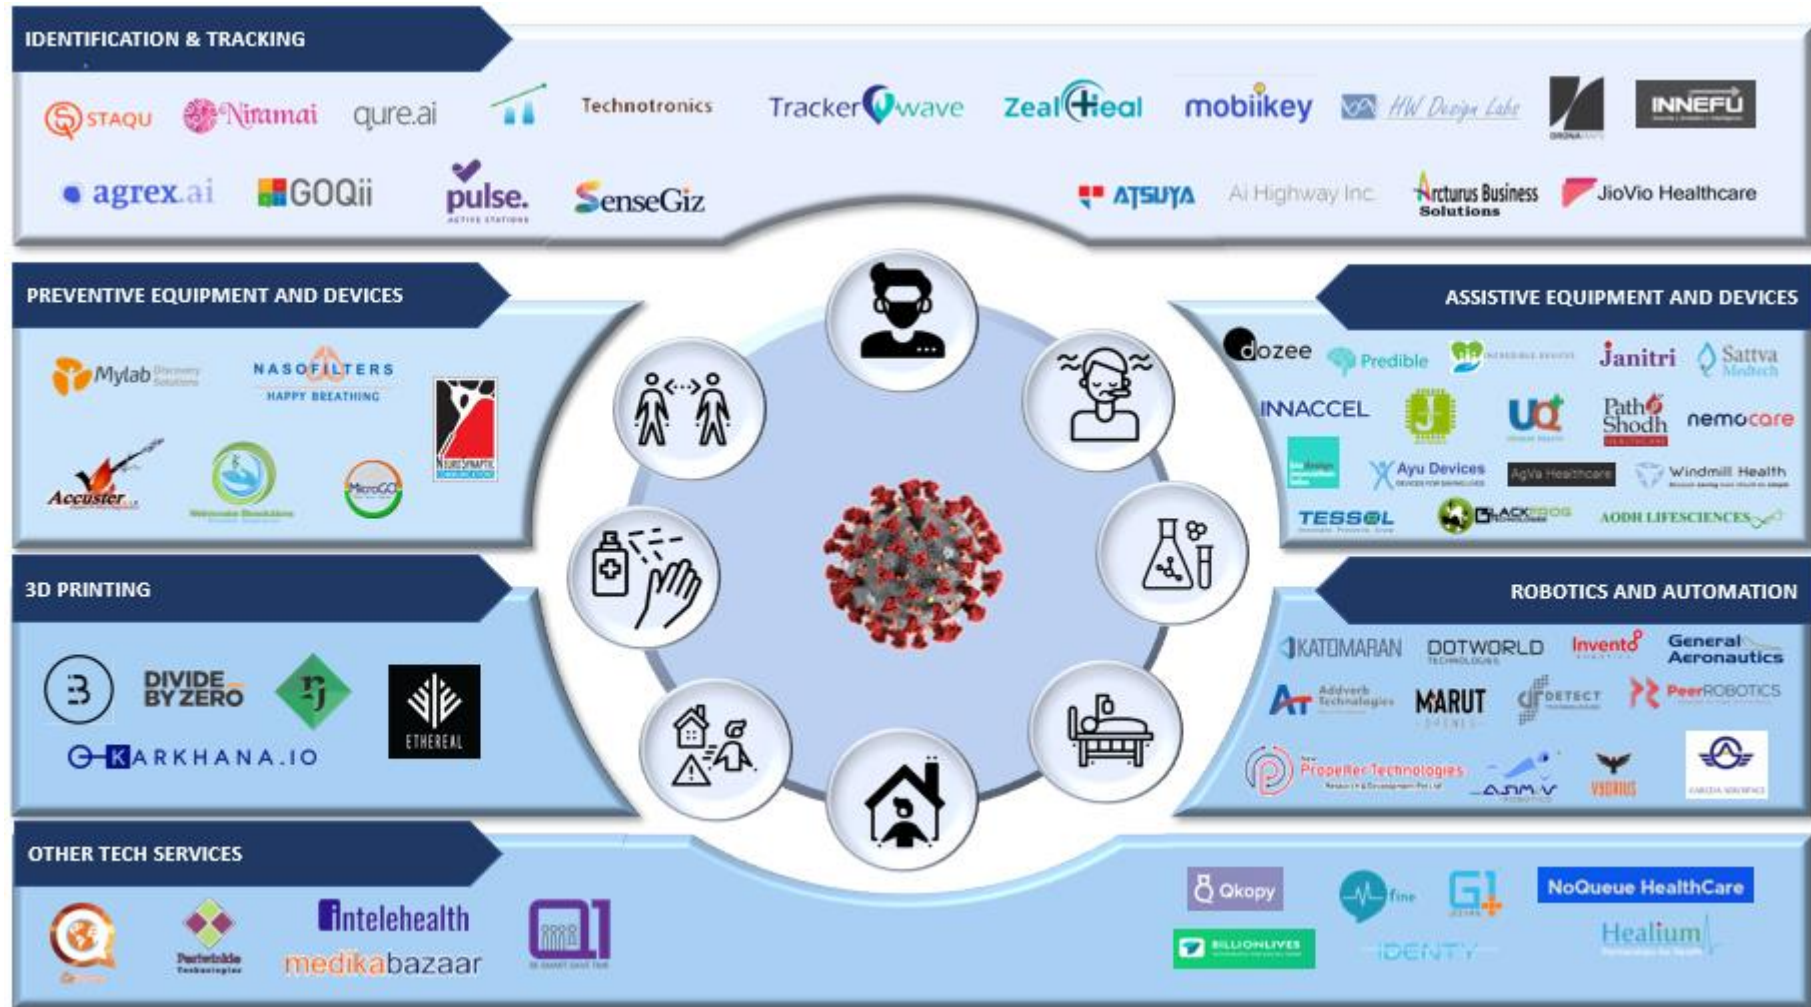

MAY 2020

## OVERVIEW OF THE CHALLENGE

- ❖ A challenge, ‘Submit Solutions to combat COVID-19’ was launched on the Startup India Portal. The challenge aims at scouting innovative technologies and solutions for precautionary as well as treatment-related interventions.
- ❖ The solutions were invited under 10 broad categories namely Personnel protective equipment, Testing Equipment, Critical- care equipment, Large area sanitization and sterilization, AI-based technology for contactless entry, Movement tracking, Geofencing, Crowd management, Fake news detection, and Logistics.
- ❖ The solutions received were evaluated by COVID-19 comprising of Biotechnology Industry Research Assistance Council, Department of Science & Technology, Department of Biotechnology, AGNli, Office of the Principal Scientific Adviser, and AIM- NITI.
- ❖ This listicle contains details of all the shortlisted solutions by startups for COVID-19 by the Taskforce.

## STARTUP LANDSCAPE

Note: The landscape does not represent the exhaustive supportive ecosystem for COVID-19 and have been prepared based on the research.

### BUBBLE BYTE INDIA

Details Of the Founders	Details Of the Product	Market Status	Support Needed
<b>Name:</b> Amankhan Khajakhan Pathan <b>Website:</b> www.bubblebyteindia.com <b>Location:</b> Maharashtra	<b>Product:</b> Dr. Sanitor <b>Target Audience:</b> Hotels, Government Offices, Police Stations, Hospitals, Banks, Shops, Malls, etc.	<b>Startup Stage:</b> Early Traction <b>Price:</b> INR 500 <b>Production:</b> 500 per day	<b>Deployment:</b> They need deployment support.
<div> <ul style="list-style-type: none"> <li>Hands touch many surfaces and can pick up viruses. The virus can survive for about 72 hours on different surfaces.</li> <li>Sanitizing every possible surface is one of the current devised ways in precautionary measures. What if we can do our daily chores without having to touch anything. The lesser you touch, the safer you are. Even while washing our hands we touch the surfaces of the cleaning agent or water tap, so there are chances of the virus being settled on the surfaces.</li> <li>Dr. Sanitor- A smart mechanical liquid disinfectant dispenser, which dispenses fluid without having to touch the bottle. It uses a pedal mechanism for its operation. Safer and cost-effective precautionary measures.</li> <li>Dr. Sanitor can be installed at public places with sanitizer bottles at toilets, washbasins, colleges, hospitals, etc. Every place where a hand wash is a must. There are two versions of the product portable and fixed place application.</li> </ul> </div> <div>  </div>			

## PERSONNEL PROTECTIVE EQUIPMENT

### INDIAN INSTITUTE OF TECHNOLOGY MADRAS

Details Of the Founders	Details Of the Product	Market Status	Support Needed
<b>Name:</b> Prof T Pradeep <b>Website:</b> www.dstuns.iitm.ac.in <b>Location:</b> Chennai	<b>Product:</b> Nasal Drop Technology for Deactivation of Covid-19  <b>Target Audience:</b> Central and State Governments	<b>Startup Stage:</b> Scaling <b>Price:</b> INR 10 <b>Production:</b> 10 MT per day	NA
<ul style="list-style-type: none"> <li>The proposal is for the application of their technology in nasal drop-based deactivation of the COVID-19 virus. They expect a significant decline in the virus infection, especially when the infection has affected the nose and throat. The formulation can also be applied for surface sanitization.</li> <li>They expect the product to be extremely effective for the prevention and treatment of nasal transmission virus infection initiates and progresses through the droplet route and their technology is extremely effective against high virus load in the water medium.</li> <li>This technology has been successfully tested against enteric viruses (such as Rotavirus, Poliovirus, Japanese Encephalitis), bacteria (such as E. Coli, Salmonella, S. Aureus).</li> </ul>

## PERSONNEL PROTECTIVE EQUIPMENT

### VIEBEL CONCEPTS PLC

Details Of the Founders	Details Of the Product	Market Status	Support Needed
<b>Name:</b> Mithun <b>Website:</b> <a href="http://www.viableconcepts.in">http://www.viableconcepts.in</a> <b>Location:</b> Mysuru	<b>Product:</b> Automated Integrated Hand Wash Station <b>Target Audience:</b> Hospitals and Health Care, Airports, Domestic Use, Schools and Educational Institutions, etc.	<b>Startup Stage:</b> Validation <b>Price:</b> INR 3,000 <b>Production:</b> 1,000 units	NA
<ul style="list-style-type: none"><li>Integrated Hand wash liquid and water dispensing station. Applicable at places of hand wash and washbasins: Sensor-based Tap and Electronic Box.</li><li>The device could be mounted on any existing washbasins or new washing stations can be manufactured. Operations are sensor-based.</li><li>This suffices hand washing for containment of COVID-19 virus and importantly avoids the spread of the virus through touching of the tap lever or knob by multiple users.</li><li>It's a non-contact Hand Washing Station with Water and Handwashing liquid dispersion at the same point at prescribed frequencies.</li></ul>			

## PERSONNEL PROTECTIVE EQUIPMENT

### PILTOVERTECH

Details Of the Founders	Details Of the Product	Market Status	Support Needed
<b>Name:</b> Manan Issar <b>Website:</b> <a href="https://idahand.in/">https://idahand.in/</a> <b>Location:</b> Jaipur	<b>Product:</b> Bi-Directional One-Way Valve, Venturi Splitter, Headbands for masks and Bolstered Face Shields  <b>Target Audience:</b> Hospitals, Govt. Offices, Police	<b>Startup Stage:</b> Validation  <b>Price:</b> Face Shield - 375, Valve - 350, Splitter - 350, Headband – 100  <b>Production:</b> 1,000 per day	NA
<ul style="list-style-type: none"> <li>Bi-Directional One-Way Valve – Unlike the reusable valves (used in Ambu bags - hand-held devices used hospitals run out of ventilators or during emergencies) their bi-directional one-way valves are modular.</li> <li>Venturi Splitter - Present splitters compromise with the air pressure as the air splits at the junction of the splitter.</li> <li>Headbands – Improved headbands designed for the front line make masks tolerable for longer periods. They have re-designed the headband to assume the form of a comb so that it does not slip down the back of the head.</li> <li>Bolstered Face Shield - Present designs leave the bottom end of the acrylic shield to wobble; they have re-designed the face shield to have additional support at the bottom.</li> </ul>

<b>Name:</b> Vansh Gupta <b>Website:</b> oxygarden.com <b>Location:</b> Haryana	<b>Product:</b> Forest <b>Target Audience:</b> Hospitals, Isolation Units, Primary Health Care centres, Nursing homes, Offices	<b>Startup Stage:</b> Early Traction <b>Price:</b> INR 55,000 <b>Production:</b> 25 units per day	<b>Funding:</b> It needs funding of INR 95 lakhs. <b>Deployment:</b> It needs support in the deployment of the product.

- The team of OxyGarden has developed FOREST- India's first Air Sanitizer which purifies and humidifies indoor air naturally. The patent-pending innovation does not only solve the problem of ever-increasing levels of indoor air pollution but also increase human longevity by purifying indoor air and pumping in fresh oxygen with natural humidification.
- They have developed a technology that induces controlled photosynthesis in plants with the help of automated airflows and artificial light sources.
- It controls the transpiration in plants that are grown in an aerated medium consisting of activated charcoal, which makes it lighter than soil. The polluted indoor air is absorbed through the plant roots, after which it passes through a carbon filter.

<b>Name:</b> Dr. Syriac Joseph <b>Website:</b> viroblitz.com <b>Location:</b> Kerala	<b>Product:</b> Viroblitz Air Steriliser  <b>Target Audience:</b> Hospitals and quarantine facility	<b>Startup Stage:</b> Early Traction <b>Price:</b> INR 1.5 lakhs for 400 sq. ft. <b>Production:</b> 500 units per day	<b>Logistics:</b> It needs assistance in the movement of supply chain

- "Viroblitz" is an Air Steriliser/Deodoriser where the company used Low Energy Cascade Oxidation (LECO) process to sterilize the air. This doesn't need chemicals or HEPA filters or UV for sterilizing the air.
- This technology oxidizes any organic molecule, it can not only sterilize but also deodorize the air. It removes the bad odour-causing of Volatile Organic Compounds (VOC). Therefore, "the dream of a germ-free and odour-free hospital/home environment can be made a reality by using this technology".
- LECO technology breaks the Carbon Hydrogen bond of all the microorganisms, the destructive power is irrespective of the type of microorganisms or viruses, therefore our technology should also remove the Coronavirus from the air which in turn reduces the infection rate substantially.

Details Of the Founders	Details Of the Product	Market Status	Support Needed
<b>Name:</b> Akshay Sood <b>Website:</b> <a href="https://sarjanindustries.com/">https://sarjanindustries.com/</a> <b>Location:</b> Gujrat	<b>Product:</b> Swachhta Picker <b>Target Audience:</b> Major buyers include Urban Local Bodies (Municipalities), Panchayati Raj Institutions /Rural development departments, etc	<b>Startup Stage:</b> Validation <b>Price:</b> INR 2,850 per piece <b>Production:</b> 150 per day	NA
<ul style="list-style-type: none"><li>Swachhta Picker is a manually operated handheld equipment that helps to pick up all kinds of solid and semi-solid waste from a distance without much need to bend or physically touch the waste. It, therefore, eliminates the need for direct contact with waste and hence minimizes many kinds of health and safety risks for the sanitation workers. In context to COVID-19, it has a significant role to protect the sanitation workers from the transmission of COVID-19 through contaminated waste.</li><li>The use of swachhta picker will add another barrier to such transmission by physical distancing of waste from sanitation workers and would protect them to get infected. Moreover, the equipment is not just for corona, it would be used for the long term to save the workers from a lot of other health and safety risks on account of their job.</li></ul>
