STARTUP INDIA
IN NUMBERS (JAN 2016–FEB 2020)

- 28,790 recognised startups
- 566 districts covered
- 3.3 Lac jobs reported by 26,952 startups
- Rs 3378 Crore have been invested in 320 startups through the Fund of Funds scheme
- 44% of the recognised startups have at least one women director
- 30 States and UTs have a dedicated startup policy
2465 startups received tax benefits (under the provisions of Sections 56(2) (viib) and 80-IAC)

21,490 orders received by startups with a value of over Rs 776 Crore through GeM portal

36 Regulatory Reforms undertaken [33 + 3 (proposed in Finance Bill)]

2.6 Lac users enrolled in Startup India L&D Programme
### Key Highlights

#### Enablement and Ease of Regulations
- **Exemption of Category I and II AIFs from Section 56(2)(viib)**
- **GeM Startup Runaway launched, a dedicated corner for startups to sell products**
- **Definition of eligible business as stated in Section 80-IAC aligned with startup definition**
- **Compliance relaxation to startups regarding acceptance of deposit from members signing of annual return number of Board meeting**
- **Section 54EE and 54GB for availing exemption from long term capital gain if investment is made in units of specified funds or eligible startup respectively**

#### LAUNCH OF STARTUP INDIA ACTION PLAN
- **Launch of Startup India online portal**
- **Launch of Startup India Global Venture Capital Summit in Goa. First ever event of its kind, the summit brought together over 250 participants from more than nine countries**
- **Definition of eligible business as stated in Section 80-IAC aligned with startup definition**
- **Compliance relaxation to startups regarding acceptance of deposit from members signing of annual return number of Board meeting**
- **Section 54EE and 54GB for availing exemption from long term capital gain if investment is made in units of specified funds or eligible startup respectively**

#### JOBS REPORTED
- **2020**: 30K+
- **2019**: 156K+
- **2018**: 95K+
- **2017**: 49K+
- **2016**: Avg 10 jobs reported per startup

#### STARTUPS RECOGNISED IN THE YEAR
- **2020**: 2171
- **2019**: 11754
- **2018**: 8918
- **2017**: 5444
- **2016**: 503

---

*(From January 2020 to February 2020)*

*10 for 1 startup (rest of the employee numbers are not reported)*

---

**EXEMPTION FROM TAX UNDER THE PROVISIONS OF SECTION 56(2)(viib)**
- **2019**: Exemption from tax under the provisions of section 56(2)(viib) to Startups for issue of shares above fair market value on the basis of a self-declaration.
- **2019**: Showcases Startup India tableau at Republic Day parade
- **2019**: Launch of States Ranking Framework 2019 - Gujarat rated as the "Best Performing State"
- **2019**: Second edition of Startup India Global Venture Capital Summit
- **2019**: Definition of eligible business as stated in Section 80-IAC aligned with startup definition

---

**LAUNCH OF STARTUP INDIA YATRA**
- **2020**: 23 States covered, impacting over 78,000 aspiring entrepreneurs
- **2019**: 156K+
- **2018**: 95K+
- **2017**: 49K+
- **2016**: 503

*10 for 1 startup (rest of the employee numbers are not reported)*

---

**LAUNCH OF NATIONAL STARTUP AWARDS**
- **2019**: Launch of National Startup Awards with the aim to recognize and reward outstanding startups and ecosystem enablers (incubators and accelerators). Incentives worth Rs. 5 lac to each winning startup across 38 categories and Rs. 15 lac to an incubator and an accelerator respectively.
- **2019**: Second edition of Startup India Global Venture Capital Summit
- **2019**: Definition of eligible business as stated in Section 80-IAC aligned with startup definition
- **2019**: Compliance relaxation to startups regarding acceptance of deposit from members signing of annual return number of Board meeting
- **2019**: Section 54EE and 54GB for availing exemption from long term capital gain if investment is made in units of specified funds or eligible startup respectively
The Finance Bill 2020 provides the amendment in section 80-IAC of income tax act whereby turnover criteria for eligible startups has been extended to hundred crore rupees with effect from April 01, 2021.

Deferring TDS or tax payment in respect of income pertaining to Employee Stock Option Plan (ESOP) of startups.

GSR 27(E) dated 19th Feb— tax exemption for startups on investments above face value under Section 56(2)(viib) based on self-declaration.

Relaxation of provisions under Sections 54GB and 79 for availing benefits to startups.

Benefit under Section 80-IAC to claim exemption for three years out of five years from incorporation increased to seven years from incorporation.

Startup definition notified by DPIIT, Inter- Ministerial Board constituted, and eligibility criteria defined to provide income tax related benefits.

Startup definition expanded through DPIIT notification.

On 15 August 2015, as part of Hon’ble Prime Minister Shri Narendra Modi’s Independence Day speech from the Red Fort, a new vision for the Indian economy was announced. A vision that aimed to tap the entrepreneurial potential of the people of India. A vision that enabled the talent and youth of India to dream of ideas, put them in action, and convert them into game changing ventures.

In five months, putting words into action, on 16 January 2016, the Government launched the ‘Startup India’ programme with a stated objective to build a strong ecosystem for nurturing innovation and startups in the country that would drive sustainable economic growth and generate large scale employment opportunities.

1. STARTUP INDIA: JOURNEY OF EVOLUTION

1.1 THE ACTION PLAN

In order to imbibe all these objectives under one umbrella policy framework for the entire nation, while addressing all the aspects of the startup ecosystem, a Startup India Action Plan was announced on 16th January 2016. It comprised of 19 action items spanning across three key areas of “simplification and handholding”, “funding support and incentives” to industry-academia partnerships and incubation.

Under the provisions of this plan, startups were entitled to a number of benefits, such as tax incentives including capital gains tax exemption, governments’ assistance in funding, prioritisation of startups in public procurement etc. The benefits above included a provision for startups to avail assistance of a self-certification compliance system with respect to labour and environmental laws and exemption from any inspections of the place of business. The action plan also envisaged a common platform for stakeholders to interact, facilitate for funding support, and establish partnerships with academia and private sector entities. Some other key benefits that the Action Plan included were entitlement to an 80% rebate in patent registration fees as well as a 50% rebate in trademark filing. Startups could also benefit from faster exit norms and free of cost assistance provided by patent and trademark facilitators in filing for Intellectual Property Rights (IPRs).

Photo: Launch of startup India Action Plan by Hon’ble Prime Minister on 16th January, 2016.

THE ACTION PLAN (CONT'D.)

1. Compliance regime based on self-certification
2. Startup India Hub
3. Rolling out of mobile app and portal
4. Legal support and fast-tracking patent examination at lower costs.
5. Relaxed norms of public procurement for startups
6. Faster exit for startups

**Simplification & Handholding**

**Industry-Academia Partnership & Incubation**
7. Organizing startup fests for showcasing innovation and providing a collaboration platform.
8. Launch of Atal Innovation Mission (AIM) with Self-Employment and Talent Utilization (SETU) programme
9. Harnessing private sector expertise for incubator setup
10. Building innovation centres at national institutes
11. Setting up of seven new research parks modelled on the research park setup at IIT Madras
12. Promoting startups in the biotechnology sector
13. Launching of innovation focused programmes for students
14. Annual incubator grand challenge

**Funding Support & Incentives**
15. Provision of funding support through a Fund of Funds corpus of Rs 10,000 crore
16. Credit guarantee fund for startups
17. Tax exemption on capital gains
18. Tax exemption to startups for three years
19. Tax exemption on investments above fair market value
With an aim to operationalise its action plan towards a ‘pro-entrepreneurship’ attitude, Startup India has adopted a three-pronged strategy:

- to facilitate a common platform to connect the entire ecosystem while reducing information asymmetry,
- to provide benefits and other necessary support, and
- to engage regional entrepreneurs in transforming their ideas into business ventures.

While the first two are aimed at providing a one-stop shop for startups, including availing financial incentives and other benefits, the third strategic initiative is to be achieved through outreach and awareness programmes by way of spreading the message beyond metros to tier 2 and 3 cities and engaging regional governments in overall transformation.

The Action Plan under the Startup India Initiative is primarily focused on addressing the most vital issues faced by entrepreneurs during various stages of their businesses and developing the Indian startup ecosystem into one of the biggest startup ecosystems globally. Since the launch of Startup India and subsequent implementation of various initiatives, the overall startup environment has seen substantial improvement. Moreover, the Ease of Doing Business index for India has made a significant leap from 130 in 2016 to 63 in 2020\(^2\), further encouraging the proliferation of startups in India.

### Key Updates on the Action Points:

<table>
<thead>
<tr>
<th>ACTION POINT 1</th>
<th>Compliance Regime Based on Self – Certification</th>
<th>OBJECTIVE</th>
<th>MINISTRY / DEPARTMENT RESPONSIBLE</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>To reduce the regulatory burden on startups thereby allowing them to focus on their core business and keep compliance cost low</td>
<td>Ministry of Labour and Employment (MoLE) Ministry of Environment, Forest and Climate Change (MoEFCC)</td>
</tr>
</tbody>
</table>

**ACTION POINT 6**  
Faster exit for startups  

**OBJECTIVE**  
To make it easier for startups to wind up operations  

**MINISTRY / DEPARTMENT RESPONSIBLE**  
Ministry of Corporate Affairs (MCA)

**OUTCOME**  
- The INSOLVENCY AND BANKRUPTCY CODE, 2016 (CODE) provides for insolvency resolution of corporate persons, partnership firms and individual in a time bound manner. The Code has improved business climate in the country by making it easier for enterprises to exit in case of difficulties.  
- SECTION 12 of the Code states that insolvency resolution process shall be completed within a period of 180 DAYS from the date of admission of application by the National Company Law Tribunal, which is the Adjudicating Authority. This may be extendable to another 90 days and shall be completed within a maximum period of 330 days including the one-time extension. Once an application for insolvency resolution is admitted, an Insolvency Professional takes over the management of the corporate debtor who takes custody and control of the assets of the firm and conducts its business where feasible. If insolvency resolution fails or there is no feasibility of business, the corporate debtor would be liquidated.  
- Besides the above, fast track corporate insolvency resolution process is provided under SECTIONS 55 TO 58 of the Code, providing for a total period of 90 days for insolvency resolution from the date of admission of application. This may be extendable to another 45 DAYS  
- Further, SECTION 59 provides adequate mechanism for voluntary liquidation of corporate persons.

**ACTION POINT 7**  
Providing Funding Support through a Fund of Funds with a corpus of Rs 10,000 crore  

**OBJECTIVE**  
To provide funding support for development and growth of innovation driven enterprises  

**MINISTRY / DEPARTMENT RESPONSIBLE**  
Small Industries Development Bank of India (SIDBI)

**OUTCOME**  
- As of March 31, 2020, Fund of Funds has made a commitment of RS. 3798.20 CRORE to 53 Alternative Investment Funds (AIFs). AIFs are formed as investment vehicle to collect and disburse funds in.  
- Investments of RS 3582 CRORE has been made in 338 STARTUPS.
**ACTION POINT 8**
Credit guarantee fund for startups

**OBJECTIVE**
To catalyse entrepreneurship by providing credit to innovators across all sections of society

**MINISTRY / DEPARTMENT RESPONSIBLE**
Department for Promotion of Industry and Internal Trade (DPIIT) and Small Industries Development Bank of India (SIDBI)

**OUTCOME**
- To ease access to early stage debt, to finance the capital requirements for startups, a credit guarantee scheme with a corpus of **RS 500 CRORE** per year for four years is proposed to be launched.
- A Credit Guarantee fund for startups has been proposed with a corpus of **RS 2000 CRORE**. The proposal targets coverage of guarantee for approximately **RS 10,000 CRORE** for 2000 units with an average loan size of Rs 5 crore to eligible borrower.

**ACTION POINT 9**
Tax exemption on capital gains

**OBJECTIVE**
To promote investments into startups by mobilising the capital gains arising from sale of capital assets

**MINISTRY / DEPARTMENT RESPONSIBLE**
Department of Revenue, Ministry of Finance

**OUTCOME**
- Introduction of **SECTION 54EE** to the **INCOME TAX ACT, 1961** in May 2016: Exemption from tax on long-term capital gain if such long-term capital gain is invested in a fund notified by Central Government. The maximum amount that can be invested is **RS. 50 LAC**.
- Amendment in **Section 54GB** of Income-tax Act in February 2016: Exemption from tax on capital gains arising out of sale of residential house or a residential plot of land if the amount of net consideration is invested in prescribed stake of equity shares of eligible Startup for utilizing the same for purchase of specified asset.

**ACTION POINT 10**
Tax exemption to startups for three years

**OBJECTIVE**
To promote the growth of startups and address working capital requirements

**MINISTRY / DEPARTMENT RESPONSIBLE**
Department for Promotion of Industry and Internal Trade (DPIIT)

**OUTCOME**
- The profits and gains derived by an eligible startup from eligible business may get 100% exemption for three consecutive assessment years out of seven years from the year of its incorporation. In order to further rationalise the provisions relating to startups, it is proposed under Finance Bill 2020 to amend **SECTION 80-IAC** of the Act so as to provide that the deduction under the said section shall be available to an eligible startup for a period of three consecutive assessment years out of 10 beginning from the year in which it is incorporated. This amendment will take effect from **1ST APRIL 2021**. To avail these benefits, a Startup must get a Certificate of Eligibility from the **INTER-MINISTERIAL BOARD (IMB)**.
- **266 STARTUPS** have been granted income tax exemptions till February 2020.

**ACTION POINT 11**
Tax exemption on investments above fair market value

**OBJECTIVE**
To encourage seed-capital investment in startups

**MINISTRY / DEPARTMENT RESPONSIBLE**
Department of Revenue, Ministry of Finance

**OUTCOME**
- Recognized startups are exempt from tax under **SECTION 56(2) (VIII)** of the Income Tax Act when such a startup receives any consideration for issue of shares which exceeds the Fair Market Value of such shares. The startup has to file a duly signed declaration in Form 2 to DPIIT (as per DPIIT notification G.S.R. 127 of 19th February 2019) to claim the exemption from the provisions of Section 56(2) (viiib) of the Income Tax Act.
- With regard to declarations received from entities, furnished in Form 2, intimation regarding receipt of declaration in Form 2 has been mailed in the cases of **2,199 ENTITIES**.
**ACTION POINT 13**
Launch of Atal Innovation Mission (AIM) with Self-Employment and Talent Utilisation (SETU) Programmes

**OBJECTIVE**
- To serve as a platform for promotion of world-class Innovation Hubs, Grand Challenges, startup businesses and other self-employment activities, particularly in technology driven areas

**MINISTRY / DEPARTMENT RESPONSIBLE**
NITI Aayog

**OUTCOME**
- **14,916 SCHOOLS** across the country have been selected for Atal Tinkering Laboratories, out of which 4,875 have received **RS. 12 LAC grant** each and are operational.

---

**ACTION POINT 12**
Organising startup fests for showcasing innovation and providing a collaboration platform

**OBJECTIVE**
- To galvanize the startup ecosystem and to provide national and international visibility to the startup ecosystem in India

**MINISTRY / DEPARTMENT RESPONSIBLE**
Department for Promotion of Industry and Internal Trade (DPIIT)

**OUTCOME**
- **Startup India Global Venture Capital Summit 2018 and 2019** witnessed participation of over **700 DELEGATES** from the investor community, across **10+ COUNTRIES**, in panel discussions, innovation showcase, closed door roundtables and investor interactions.
- **NINE GRAND CHALLENGES** have been organised by DPIIT in collaboration with other ministries and public organisations.

---

**ACTION POINT 14**
Harnessing private sector expertise for incubator setup

**OBJECTIVE**
- To ensure professional management of Government sponsored / funded incubators, Government will create a policy and framework for setting-up of incubators across the country through public private partnership

**MINISTRY / DEPARTMENT RESPONSIBLE**
NITI Aayog

**OUTCOME**
- New Incubation Centers: Atal Innovation Mission (AIM) has selected **88 INCUBATORS** across the country to provide financial support through grants in aid and has already disbursed grants worth **RS 201 CRORE TO 68 INCUBATORS** till date.
- Within the past three years, and as self-reported by the incubators,
  - **1,250+ STARTUPS** have been incubated in the Atal Incubation Centers/ Established Incubation Centers out of which ~500 are women led startups.
  - **144+ MSME’s** have been supported to build business sustainability and **Rs. 62+ CRORE** of seed funding have been leveraged from other sources based on the **RS 6+ CRORE GRANTED BY AIM**.
  - **13,800+ JOBS** have been created by the startups incubated at the Atal Incubation Centers/ Established Incubation Centers.
- **1,000+ MENTORS** have been onboarded by the Atal Incubation Centers/ Established Incubation Centers to guide the startups.
- **2,200+ EVENTS** and **700+ TRAININGS** have been reported by this network of Atal Incubation Centers/ Established Incubation Centers.
- Institution of Innovation Awards: Innovation Awards (Grant-in-aid) through the challenge route by the name of Atal New India Challenges (ANIC) was launched with the aim of supporting Startups/MSMEs/innovators to create products/solutions based on advanced technologies in areas of national importance and social relevance through a grant-based mechanism, with two-fold vision of supporting (a) Productization and (b) Commercialization of innovative technologies selected for 24 challenge areas under five different Ministries of Government of India.

OUTCOME
- **158 PROJECTS** have been approved under Uchchatar Avishkar Yojana (UAY)-I and Uchchatar Avishkar Yojana (UAY) – II
- **NATIONAL INITIATIVE FOR DEVELOPING AND HARNESSING INNOVATIONS (NIDHI)** aims to nurture start-ups through scouting, supporting and scaling of innovations
- The INSPIRE ‘INNOVATION IN SCIENCE PURSUIT FOR INSPIRED RESEARCH’ (INSPIRE) Awards – MANAK (Million Minds Augmenting National Aspirations and Knowledge), being executed by Department of Science and Technology (DST) with National Innovation Foundation – India (NIF), an autonomous body of DST, aims to motivate students in the age group of 10–15 years and studying in classes six to ten. The objective of the scheme is to target one million original ideas/innovations rooted in science and societal applications to foster a culture of creativity and innovative thinking among school children. About 50,000 top ideas have been shortlisted from about **3.2 LAC** nominations received from Schools for an INSPIRE award of Rs 10,000/- each, for preparation of a project/model and participation in District Level Exhibition & Project Competition (DLEPC).

ACTION POINT 18
Launching of innovation focussed programmes for students

OBJECTIVE
To foster a culture of innovation in the field of science and technology amongst students

MINISTRY / DEPARTMENT RESPONSIBLE
Ministry of Human Resource Development (MHRD) and Department of Science & Technology

OUTCOME
- **158 PROJECTS** have been approved under Uchchatar Avishkar Yojana (UAY)-I and Uchchatar Avishkar Yojana (UAY) – II
- **NATIONAL INITIATIVE FOR DEVELOPING AND HARNESSING INNOVATIONS (NIDHI)** aims to nurture start-ups through scouting, supporting and scaling of innovations
- The INSPIRE ‘INNOVATION IN SCIENCE PURSUIT FOR INSPIRED RESEARCH’ (INSPIRE) Awards – MANAK (Million Minds Augmenting National Aspirations and Knowledge), being executed by Department of Science and Technology (DST) with National Innovation Foundation – India (NIF), an autonomous body of DST, aims to motivate students in the age group of 10–15 years and studying in classes six to ten. The objective of the scheme is to target one million original ideas/innovations rooted in science and societal applications to foster a culture of creativity and innovative thinking among school children. About 50,000 top ideas have been shortlisted from about **3.2 LAC** nominations received from Schools for an INSPIRE award of Rs 10,000/- each, for preparation of a project/model and participation in District Level Exhibition & Project Competition (DLEPC).
Ideation Stage

- 50% y-o-y increase in patent applications (as self-reported by startups) over a period of 2 years (2017 to 2019)

Validation Stage

- 111% increase in IPR registrations (as self-reported by startups) over a period of 2 years (2017 to 2019)

Early Traction

- 44% recognised startup have one women director (as self-reported)

Scaling Stage

- In 4 years

Boosting ecosystem development:

- 28,970 startups have been recognised
- 3.3 Lac jobs reported by 26,952 startups

Supporting businesses throughout the lifecycle:

- Creating around 12 jobs per startup

RECOGNITION FACTS

- At least 1 recognised startup in each states and UT.
- 566 districts covered
- MAXIMUM 72 HOURS taken in certificate
- Startup Recognitions reported across 48 INDUSTRIAL SECTORS
One of the aims of Startup India has been to provide handholding support to startup ventures and streamline their incentive disbursals under Department for Promotion of Industry and Internal Trade (DPIIT). The idea is not only to provide an enabling environment for startups to flourish but also to lure investments. The initiative commenced in April 2016, with the operationalisation of the Startup India Hub, the online portal providing multiple offerings under Startup India and connecting aspirants to other vital ecosystem builders. Also, the scope of definition was broadened to include scalable business models with high potential of employment generation or wealth creation. Additionally, the requirement of a letter of recommendation from an incubator/industry association was also removed to avail benefits offered under the initiative.

The launch of the recognition initiative under Startup India provided stakeholders a 100% online platform. On this platform, all the applications are received, reviewed and the certificates of recognition are issued to eligible and complete applications within 48-72 working hours. The DPIIT recognition process has provided a boost to the overall ecosystem and enabled startups to access various support initiatives under Startup India.

Presently, there is at least one recognised startup in each of the States and UTs. The startups recognised upto February 2020 span across 48 industrial sectors with maximum number of startups registered under IT services and Healthcare & Lifesciences followed by the education sector.

**TOP 10 HIGHLIGHTED SECTORS IN TERMS OF NUMBER OF STARTUPS ARE:**

- IT SERVICES
- HEALTHCARE & LIFE SCIENCES
- EDUCATION
- PROFESSIONAL & COMMERCIAL SERVICES
- FOOD & BEVERAGES
- AGRICULTURE
- FINANCE TECHNOLOGY
- GREEN TECHNOLOGY
- TECHNOLOGY HARDWARE
- RENEWABLE ENERGY

**AT LEAST 1 RECOGNISED STARTUP in each State and UT. 566 DISTRICTS covered**

**NINE STATES & UTs (Delhi, Gujarat, Haryana, Karnataka, Kerala, Maharashtra, Tamil Nadu, Telangana & Uttar Pradesh) have over 1000 RECOGNISED startups each**

**MAHARASHTRA**

HAS THE HIGHEST NUMBER OF STARTUPS WITH FEMALE DIRECTORS AS WELL AS THE HIGHEST NUMBER OF STARTUPS OVERALL.
KEY EMERGING SECTORS

P2P COMMUNICATION
AI
CONSTRUCTION
FINANCE TECHNOLOGY

PETS & ANIMALS
CHEMICALS
EVENTS
ARCHITECTURE/ INTERIOR DESIGN

HARDWARE
GREEN TECHNOLOGY
AGRICULTURE
FOOD & BEVERAGES
PROFESSIONAL & COMMERCIAL SERVICES

STATES WITH MOST STARTUPS WITH FEMALE DIRECTORS

DELHI
KARNATAKA
MAHARASHTRA
UTTAR PRADESH

INDUSTRIES WITH THE HIGHEST NUMBER OF STARTUPS WITH FEMALE DIRECTORS ARE³

IT SERVICES
HEALTHCARE & LIFE SCIENCE
EDUCATION
PROFESSIONAL & COMMERCIAL SERVICES

³ The information is provided by startups through self-declarations
DISTRICT-WISE SPREAD OF RECOGNISED STARTUPS
The definition of a startup has been relaxed by DPIIT since the launch of the Action Plan, to enable more entities to apply for recognition. With the relaxations, there has been a jump in the application of entities to be recognised as startups.

**STARTUP DEFINITION**

An entity shall be considered a startup:

a) Up to **FIVE YEARS** from the date of its incorporation/registration,

b) If its turnover for any of the financial years has not exceeded **RS 25 CRORE**, and

c) It is working **TOWARDS INNOVATION, DEVELOPMENT, DEPLOYMENT OR COMMERCIALISATION OF NEW PRODUCTS, PROCESSES OR SERVICES DRIVEN BY TECHNOLOGY OR INTELLECTUAL PROPERTY**;

Provided that any such entity formed by splitting up or reconstruction of a business already in existence shall not be considered a 'startup';

1. **Documents Required**

   a) a recommendation (with regard to innovative nature of business), in a format specified by Department of Industrial Policy and Promotion, from any Incubator established in a postgraduate college in India; or

   b) a letter of support by any incubator which is funded (in relation to the project) from Government of India or any State Government as part of any specified scheme to promote innovation; or

   c) a recommendation (with regard to innovative nature of business), in a format specified by Department of Industrial Policy and Promotion, from any Incubator recognized by Government of India; or

   d) a letter of funding of not less than 20 per cent in equity by any Incubation Fund/Angel Fund/Private Equity Fund/Accelerator/Angel Network duly registered with Securities and Exchange Board of India that endorses innovative nature of the business. Department of Industrial Policy and Promotion may include any such fund in a negative list for such reasons as it may deem fit; or

   e) a letter of funding by Government of India or any State Government as part of any specified scheme to promote innovation; or

   f) a patent filed and published in the Journal by the Indian Patent Office in areas affiliated with the nature of business being promoted.

**STARTUP DEFINITION EXPANDED**

An entity shall be considered as a Startup:

1. **Upto a period of ten years from the date of incorporation/registration,** if it is incorporated as a private limited company (as defined in the Companies Act, 2013) or registered as a partnership firm (registered under section 59 of the Partnership Act, 1932) or a limited liability partnership (under the Limited Liability Partnership Act, 2008) in India.

2. **Turnover of the entity for any of the financial years since incorporation/registration has not exceeded one hundred crore rupees.**

3. **Entity is working towards innovation, development or improvement of products or processes or services,** or if it is a scalable business model with a high potential of employment generation or wealth creation.

Provided that an entity formed by splitting up or reconstruction of a business already in existence shall not be considered a 'Startup'.

**G.S.R 180 (E) DATED 17th February 2016 notified by DPIIT³**

**G.S.R 501 (E) DATED 23rd May 2017 notified by DPIIT²**

**G.S.R 127 (E) DATED 19th February 2019 notified by DPIIT⁵**

⁵ https://www.startupindia.gov.in/content/dam/invest-india/Templates/public/notification/Overall/198117.pdf
Entity creates an account on Startup India website.

The entity then applies for DPIIT Recognition.

Application gets reviewed and the Certificate of Recognition is issued to completed applications within 48-72 working hours.

**STEP BY STEP PROCESS FOR STARTUP RECOGNITION**

**DETAILS REQUIRED FOR FILLING UP THE RECOGNITION FORM**

- Incorporation details such as Incorporation Number, Date of Registration, Permanent Account Number (PAN), Name of the registered entity (Private Limited company/ Limited Liability Partnership / Registered Partnership Firm)

- Proof of concept such as pitch deck/ website link/ video (in case of a validation/ early traction/ scaling stage startup)

- Brief about the entity with details on the problem solved, solution provided, uniqueness, and revenue model adopted

- Incorporation/ Registration Certificate

- Director’s details

- Other information about the entity – Sector, Patent Details, Stage, Number of Employees etc.
**NO REQUIREMENT OF:**

- Letter of Recommendation
- Sanction Letter

**ADDITIONAL/OPTIONAL INFORMATION**

- **Startups at ideation stage can simply apply without any proof of concept and obtain recognition**
- **Startups can also update their proof of funding, awards and recognitions received**
- **Startups can strengthen their application by providing patent, trademark, copyright, and/or plant variety details**
- **Startups can also add a video of their product/services**
2.2 RECOGNITION: AN ADDED ADVANTAGE

As a part of The Startup India initiative, DPIIT-recognised startups are eligible to avail a host of additional benefits such as self-certification, access to public procurement relaxations, tax incentives, etc. Over the span of the last four years, Startup India has initiated regulatory and policy reforms for startups and related ecosystem stakeholders, to make the environment more favourable and attractive to operate in. Startup India has enabled 36 regulatory reforms [33 + 3(proposed in Finance Bill)] with the help of various Ministries that are tailored for entrepreneurs and startup ecosystem stakeholders, to ease regulatory burden and incentivise capital inflow into startups.

2.2.1 SELF-CERTIFICATION UNDER ENVIRONMENTAL AND LABOR LAWS

An important area that startups consider risky is the statutory aspect of running a business, as failure to meet all legal requirements can land a startup in trouble. Established startups are not just focused on managing their growth but also spend a considerable amount of time on keeping pace with the rapidly changing regulatory landscape of the Indian law. Startup India has laid down several measures to ease compliance with most complex laws for startups, to ensure the associated risks are mitigated.

Under the initiative, startups have been allowed to self-certify under various labour and environmental compliances for fixed durations of time. Startup India has collaborated with various Ministries to provide such ease of functioning for startups. Various States in India have also been encouraged to incorporate such best practices, thus benefiting the national startup ecosystem. It is pertinent to note that the responsibility of compliance is not a one-time affair, but in fact a continuous process.

The Ministry of Environment, Forest & Climate Change (MoEF&CC) has published a list of 36 ‘white’ categories based on their pollution load. Industrial sectors that have pollution index of below 20 are recognised as “white” wherein startups under the category will be able to self-certify compliance with respect to three Environment Laws for a period of three years, viz. –

- The Water (Prevention & Control of Pollution) Act, 1974
- The Water (Prevention & Control of Pollution) Cess (Amendment) Act, 2003
- The Air (Prevention & Control of Pollution) Act, 1981

Ministry of Labour and Employment (MoLE)⁶ has issued guidelines to State Governments whereby recognised startups will be allowed to self-certify compliance with respect to six labour laws, viz:

- The Building and Other Constructions Workers’ (Regulation of Employment & Conditions of Service) Act, 1996
- The Inter-State Migrant Workmen (Regulation of Employment & Conditions of Service) Act, 1979
- The Payment of Gratuity Act, 1972
- The Contract Labour (Regulation and Abolition) Act, 1970
- The Employees’ Provident Funds and Miscellaneous Provisions Act, 1952
- The Employees’ State Insurance Act, 1948

Additionally, as of February 2020, 15 States had complied with the self-certification advisory for five years, and 12 States had complied with the advisory for three years, cumulatively benefitting 169 startups which have availed the benefits of self-certification and hence, have saved valuable time during their initial stages. Further, recognising the need for expedited compliances, MoLE has provisioned startups to avail special benefits through the Shram Suvidha Portal, such as, increasing Self-Certification duration from three years to five years for compliances related to provident funds (EPFO), employees’ state insurances (ESIC), & labour laws (CLC(C)), with exemption from physical verifications. These measures have brought in further ease of doing business under a regime that strives to be more supportive to the startup environment.

Shram Suvidha Portal, launched in 2014 under Ministry of Labour and Employment (MoLE), facilitates businessmen to seek all types of registrations and submit returns that are required under labour laws through a single online window.

Until February 2020, nine States (Haryana, Madhya Pradesh, Maharashtra, Rajasthan, Gujarat, Uttar Pradesh, Punjab, Uttarakhand, and Delhi) had integrated their regional portals with the Shram Suvidha Portal.

“Self-certification (an initiative by Startup India) is a very good opportunity for startup companies to run business very smoothly, as it covers all labour & other mandatory compliances”
- Knotenbook Networks Private Limited - A DPIIT recognized Startup

“All the information is regularly updated and easily available online. No physical documents are required. It’s a great advantage. Many licenses and permissions like labour license can be easily applied for and approved online.”
- Jarsh Innovations Private Limited - A DPIIT recognized Startup
Procurement” or “public procurement” (or ‘Purchase’, or ‘Government Procurement/ Purchase’ in certain contacts) means acquisition by way of purchase, lease, license or otherwise, either using public funds or any other source of funds (e.g. grant, loans, gifts, private investment etc.) of goods, works or services or any combination thereof, including award of Public Private Partnership projects, by a Procuring Entity, whether directly or through an agency with which a contract for procurement services is entered into, but does not include any acquisition of goods, works or services without consideration, and the term “procure” or “procured” shall be construed accordingly; With an aim to involve startups in public procurement, Startup India has spearheaded several key amendments to enhance the growth of startups by opening doors to new avenues for startups in public tenders. Currently, all Startup India recognised entities are exempted from submission of Earnest Money Deposits (EMD)/ Bid Security under public procurement, thereby addressing a substantial barrier of capital locking while participation in tendering processes. Relaxation in conditions of prior turnover and prior experience for DPIIT recognised startups in public procurement subject to meeting of quality and technical specifications have further enabled competition with established firms.

**RELAXED ELIGIBILITY CRITERIA:**

- Rule 170 (i) of GFR 2017: exemption from submission of EMD/Bid Security in public procurement tenders.
- Also, Rule 173 (i) has been incorporated in GFR, 2017: relaxation of conditions of prior turnover and prior experience for DPIIT recognised startups in all government tender requests.

**PREFERENCE:** Recognised startups are preferred bidders during public procurement process while participating in tenders on Central Portal for Public Procurement (CPPP)

**GEM STARTUP RUNWAY:** A dedicated corner for startups to sell products & services

**FLEXIBILITY:** No more restrictive categories on GeM, meaning that new & innovative products can be published on the platform.

Central Public Procurement Portal (CPPP), a Government of India online portal that has been setup with the primary objective of providing single point access to the information on procurement made across various Ministries/ Departments and all the organisations under them. Startups may now register on eprocure.gov.in and etenders.gov.in to become Preferred Bidders in Public Orders and avail aforementioned exemptions. A free and fair environment provides the startups with a level playing ground amongst other competitors.

To further facilitate startups in outreach and market linkages, GeM Startup Runway was launched in February 2019 - the runway is a dedicated corner for startups to sell products & certain enhanced services.

PROMOTING STARTUPS THROUGH GEM

Over 20 GeM (Government e-Marketplace) workshops were conducted until December 2019 to onboard startups on the platform. More than 15 workshops have been conducted in Delhi-Gurgaon-Noida region to sensitise startups and incubators about the benefits of public procurement. GeM workshops were also conducted at Kerala Startup Mission, IIT Madras, NIPERG, and for Government department officials to sensitise them about the GeM Startup Runway.

Picture: Workshop conducted at IIT Madras by DPIIT for startups over benefits of GeM portal.

Until February 2020, **21,490 ORDERS** from public entities have been placed to startups with a cumulative value of over **RS 776 CRORE**. This scale of startup procurement has provided a vital thrust to the economic performance of the startup ecosystem through public departments and associated agencies.

INTER-MINISTERIAL ROUNDTABLES

The Inter-Ministerial Roundtables were conducted in December 2019 under the Startup India initiative to receive suggestions from State departments and offer solutions to prevailing pressing issues such as restrictive conditions for startups in public tendering, lack of provisions for adopting innovative technologies, mechanism to address payment delays, need for sensitisation etc. Chaired by the Secretary, DPIIT, the roundtable witnessed participation from various Ministries, Departments, and startups. Best practices across states and other suggestions were discussed to make public procurement more open to smaller innovative businesses. Lack of grievance redressal mechanism for startups was noted as one of the prime concerns for which DPIIT is currently in the process of introducing an online grievance redressal mechanism that will strive to address complaints in a time-bound manner and provide necessary assurance to entrepreneurs in engaging with the initiatives.
Startup India programmes helped me a lot…it changed my vision and attitude

“After finishing many years of research and innovations in the water sector, I planned to work as a social entrepreneur for eradicating clean water challenges in rural and sub-urban India. As a start-up company, I was initially worried to conduct business in India. However, Startup India programme of Government of India helped me a lot and changed my vision and attitude with positivity. Today, I am elated and proud to say that H2O Mantra is grown up, providing employment to many people and contributing steadily to the growth of India by doing business through GeM, a startup friendly interface which provides us easy and open access to customers across the country. Through the guidance of Startup India Programme, H2O Mantra was registered on GeM portal in July 2018 and it has successfully completed sale of Rs 1.33 Crore till date through the GeM portal.”

- Dr Shailesh Kharkwal, Founder & CEO, H2O Mantra Pvt Ltd

“We have built an innovative emission control technology to reduce emission from diesel generators (DG sets) used extensively for power back up across India. Being an innovation driven hardware startup, we did face some unique challenges and the Startup India initiative by The Department for Promotion of Industry and Internal Trade has been very helpful to overcome some of these challenges. We are a recognised startup by the Government of India and received financial assistance on the patent we filed for our unique technology. We were also given relief from various labour laws during the early stage to ensure that we spend most of our time and energy on bringing our innovation to life.

Under the Startup India initiative, we got the opportunity to meet various officials from multiple Ministries to advocate for changes in rules and regulations and create a robust eco system for clean-tech ventures like ours. This ensured that our efforts were aligned to the larger objectives of the government and we could play a meaningful role in the development of the country.

We are also the beneficiaries of the Startup portal on Government e-Marketplace (GeM). The portal ensured that we could work with large public sector undertakings at a very early stage of our journey. It also eliminated the long tendering process and ensured we could work with the government in a fast and transparent way. With the funding round led by IAN Fund in April 2019, we have been able to create over 70 jobs in the manufacturing sector and also build intellectual property to contribute towards India’s growth and prosperity. The funding has also helped us build manufacturing and engineering capabilities to be able to partner with large and established corporations at a very early stage in our journey. We boast of having technical capabilities superior to corporations with over 50 years of experience. This acceleration in Innovation has been possible due to the financial support provided by the government under the Fund of Funds scheme. We are on track to create over 100 jobs in the manufacturing sector by the end of this financial year and scale up our operations to improve the air quality in multiple Indian cities including Delhi NCR, Chennai, Pune, Lucknow and Bangalore.

There are multiple other benefits we have received under the Startup India scheme and congratulate the revolutionary measures taken by the Government of India”

- Kushagra Srivastava, Chakr Innovation
2.2.3 INTELLECTUAL PROPERTY RIGHTS SUPPORT

Trademarks, patents, and design registrations are an important intangible asset for any startup, as these enhance valuation and competitiveness of their products and the brand. Startups with limited resources can thrive and compete against established players through innovation and protection of their intellectual property rights. Startup India provides a list of patent and trademark facilitators that help in registration and obtaining necessary credential.

Startup India, through its various resource partners, has also enabled an online platform-based solution for entrepreneurs to safeguard their ideas. The legal support & Intellectual Property Right (IPR) facilitation benefits provided under the Startup India Initiative are as follows:

- Fast-tracking of startup patent applications so that they can realise the value of their IPRs at the earliest
- Panel of facilitators to assist in filing of IP applications.
- Legal support and fast-tracking patent examination free of charges, while the central government bears the entire fees of the facilitators for any number of patents, trademarks or designs that a startup may file, and the startups bear the cost of only the statutory fees payable.

Startups are provided with **80% REBATE IN FILING OF PATENTS** vis-a-vis other companies, bringing down the cost from **Rs 8,000 TO Rs 1,600**, helping them cut down on costs in their early years.

**50% REBATE IS ALSO PROVIDED IN FILING OF TRADEMARKS** vis-a-vis other companies decreasing the cost from **Rs 10,000 to Rs 5,000**.

Additionally, startups are also considered for expedited examination of patent applications to reduce time taken in granting patents.

As of June 2020,

- **3618 PATENT** applications have been filed
- **981 PATENT** applications filed for expedited examination by Startups; of these 884 applications have been examined and 336 Patents have been granted
- **6832 TRADEMARK APPLICATIONS** have been filed
- **510 PATENTS** and designs facilitators and **392 TRADEMARKS FACILITATORS** empanelled under the scheme.

“**We are a DPIIT-recognized startup and we have also been granted patent for our innovation. In this view, I want to say that the process for filing patent application is very smooth. I got my patent granted very soon as compared to the normal processing after application. The Government of India has appointed the Patent Agents for this work and I have chosen one of the names. She told me about the entire process and helped me at every step. Too much supportive The agent approved by the GoI was very supportive. The Patent fee is also very nominal. I am very satisfied with the process and fees for patent related work for startups I really appreciate the work of GoI in this regard.**”

- Ashwani Sharma, Inovatiq Engineering Pvt Ltd (A DPIIT-recognized Startup)

---

4 YEARS ACHIEVEMENT REPORT
“Our Startup product “Saif Seas” is an unmanned self-propelled water surface drone. Its aim is to provide immediate aid to a drowning person in any water body. In today’s open market for every innovation, there exist individuals violating intellectual property rights. To avoid this NDRC (National Research Development Corporation) has helped us procure a patent under the Startup India scheme. This has helped us a lot. They handheld us throughout the entire process of patent filing. Under the SIPP scheme all the finances of the patent were taken care of. This was a big benefit for us. After being recognized as a startup we got various incentives such as an incubation space of 1500sq ft at AP Innovation Society for working and assembling our product. Patent cost, intellectual property cost, trademark and any legal cost was covered under the SIPP Scheme.”

- Aliasgar Calcutawala, Saif Automations Services LLP

“Founded in 2016, AgNext is a globally acclaimed & fast-growing agritech company that aims at providing technology-enabled rapid solutions that assess the quality of Agri commodities, increase transparency, & enhance the safety of food in agribusinesses. Incubated at IIT Kharagpur, AgNext got its first seed funding from a–IDEA National Agriculture Research in 2017. In the following years, funding was received from Omnivore and Kalaari venture funds as well. Qualix, our AI-enabled revolutionary platform, provides rapid and affordable testing of agri commodities with complete composition and adulteration assessment in samples and also has an easy adaption for any new type of adulteration in just 30 seconds. We seem to find great potential in availing the benefit “Patent applications & IPR protection” wherein it provides 80% rebate in filing of patents & also 50% rebate in filing trademarks as compared to other companies in the near future. We look forward to our future prospect association with Startup India.”

- Sparsh Kaur, AGNEXT TECHNOLOGIES PRIVATE LIMITED

“Ingen Robotics is registered under the Startup India programme, and we have a DPIIT registration as well. This has allowed us to apply for patents under a much-reduced cost, which is useful for a bootstrapped startup like us. We have been granted 4 patents and have filed for 3 more. We were also selected for the Altair Challenge programme conducted by Startup India, through which we got access to expensive simulation software and training. In addition, the DPIIT registration enabled us to register with Kerala Startup Mission, which provided us with grants for patents, and also for productization.”

- Rejin Narayanan Saroja, CEO, Ingen Robotics Private Limited
In order to provide added financial support to the ecosystem and promote infusion of capital through investors, tax exemptions have been implemented. These enable startups to meet their policy goals and reduce the tax system’s administrative burdens.

INCOME TAX INCENTIVES

Startup India took upon itself to resolve, one of the key barriers to startups, taxes, by not only simplifying the processes involved, but also exempting startups from taxes under certain eligibility. While the indirect taxation reform in the form of Goods and Services Tax (GST) has helped in greater formalisation and simplification of the Indian tax regime, the taxation slabs have required further reforms to support entrepreneurial growth. Reduced outflow of cash amounts to savings, further accelerating reinvestment into startups. Tax incentives have thereby helped startups to a great extent especially in the initial stages of their lifecycle.

With a view to stimulate the development of startups in India and provide them with a competitive platform, the profits and gains derived by an eligible startup from eligible business may get 100% exemption for three consecutive assessment years out of seven years from the year of its incorporation.

In order to further rationalise the provisions relating to startups, it is proposed under Finance Bill 2020 to amend section 80-IAC of the Act so as to provide that the deduction under the said section shall be available to an eligible startup for a period of three consecutive assessment years out of 10 beginning from the year in which it is incorporated. This amendment will take effect from 1st April 2021.

To avail the benefits under the Income Tax Act, a startup must get a Certificate of Eligibility from the Inter-Ministerial Board (IMB) of Certification. The Board comprises of Joint Secretary, Department for Promotion of Industry and Internal Trade (DPIIT), Representative of Department of Biotechnology, and Representative of Department of Science & Technology.

PROVISIONS UNDER SECTION 80–IAC OF THE INCOME TAX ACT:

(i) “Eligible Business” means a business carried out by an eligible startup engaged in innovation, development or improvement of products or processes or services or a scalable business model with a high potential for employment generation or wealth creation;

(ii) “Eligible Startup” means a company or a limited liability partnership engaged in eligible business which fulfils the following conditions, namely—

(a) It is incorporated on or after the 1st day of April 2016 but before the 1st day of April 2021;

(b) The total turnover of its business does not exceed Rs 100 crore [in the previous year relevant to the assessment year for which deduction under subsection (1) is claimed]; and

(c) It holds a certificate of eligible business from the Inter-Ministerial Board of Certification as notified in the Official Gazette by the central Government.

A DPIIT-recognised startup is eligible to apply to the Inter-Ministerial Board for full deduction on the profits and gains from business (exemption under Section 80–IAC of the Income Tax Act) provided the following conditions are fulfilled. The entity should be

• A private limited company or a limited liability partnership,

• Incorporated on or after 1st April 2016 but before 1st April 2021, and

• Products or services or processes are undifferentiated, have potential for commercialisation, and have significant incremental value for customers or workflow.

Since the commencement of the meetings of IMB in 2016, 42 meetings have been conducted up to February 2020 and 266 eligible startups have been granted exemption under 80-IAC of the Income Tax Act.

In line with the notification issued by DPIIT via G.S.R. No. 127 (E) dated 19 February 2019, the complete process from receipt of application to grant/rejection of benefits was reviewed and below issues were discussed in the meeting held on 16 May 2019:

1. It was observed that a large number of applications were being rejected for availability of similar products/services. The applications should not be rejected merely on the basis of similar products/services, as it could mean higher demand and competition.

2. An entity which is working towards innovation, development or improvement of products or processes or services or whether it is a scalable business model with a high potential for employment generation or wealth creation is also eligible for these exemptions.

3. Startups from remote/rural areas are also encouraged to apply.

In view of the material changes made in the process of grant of exemption under Section 80-IAC of the Income Tax Act, a substantial increase was noted in startups benefitting from the tax benefits.
**APPLICATION PROCESS:**
Workflow process for the application by startup:

Any entity fulfilling the criteria as per the notification G.S.R. 127 (E) dated 19th February 2019 issued by DPIIT, can apply for exemption under provisions of Section 56(2) (viib) of the Income Tax Act,1961. The process for the same is given below:

- An eligible entity applies for startup recognition by DPIIT on the Startup India portal.
- The application is reviewed and the certificate of recognition is issued to complete application fulfilling the eligibility criteria.
- The recognised startup fulfilling conditions in para 4(i) and 4(ii) of the notification G.S.R. 127 (E), files a duly signed declaration in Form 2 online on the Startup India portal through its dashboard.
- The complete application along with declaration is received by Startup India, DPIIT.
- On receipt of the same, DPIIT forwards the application to CBDT.
- Post review, CBDT issues intimation to the startup with the complete application regarding receipt of declaration under Form 2.

**EXEMPTIONS ON INVESTMENTS ABOVE FACE VALUE**

DPIIT-recognised startups are exempted from tax under Income Tax Act on the amount exceeding Fair Market value of shares for issue of shares above the face value. The startup has to provide a duly signed self-declaration in Form 2 which is sent to Central Board of Direct Taxes (CBDT) to claim exemption from the provisions of Section 56(2) (viib) of the Income Tax Act.

Tax on investments above face value is a tax rule applicable to investments by Indian residents in the capital raised by private limited companies via issue of shares. It was introduced as an anti-abuse provision in the 2012 Budget to restrain attempts to launder undisclosed income. The tax was charged at an effective rate of over 30% (till FY 19) on investments in shares “above face value” made at a premium. Such an investment attracted the provisions of Section 56(2)(viib) of the Income Tax Act under which the excess premium was taxed under the head “income from other sources”. Many startups had raised concerns on having received notices from the Income Tax department on the funds raised in the angel round.

The idea of taxation began to restrict angel investors from investing their money and trust on inexperienced and early-stage startups. Different valuation models determined different values basis projections and future growth assumptions that could vary from the net asset value of the business. This prevented people from starting a business in India as 30% of the capital raised went towards taxes. Department for Promotion of Industry and Internal Trade (DPIIT) recognised the gravity of hardship that the formulated tax regime was having on startups and held deliberations with CBDT on carving a way out for startups and eventually modified the criteria.

4 YEARS ACHIEVEMENT REPORT
**4 YEARS ACHIEVEMENT REPORT**

“We have started Genrobotics in 2017 as a Robotics company under Startup India with the vision of providing cutting edge robotic solutions for those who are facing extremities. We developed Bandicoot Robot for cleaning sewage in 2018 to end manual scavenging from our Nation along with the rehabilitation of manual scavengers to Robot operators. We have raised investment from Unicorn VC through the Fund of Fund scheme to scale up the project across India and now implemented in more than 10 states. Also, we received the IMB Certificate for tax exemption under the Startup India scheme to boost the growth of company. Now, Bandicoot Robot has become a part of India’s SWACHH BHARAT ABHIYAN and MAKE IN INDIA initiatives. We are honoured by getting the prestigious AMRUT Tech challenge Award from the Ministry of Housing and Urban Affairs, Government of India for developing the turnkey technology to clean manholes without human intervention..”

- Rashid K, Co-Founder and Director, Genrobotic Innovations Private Limited

In order to provide a hassle-free tax environment, Central Board of Direct Taxes (CBDT) issued consolidated circulars on 30th August, 2019 on how to deal with matters relating to assessment of start-ups, time limit for completion of their pending assessments, procedure for addition made under section 56(2)(viib) of the Income Tax Act in the past assessment and outstanding income tax demands.

In order to redress grievances and to address various tax related issues in the cases of Startups, a Startup Cell was constituted on 30th August 2019. The Cell, for any grievances/communications relating to Startups may be approached at O/o Under Secretary, ITA-I, Room No. 245A, North Block, New Delhi-110001. Ph. No. 011-23095479/23093070 (F). The Cell will also be accessible at startupcell.cbdt@gov.in.

As of February 2020, with regard to declarations received from entities, furnished in Form 2, it is stated that intimation regarding receipt of Declaration in Form 2 has been mailed in the cases of 2,199 entities.
REVIVING INVESTMENTS: A WALKTHROUGH

When startups raised funds from Indian unlisted firms/individual investors at a price above face value, the consideration received in excess of the Fair Market Value was taxed at a rate of 30% as income from other sources of the startups under the provisions of section 56(2)(viib) of the Income Tax Act. It was introduced as an anti-abuse provision in the 2012 Budget to restrain attempts to launder undisclosed income. The levy of this tax gravely impacted startup valuation on business potential, innovation in ideas, and intangible assets. Valuation models such as Discounted Cash Flow and future growth assumptions lead to a difference in the estimate when compared to the Net Asset Value of the business, which could be much lower.

Many startups started receiving notices under Section 56(2)(viib) from the Income Tax department on the funds raised in seed funding round by them, thus restricting some investors from planting their money in early-stage startups. Seed investment in startups generally precedes any investment by Venture Capital Funds (VCF) which were exempt from the said provisions. This, in turn, began a ripple effect, preventing more people from coming forward and starting their businesses as more than 30% of their capital raised was foregone. This concern was raised by startups, private equity funds, and various startup associations.

DPIIT recognised the gravity of this hardship and deciphered that many unlisted early-stage startups rely heavily on funding from such investors to build the base for getting further funding from VCFs in next rounds. It could sense growing resentment in the startup ecosystem towards the Government. DPIIT decided to take up the issue and bring the entire gamut of concerns to the Central Board of Direct Taxes (CBDT), Department of Revenue’s notice. It raised the issue and various concerns that were hovering around it to CBDT and requested it to reduce the severity of such hefty tax provisions on startups. It was “highlighted” that the harsh taxation norms were pulling down startups which relied heavily on seed investors and were acting as a regressive force in the process of nation building.

With the support of CBDT, DPIIT issued a notification in April 2018 in supersession to the earlier notifications. This notification instated a carve out for eligible startups providing them exemption from the provisions of section 56(2)(viib) subject to fulfilment of certain conditions. These conditions included aspects around the maximum amount of permissible paid-up share capital in the startup, minimum returned income or Net Worth of the investor, and the requirement of the startup to obtain a merchant banker report stipulating the fair market value of shares determined as per the stipulated Income-tax Rules, 1962. In this case, the application had to be made to the Inter-Ministerial Board which was entitled to grant or decline the requisite exemption.

However, the notification still needed to achieve a lot more in order to reach the milestone defined by DPIIT. This was because the conditions laid down for claiming the said exemptions had severe requirements for the investor to disclose his returned income or net worth. Many of these investors were asked to provide details on Permanent Account Number (PAN), bank statements, income computation, and other documents. This enhanced the feeling of harassment in many angel investors who would have otherwise found it easier and more convenient to invest in real estate or share market or in startups abroad.

“The Startup India team has been instrumental in the growth of the Indian startup ecosystem as it has worked tirelessly to address the concerns of Indian startups and investors and has become a champion for the ecosystem. The work it has actioned on a policy level has made AIFs an attractive asset-class for both Indian and global investors. The recognition of AIFs as a well-regulated, institutional investor has allowed it to gain exemptions from section 56(2)(viib) (dubbed the “Angel Tax”) and section 68. By allowing for AIFs to have pass-through status on losses, the structure has become more commercially attractive and will go a long way. In India’s dream to become a $5 trillion economy by 2025, startups and new-age businesses are supposed to contribute $1 trillion. Startup India’s role as an ecosystem enabler will be crucial to achieving this monumental goal.”

– 3one4 Capital
Startups, on the other hand, began relocating outside India in order to raise capital given the dearth of investors willing to invest in the Indian market. Furthermore, the requirement to obtain a valuation report from a merchant banker attracted hefty costs for startups in their early stages when they were struggling for survival. DPIIT again became a platform for startups and their investors to address this issue. To protect bona fide investments into startups, DPIIT took the matter of issuance of Income Tax notices to startups and investors with the Department of Revenue (DoR). In light of the situation, CBDT directed the Assessing Officers to not take any coercive action for recovery of tax dues and to set up a committee to review the issue.

DPIIT organised a roundtable in February 2019 to address the matters still hovering over startups and investors. The roundtable was attended by the DoR representatives from various industry bodies, private equity, and startups who raised key issues being faced by them in the ecosystem concerning this tax. Acknowledging the situation and hardships being faced by startups, CBDT extended its support further to liberalise the norms of section 56(2)(viib). DPIIT could thereby issue a ground-breaking notification on 19th February 2019 that serviced various issues of startups and investors and increased the horizon of startup definition to accommodate more entities under the Startup India scheme and its benefits.

Further, DPIIT initiated exemption to all sub-categories of Category I Alternative Investments Funds (AIFs) and Category II AIFs from the said provisions. DPIIT continuously seeks to boost startups and address regulatory hardships being faced by them.

The time period for which an entity could be considered a startup was increased from seven years to ten years and the turnover criteria was increased from Rs 25 CRORE TO Rs 100 CRORE.

Furthermore, a recognised startup could claim exemption from the provisions of section 56(2)(viib) of the Income Tax Act subject to meeting the conditions that:

i. it has been recognised by DPIIT

ii. aggregate amount of paid-up share capital and share premium of the startup after issue or proposed issue of share, if any, does not exceed Rs 25 crore,

It has not invested in any of the assets specified in the notification G.S.R. 127 (E) dated February 19, 2019 issued by DPIIT.

The startup has to file a duly signed declaration in Form 2 to DPIIT [as per notification G.S.R. 127 (E)] to claim the exemption from the provisions of Section 56(2) (viib) of the Income Tax Act.

In order to provide hassle-free tax environment, Central Board of Direct Taxes (CBDT) issued a consolidated circulars on 30th August, 2019 on how to deal with matters relating to assessment of start-ups, time limit for completion of their pending assessments, procedure for addition made under section 56(2)(viib) of the Income Tax Act in the past assessment, outstanding income tax demands.

In order to redress grievances and to address various tax related issues in the cases of Startups, a Startup Cell was constituted on 30th August 2019. The Cell, for any grievances/communications relating to Startups may be approached at O/o Under Secretary, ITA-I, Room No. 245A, North Block, New Delhi-110001. Ph. No. 011-23095479/23093070 (F). The Cell will also be accessible at startupcell.cbdt@gov.in.

As of February 2020, with regard to declarations received from entities, furnished in Form 2, it is stated that intimation regarding receipt of Declaration in Form 2 has been mailed in the cases of 2,199 entities.

“Startup India’s work on Angel Tax has been very helpful for us. Their work led to an exemption being granted. It came at the right time as the Income Tax department had served us with a notice. We had adhered to every rule and had every document in place. Still, we were very worried about the time and money that a response and subsequent hearings would suck up. The quotes that we received from CAs confirmed our fears. Thankfully, the exemption came in time and we could just attach that in reply. Just like that, we were done and a load off my head!”

- Switchme Technologies Pvt. Ltd.
A complex and tedious winding-up process was yet another restriction for startup enthusiasts as it was considered that “shutting down a company is far more difficult than starting a company. The costs involved in closure were few of the main reasons why several firms had continued to remain dormant without legally shutting operations. They would have to bear costs for maintenance and compliance with annual filings. Failing to do so would attract penal consequences by the relevant authorities.

The Insolvency and Bankruptcy Code, 2016 (Code) provides for insolvency resolution of corporate persons, partnership firms and individual in a time bound manner. The Code has improved business climate in the country by making it easier for enterprises to exit in case of difficulties.

a) Section 12 of the Code states that insolvency resolution process shall be completed within a period of 180 days from the date of admission of application by the National Company Law Tribunal, which is the Adjudicating Authority. This may be extendable to another 90 days and shall be completed within a maximum period of 330 days including the one-time extension. Once an application for insolvency resolution is admitted, an Insolvency Professional takes over the management of the corporate debtor who takes custody and control of the assets of the firm and conducts its business where feasible. If insolvency resolution fails or there is no feasibility of business, the corporate debtor would be liquidated.

b) Besides the above, fast track corporate insolvency resolution process is provided under sections 55 to 58 of the Code, providing for a total period of 90 days for insolvency resolution from the date of admission of application. This may be extendable to another 45 days.

c) Further, section 59 provides adequate mechanism for voluntary liquidation of corporate persons.
Since the inception of Startup India in January 2016, a number of policy reforms have been undertaken through various agencies and departments, for enabling small businesses or startups across the country. In order to improve the policy regime, an institutional mechanism has been established within Startup India. Department for Promotion of Industry and Internal Trade (DPIIT) invites regular stakeholder consultations to understand the issues and concerns of startups, investors, incubators, and other stakeholders in the ecosystem.

A Committee of Secretaries (CoS) chaired by the Finance Secretary has been constituted for dealing with the regulatory issues being faced by startups. Through continuous efforts and support of various Ministries and Regulators, 36 Regulatory Reforms (3 proposed in Finance Bill) have been undertaken for the benefit of the startup ecosystem stakeholders through the support of Reserve Bank of India (RBI), Securities and Exchange Board of India (SEBI), Ministry of Commerce of Industry, Ministry of Electronics and Information Technology, Ministry of Corporate Affairs, and Ministry of Finance. Some of the key reforms undertaken during the four year journey are listed below:

**Reserve Bank of India**

1. Startup enterprises permitted to access loans under External Commercial Borrowing Framework up to Rs 22 crore (USD 3 million). (Oct 2016).
2. A Securities and Exchange Board of India (SEBI) registered Foreign Venture Capital Investor (FVCI) may contribute up to 100% of the capital of an Indian company engaged in any activity mentioned in Schedule 6 of Notification No. FEMA 20/2000, including startups irrespective of the sector in which it is engaged, under the automatic route. (Aug 2017).
3. An Indian startup having an overseas subsidiary, may open a foreign currency account with a bank outside India for the purpose of crediting to it foreign exchange earnings out of exports/sales made by the said entity and/or the receivables, arising out of exports/sales, of its overseas subsidiary. (June 2016).
4. SOFTEX form filed by software exporters moved online. (Feb 2019)

**Securities and Exchange Board of India (SEBI)**

1. Lock in period for investments made by an Angel Fund reduced to 1 year from 3 years as amended by the SEBI (Alternative Investment Funds) (Amendment) Regulations, 2016, w.e.f. 04-01-2017.
2. Angel Funds are allowed to invest in overseas venture capital undertakings up to 25% of their investible corpus in line with other AIFs as provided by the SEBI (Alternative Investment Funds) (Amendment) Regulations, 2016, w.e.f. 04-01-2017.
3. The upper limit for number of angel investors in a scheme is increased from forty nine to two hundred as amended by SEBI (Alternative Investment Funds) (Amendment) Regulations, 2016, w.e.f. 04-01-2017.
4. The requirements of minimum investment amount by an Angel Fund in any venture capital undertaking is reduced from fifty lac to twenty five lac as amended by SEBI (Alternative Investment Funds) (Amendment) Regulations, 2016, w.e.f. 04-01-2017

**Ministry of Commerce and Industry, Department for Promotion of Industry and Internal Trade**

1. Amendment in the definition of a Startup by way of a notification issued by DPIIT in this regard. Now, an entity shall be considered as a Startup upto a period of ten years from the date of incorporation/registration and turnover of the entity for any of the financial years since incorporation/registration has not exceeded one hundred crore rupees. Earlier, the criteria for period was seven years and turnover was twenty five crore rupees. (Feb 2019)
Ministry of Finance, Department of Revenue

1. In the case of a domestic company, where its total turnover or the gross receipt in the previous year does not exceed two hundred and fifty crore rupees, income tax shall be charged at the rate of 25 percent of the total income. (Feb 2018)

2. Definition of eligible business as stated in Section 80-IAC aligned with Startups definition. (April 2018)

3. Introduction of Section 54EE in the Income Tax Act, 1961: Exemption from tax on long-term capital gain if such long-term capital gain is invested in a fund notified by Central Government. The maximum amount that can be invested is Rs 50 lac. (May 2016)

4. Amendment in Section 54GB of Income Tax Act: Exemption from tax on capital gains arising out of sale of residential house or a residential plot of land if the amount of net consideration is invested in prescribed stake of equity shares of eligible Startup for utilizing the same for purchase of specified asset. (Feb 2016)

5. Minimum Alternate Tax credit allowed to be carried forward up to fifteenth assessment years instead of ten assessment years. (2017)

6. Exemption under section 80-IAC of Income Tax Act: Exemption to eligible Startup for any 3 consecutive assessment years out of 7 years (earlier 5 years) beginning from the year in which such eligible Startup is incorporated. (April 2018)

7. Exemption from tax under the provisions of section 56(2)(viib) to Startups for issue of shares above fair market value on the basis of a self-declaration to the Central Board of Direct Taxes. The aggregate amount of paid up share capital and share premium of the startup after issue or proposed issue should not exceed Rs. 25 Crore. (Feb 2019)

8. Taxation of convertible notes – Period for which a bond, debenture, debenture-stock or deposit certificate was held prior to conversion shall be considered for determining the period of holding of such shares or debentures acquired upon conversion. (March 2016)

9. Amendment in Section 54GB of Income Tax Act w.e.f 1st April 2020: (August 2019)

(i) The condition of minimum holding of 50% of share capital or voting rights in the start-up relaxed to 25%

(ii) Extension of period under which benefit under section 54GB from for sale of residential property can be availed up to 31st March 2021;

(iii) Condition restricting transfer of new asset being computer or computer software is to relax from 5 years to 3 years w.e.f. 1 April 2020.

10. Amendment in Section 79 of Income Tax Act (August 2019): Eligible Startups to carry forward their losses on satisfaction of any one of the two conditions:

(i) Continuity of 51% shareholding/voting power or

(ii) Continuity of 100% of original shareholders carrying voting power;

11. Pass through of losses allowed to Investment Funds i.e. Category I and II AIF similar to pass through of income. These amendments will take effect from the 1st April 2020 and will, accordingly, apply in relation to the assessment year 2020-21 and subsequent assessment years (August 2019)

12. The investment made by Venture Capital Fund of Category-I AIF in a startup was exempted from the applicability of the provisions of section 56(2)(viib) of the IT Act. This exemption has been extended to all sub-categories of Category-I AIF and Category-II AIF via introduction of “specified funds” in the said section (August 2019)

13. The Finance Bill 2020 seeks to amend the provisions for taxing of Employee Stock Options in the hands of employees of eligible startups referred in section 80-IAC by deferring the tax liability by a period of forty-eight months from the end of the relevant assessment year; or from the date of the sale of such specified security or sweat equity share by the assessee; or from the date of the assessee ceasing to be the employee of the person, whichever is earlier.

14. The Finance Bill seeks to amend section 80-IAC to provide for income tax exemption to eligible startups for a period of three consecutive assessment years out of ten years vis-à-vis the earlier norm of seven years such that the turnover does not exceed hundred crore rupees.

15. The Finance Bill seeks to amend section 80-IAC to provide for income tax exemption to eligible startups for a period of three consecutive assessment years out of ten years whose turnover does not exceed hundred crore rupees vis-à-vis the earlier norm of twenty five crore rupees.

Ministry of Electronics and Information Technology

1. Removal of clause from Electronic Development Fund (EDF) operating guidelines stating that if a fund draws from Fund of Funds for Startups, then they cannot draw from EDF and vice versa. (Nov 2018)
1. The financial statement, with respect to private company (if such private company is a start-up) may not include the cash flow statement. (June 2017)

2. A private company, which is considered as a start-up for a period of five years from the date of its incorporation, is also allowed to accept deposits from members without any restriction on the amount. (Sep 2017)

3. Startup defined for the purpose of Companies Act, 2013: As per the definition, a start-up company means a private company incorporated under the Companies Act, 2013 and recognised as a “start-up” in accordance with the notification issued by the Department for Promotion of Industry and Internal Trade. (June 2017)

4. Exemption from procedural compliance (e.g., such as issue of an offer circular or creation of a deposit repayment reserve) for raising deposits from shareholders. (June 2017)

5. In relation to a private company (if such private company is a start-up), the annual return shall be signed by the Company Secretary, or where there is no Company Secretary, by the Director of the company. (June 2017)

6. A private company (if such private company is a start-up) is required to conduct at least one meeting of the Board of Directors in each half of a calendar year and the gap between the two meetings is not less than ninety days. (June 2017)

7. Name Reservation for Company incorporation: Rule 8, Companies (Incorporation) Rules, 2014 substituted with Companies (Incorporation) 5th Amendment Rules, 2019, which provides for new regulations on resemblance with an existing company name, new categories of undesirable names of a company and list of words which can be used only after obtaining approval. (May 2019)

8. Amendment in Companies (Share Capital and Debentures) Rules, 2014: The Ministry of Corporate Affairs issued a notification on 16th August, 2019 increasing the period in which ESOPs could be granted to promoters and directors (holding more than 10% equity) of Startups, from 5 years to 10 years from the date of incorporation and thereby aligned the provisions of the Companies (Share Capital and Debentures) Rules with the provisions referred to in the DPIIT notification dated 19th Feb, 2019.

   The notification also escalated the limit on shares with Differential Voting Rights in the Company from 26% of the total post-issue paid up equity capital of the Company to 74% of the total voting power. Further, the condition for the company to have consistent track record of distributable profits for the last three years for issue of DVR shares has been removed. (August 2019)

9. CSR 2% fund can be spent on incubators funded by Central or State Government or any agency or Public Sector Undertaking of Central or State Government, and, making contributions to public funded Universities, IITs, National Laboratories and Autonomous Bodies (established under the auspices of ICAR, ICMR, CSIR, DAE, DRDO, DST, Ministry of Electronics and Information Technology) engaged in conducting research in science, technology, engineering and medicine aimed at promoting SDGs. (October 2019)

10. As part of Government of India’s Ease of Doing Business (EODB) initiatives, the Ministry of Corporate Affairs has launched a new integrated Web Form christened ‘SPICe+’ replacing the existing SPICe form. SPICe+ would offer 10 services by 3 Central Govt Ministries & Departments (Ministry of Corporate Affairs, Ministry of Labour & Department of Revenue in the Ministry of Finance) and One State Government (Maharashtra), thereby saving as many procedures, time and cost for Starting a Business in India and would be applicable for all new company incorporations w.e.f. 23rd February 2020. SPICe+ has two parts: Part A—for Name reservation for new companies and Part B offering a bouquet of services viz. (i) Incorporation (ii) DIN allotment (iii) Mandatory issue of PAN (iv) Mandatory issue of TAN (v) Mandatory issue of EPFO registration (vi) Mandatory issue of ESIC registration (vii) Mandatory issue of Profession Tax registration (Maharashtra) (viii) Mandatory Opening of Bank Account for the Company and (ix) Allotment of GSTIN (if so applied for) (Feb 2020)

11. Easing some of the administrative norms in order to make room for startups to flourish has been prominently successful under the Startup India initiative. Simplicity in regulation, expanding the vision, and toning down regulatory discretion have been some steps undertaken. This has led to a wider applicability and acceptability among startup enthusiasts, adding to the Government’s initiative to provide incentives. Startup India aims to continuously identify and address potential bottlenecks that are restrict entry and subsequent up-scaling of ventures so as to improve the country’s startup ecosystem.
“Hats off to Hon’ble FM Smt. Nirmala Sitharaman for taking this great step of making Government-sponsored incubators eligible for CSR spending. This will open new pathways for sustainability of the incubation centres and ultimately make a huge impact on the growth of startups and the startup culture across the country”

- Dr. Abha Rishi, AIC BIMTECH

“Opening up of CSR fund stream for incubators is a welcome initiative. With the rapid rise in number of startups, India needs lot of capital to fulfil their funding needs, CSR and corporate collaborations is the way forward. It would also trigger incubators to support research based startups in Science & Technology”

- Abhishek Pareek, Atal Incubation Centre, Banasthali Vidyapith
The Fund of Funds (FFS) for startups has been established to provide funding support for development and growth of innovation driven enterprises as well as to address one of the key challenges faced by startups in India i.e. **access to risk capital**. Due to lack of collateral, uncertain cash flows and unconventional business models, startups are unable to raise financing through traditional sources such as banks and Non-Banking Financial Companies (NBFC). Besides this, the **high-risk nature of startups**, wherein a significant percentage fail, reduces their investment attractiveness for traditional financiers.

The Fund has been **structured as a Fund of Funds**, which means that it does not invest directly in startups but rather participates in the capital of Securities and Exchange Board of India (SEBI)-registered **Category-1 and Category-2 Alternate Investment Funds (AIFs)**. The tenure of the AIF supported under FFS will be **initially up to 12 years**. The FFS is managed by Small Industries Development Bank of India (SIDBI), which has issued its operational guidelines. The AIFs supported by FFS shall **invest at least twice the amount of contribution received from FFS in startups** qualifying as per the Gazette Notification G.S.R.501 (E) dated 23 May 2017, issued by Government of India and as amended from time to time. The aggregate contribution to the corpus of AIFs from Fund of Funds being operated by different Ministries of the Government of India / State Governments shall not exceed **35% of its corpus**. The Fund of Funds shall have **representation on the governance structure/ board of the venture fund** based on the contribution made.

**As of February 2020, SIDBI has committed **RS 3123.20 CRORE TO 47 AIFS (ALTERNATIVE INVESTMENT FUNDS) that have raised a corpus of **RS 25,728 CRORE. AMOUNT OF RS 912 CRORE has been drawn from FFS and amount of Rs 3378 crore has been invested in 320 STARTUPS.**

The Fund of Funds was set-up in 2016 with an **initial corpus of Rs 2,500 Crore and a total corpus of Rs 10,000 Crore** to be built over the 14th and 15th Finance Commission constituted by Government of India. As of 18th February 2020, **SIDBI had committed Rs 3123.20 Crore to 47 AIFs**, which had raised a total corpus of Rs 25,728 Crore, an **8X catalysing effect**. Rs 912.91 Crore has been drawn from the FFS by 40 AIFs, which have funded 320 startups and Rs 3378 Crore has been **invested in 320 startups** through the scheme.

**Addressing the financing challenges faced by startups in India for and the high risk nature of startups wherein a significant percentage fail to take-off, thus hampering their investment attractiveness, Government of India has set up a fund with an initial **RS 2,500 CRORE AND A TOTAL CORPUS OF RS 10,000 CRORE OVER A PERIOD FOUR YEARS.**

“**Startup India is a great catalyst for the overall startup ecosystem. Personally, we have benefited because of their low cost service initiative- fund of funds programme. One of our investors has taken capital from SIDBI’s Fund of Funds scheme which was indirectly invested in us. We are also recognized by the Government for our innovation which indirectly helped us build brand in the early days. Also, the response from the entire team is very prompt and professional**”

- Shibam Das, Atomberg

“Startup India and DPIIT have been a huge boon for my startup, Ethereal Machines. Thanks to the patent facilitator scheme by Startup India, we have saved lac of rupees when it comes to IPR registration. The entire process of enrolling as a startup and to be granted tax exemption was done without any hassle. Tax exemption is also a huge benefit given that helps funds be diverted towards research and development and building a self-sufficient India. We have also had the chance of exhibiting our technologies on a global platform such as GES, thanks to the support of Startup India. We are a beneficiary of the Fund of Funds Scheme through our investor Blume Ventures. We are presently utilising the funds to expand our geographical presence and ensure that India’s name is recognised globally as a place from where a deep-tech startup can emerge and succeed. Schemes like FFS benefit homegrown funds who can then further identify and deploy funds to deserving entrepreneurs across the country. ”

- Kaushik Mudda, CEO, Ethereal Machines

“WebEngage is a marketing cloud for consumer businesses. We are an Indian SaaS startup which has customers across the Indian subcontinent, Middle East, Europe, and North America. We offer a customer engagement and retention platform to our customers as a marketing cloud. Our customers are from the e-commerce, online travel, education technology, financial services, gaming and consumer brands segments. Our marketing cloud service was launched four years ago. We have been very capital efficient in our journey and have grown 75% YoY for last two years in a row. We have benefited immensely from various initiatives launched by the DPIIT to help startups grow. In January 2020, we raised our Series A from venture capital firms IAN Fund and India Quotient which are backed by the Fund of Funds Scheme for Startups. On behalf of team WebEngage, I thank GoI and DPIIT for their relentless efforts to help Indian startups succeed. ”

- Avlesh Singh, Co-founder & CEO, WebEngage

“We have benefitted by getting our funding through ‘Fund of Funds’ scheme through IAN Fund and also got our IT refund on an accelerated basis which has helped us during the Covid 19 lockdown to manage our finances slightly better. ”

- Tithi, Founder & MD, Trezi by SmartVizX

Since the launch of **STARTUP INDIA HUB** in April 2016, over **3.8 LAC** users have been registered.

Over **60%** of queries dealt via calls.

93% satisfaction score on the Startup India Learning Programme.

59% active users on Hub portal.

**In 4 years**

**Supporting STARTUPS** through added benefits.

**22.6 crore** of offerings availed.

**25 resource partners** currently offering services.

**Engaging levers to the startup ecosystem**

**200+ Million social media impressions**

Currently registered on Hub to support entrepreneurs:

- **563** Incubators
- **120** Accelerators
- **81** Investors
- **175** innovation hunts

*Based on impact numbers and amounts provided by partners*
Operationalising the framework for recognition of entities and following the agenda of the Action Plan, Startup India Hub was launched in April 2016 to provide a one-stop digital platform for the entire startup ecosystem in order to enable knowledge exchange and access to resources. For entrepreneurs, the Hub is envisioned to be their friend, mentor, and guide during their startup journey.

The portal serves as a virtual incubator to startups by providing access to information, knowledge, industry programmes, government schemes, and networking opportunities within the startup community. With over 3.80 lac users on the Hub, an entrepreneur can connect to 563 incubators and 120 accelerators for scaling-up, explore within a pool of 81 investors for funding support, and connect to 47 government entities for availing startup friendly benefits.

The “Startup India Hub” acts as a key enabler in this vibrant ecosystem and performs the following actions:

- Works in a hub and spoke model to collaborate with Central and State governments, Indian and foreign led Venture Capital Firms, banks/financial institutions, incubators, legal partners, consultants, universities, and Research and Development institutions.
- Assists startups throughout their lifecycle with specific focus on important aspects such as securing financing, feasibility testing, business structuring advisory services, enhancement of marketing skills, technology commercialisation, and management evaluation.
- Organises mentorship programmes in collaboration with government organisations, incubation centers, educational institutions, and private organisations which aspire to foster innovation.
- Hosts series of support services to provide lifecycle support to entrepreneurs such as query resolution, mentorship access, online learning and development courses, etc.

To improve assistance to startups during their lifecycle, the online platform was further enhanced in June 2017 in order to enable access to added market resources, generic tools and templates. The platform was upgraded to connect startup entities of respective states and UTs to various stakeholders and provide opportunities to startups in availing Startup India’s partnered services with academic and private institutions. The portal undergoes improvements on a regular basis to cater to the large audience registered on it.
### 4.1 Key Functionalities

- **Startup recognition:** Startups can seek recognition online and apply for associated benefits such as tax exemptions, prioritised status in public procurement, etc.

- **Introduction of the Application Management System:** The Hub allows stakeholders such as accelerators, incubators, mentors, investors, corporate entities, and government bodies, to seek registration on the portal to host programmes and challenges for all recognised startups.

- **Partnered Services:** Startups can avail free (limited) services across verticals such as legal, cloud, banking, customer experience, software enterprise, patent & trademark facilitation, etc.

- **Online Courses:** Free courses ranging from programming to management and entrepreneurship are available for all registered users on the platform.

- **Knowledge Bank:** Users can avail answers and solutions to vital questions such as, “How to Register a company” or access Startup India’s regularly updated glossary, market research reports from other organisations, etc.

- **Tools & Templates:** The portal offers a repository of various legal, HR, and other such templates that can be utilised in an entrepreneur’s journey from idea to enterprise.

- **Government Schemes:** This section is dedicated to collated schemes and grants offered by the Central and State Governments for all entrepreneurs. The section holds more than 68 schemes that can be filtered by types of incentives being offered, relevant Ministry, Department, and sector focus areas.

- **Query Resolution:** The Hub hosts a query resolution mechanism that addresses enquiries from various stakeholder groups, and this process is monitored by the Startup India team.

- **Handholding support:** Through the Hub portal, Startup India also caters to one-on-one facilitation support to existing startups, innovators, and other ecosystem members.

---

**Key Achievements**

<table>
<thead>
<tr>

<td>5200</td>
</tr>
<tr>
<td>Website Visits</td>
<td>1.3cr</td>
</tr>
<tr>
<td>Active Users</td>
<td>59%</td>
</tr>
</tbody>
</table>

The Hub, with over **3.80 lac users**, has hosted **175 innovation hunts** and funding assistance programmes in collaboration with various government departments and corporate houses. The portal has percolated within the Indian startup community resulting in **over 5200 daily active users**, cumulating to over **1.3 crore website visits** since inception.

---

15 Active users are users that you can identify (by an id, email or username) who interact with your business during a specified period.
With increasing channels of stakeholder interactions and constant evolution in user requirements in the startup ecosystem, a query resolution platform is hosted on the Hub portal to resolve enquiries of various users. The queries are addressed by the Startup India team via emails and Twitter (DPIIT’s Twitter Sewa Platform) whereas tele-queries are attended and addressed through a dedicated call centre. The Hub also highlights common queries (Frequently Asked Questions) tailored to user category, as a guide to users engaged on the network and provides evolving trends of generic queries for swift resolutions. Startup India offers dedicated call center resources to cater to the queries in **FIVE DIFFERENT LANGUAGES (ENGLISH, HINDI AND THREE OTHER REGIONAL LANGUAGES)** and aims to further integrate additional language options in the years to come.

**Query Analysis**

<table>
<thead>
<tr>
<th>Query Calls:</th>
<th>1,10,385</th>
</tr>
</thead>
<tbody>
<tr>
<td>Query Emails:</td>
<td>50,119</td>
</tr>
<tr>
<td>Query Tweets:</td>
<td>2,130</td>
</tr>
</tbody>
</table>

Over 1.5 lac queries have been resolved since the rollout of the query resolution platform where over 30% of the queries have been noted to be around clarifications on the Startup India scheme.

Interest has also been noted from a number of entrepreneurs to obtain further details on **FUNDING ASSISTANCE** and information on diverse aspects such as **COMPANY INCORPORATION, TAX EXEMPTIONS, INCUBATOR SUPPORT, PROCUREMENT, ETC**. The dedicated Startup India team also extends knowledge on queries concerning business advisory and availing partnered services through the Hub Portal.

In terms of insights from the query data, queries via calls from four States cumulatively comprise more than half of the calls received. Substantial shifts in the queries received can be correlated to some of the major events and reforms made through the Startup India initiative. With **OVER 80% CALLERS FROM PROFESSIONAL AND BUSINESS BACKGROUNDS** engaging to further develop on their ventures, the statistics on user profiling has reflected stronger interest among users and other interested groups.
Twitter is the only social network where brands and consumers have a level playing field and unrestricted lines of clear and concise communication. It thrives on several factors that support and affect engagements to targeted user groups, Startup India has been effectively utilising the vibrant platform to engage with users across the ecosystem.

Twitter interaction among stakeholders of the ecosystem has seen a phenomenal rise in the last four years, a prime depiction of increase in engagement of startup aspirants. The rise in engagement on the online and social media platforms correlates to the substantial increase in the number of startups that have been recognised over the same duration.

**Social Media Footprint**

**Twitter Trend:**

@STARTUPINDIA:

**Link Clicks:** Number of clicks on links posted by Startup India on Twitter

**Post Likes:** The cumulative number of likes received on all tweets

**Impressions:** Number of posts viewed on Twitter

</table>

**Social Media Presence**

Startup India has been effectively engaging with community of users. With over 80% traffic generated from young professionals (18-34 years), the Hub portal showcased over 3.8 lac registered users as of February 2020.

**Followers:**

- **Facebook:** 1,01,000+
- **Twitter:** 3,74,000+

**Video Views on YouTube:** 21,64,000+ views

**Website:**

**Page View:** 13 Mn+ views
The Startup India Learning Programme was launched in January 2017 to encourage individuals and impart fundamentals of entrepreneurship to startup aspirants/early stage startups through a four-week long free of cost e-learning and development programme.

The learning programme is available through the website and mobile applications in both English and Hindi languages and generates a Startup India recognised completion certificate. The course guides startup aspirants on creation of a business plan imbibing their innovative ideas. Furthermore, Invest India in collaboration with UpGrad has developed this programme. The aim is to help entrepreneurs grow their ideas and ventures to the next level through structured learning. The programme covers lessons on key areas of starting up by 40+ top founders of India in an extensive programme.

The reach of the programmes and utilisation amongst entrepreneurs has incrementally risen at an average rate of 30% over the last three years. This has also reflected upon the acceptability of the programmes and guidance therein within the entrepreneurial community.

As per a feedback survey conducted in 2019, the Startup India Learning Programme received an average rating of 9.3/10 across 1267 responders.

"Unfortunately, Startup aspirants including the experienced ones make some very basic mistakes. A Government of India initiative, SILP (Startup India Learning Programme) provides an amazing starter kit, in the rather clueless entrepreneurial journey."

- Shubhash Chandra Shrivastav

"Just finished this amazing FREE four-week online course by Upgrad in partnership with Startup India. If you are a budding #entrepreneur excited about startups but do not know where to start, this is the course for you."

- Bharadwaj Gridhar
With the objective to encourage engagement between industry and entrepreneurial community, Startup India has launched several partnerships with prominent corporates to provide support to innovative startups in various phases of their lifecycle, ranging from the ideation phase to funding, all the way to incubation and scaling up.

Until February 2020, Startup India has collaborated with over 80 corporates and other industry players to support Indian startups.

Corporate Partnerships

- 110 Challenges
- Over 500 winners benefited
- Over 6 Cr cash prizes and other incentives such as paid Proof of Concept (PoC), incubation, prototype and mentoring support.

Resource Partners*

Startup India hub has launched several partnerships with prominent corporates and companies over the years to provide pro-bono and incentivised services to startups recognised by DPIIT. The aim of these partnerships is to encourage engagement between industry and entrepreneurial community.

*Based on impact numbers and amounts provided by partners

Since 2016, Startup India has on-boarded 25 partners to benefit the startup community in India. Until February 2020, 3000+ startups have availed various services offered through the resource partners with overall value offering of around Rs. 22.65 crore.

4.5 STARTUP INDIA GRAND CHALLENGES

STARTUP INDIA has worked with various Government and private organisations to conduct startup challenges on different domains to promote competitiveness and engage entrepreneurs in supporting Central/national endeavours undertaken by the Government. The initiative has further enhanced collaboration among the startup ecosystem builders in identifying and scaling up selective ideas among respective sectors. The startup grand challenges have also channelized Government and private sector agencies to work with startups and incorporate the spirit of innovation and entrepreneurship.

SINCE 2017, there have been around nine grand challenges organised by DPIIT in collaboration with other Ministries and public organisations offering lucrative incentives to the winners.

9 GRAND CHALLENGES

KEY PARTNERS

- MINISTRY OF AGRICULTURE
- CENTRAL RESERVE POLICE FORCE
- MINISTRY OF NEW AND RENEWABLE ENERGY (MNRE)
- NATIONAL SECURITY GUARDS (NSG)
- DEPARTMENT OF ANIMAL HUSBANDRY AND DAIRING
- MINISTRY OF JAL SHAKTI
AGRICULTURE GRAND CHALLENGE:

The Ministry of Agriculture in partnership with Startup India launched the Agriculture Grand Challenge in December 2017 wherein 12 pre-identified problem statements were noted for seeking solutions from the startups. The challenge conducted five mentorship workshops with over 400 recognised Agritech startups, multiple screenings and interviews, 20 innovative ideas were finalised for up-scaling.

Startups in ideation and validation stages were offered three month incubation support under leading Agritech incubators, along with handholding support and real-time testing of Proof of Concept (PoC). For startups which matured to early traction & scaling-up stages, a three month market access programme under the Ministry of Agriculture was offered along with real-time access to market insights and support from domain experts.

"**AGC programmes will help startups grow exponentially**"

"Agriculture Grand Challenge (AGC) was a well-structured programme with clear deliverables. The programme was structured in a way, which provided a platform for startups/entrepreneurs to work and build their venture with necessary support of relevant stakeholders like the Government and assist them to grow exponentially."

- Ankur Goel, Skwerup.com, start-up mentor and business consultant

"**Mentors need to be involved over longer period**"

"Agriculture Grand Challenge (AGC) is strongly recommended to startups to fine-tune their business model and avail industry connects and to investors who can use the opportunity to build a deal flow pipeline. The AGC Panel consists of a good composition of financial institutions, entrepreneurs and investors with in-depth experience. Mentors need to be involved over a longer period of time so that they can deep-dive into each startup."

- Rajeev Aiyappa, Agri Expert and advisor for business growth strategiest

"**We were guided on various schemes available & given support to apply**"

"KIIT-TBI team was quick to support us in getting our DPIIT startup recognition; they were very responsive with the required documents and recommendations. They also guided us on various Government schemes available for projects within our field and offered to support us through the process. As part of our incubation programme, we got to network with industry representatives within the Agriculture and venture capital space."

- Rajiv Bhatia, Samudra Network
“Encouragement helped us progress on our dream”

“Thanks to our participation in the Agriculture Grand Challenge by the Government of India. Although we were not selected in AGC, we received a call from KIIT-TBI to participate in BIG-13 grant by BIRAC. Until then we were not aware of any such grants. KIIT-TBI officers convinced us that our research in agriculture and biotechnology is worth participating in BIG challenge and hence we did. To our delight, we not only got shortlisted, but also got selected. This encouragement helped us to form a company and progress on our dream project very quickly with further help in getting NIDHI PRAYAS scheme too. We are extremely thankful to KIIT-TBI team for the continuous guidance, mentoring and support to ensure our motivation levels all the time. Today, we are confident about our business models and are moving in the right direction. Looking forward to such continued support, as always, so that we continue to innovate in the areas of Agritech and Biotech to contribute whatever best is possible in bringing technological advancements in Agriculture and thus uplift the life of our humble farmers, while we emerge as successful entrepreneurs. We all owe a big thank you to the entire team of KIIT-TBI for the enduring efforts in bringing technologists together for nation building!”

- Raghu BN, Director, GR Agritech Labs Pvt Ltd

“The programme was excellent, and we got a chance to connect with the Indian Government. The team’s ability to identify, recognise and enable long term solutions for today’s problems of the country is exceptional!”

- Nithun KV, Woolly farms

AYUSHMAN BHARAT PMJAY STARTUP GRAND CHALLENGE

The National Health Authority (NHA) in partnership with Startup India launched the Ayushman Bharat PMJAY Startup Grand Challenge as a call to action for the Indian startup community to generate cutting-edge solutions for supporting the NHA towards more effective implementation of Ayushman Bharat Pradhan Mantri Jan Arogya Yojana (AB-PMJAY), and empowering 500 million people to gain access to affordable healthcare.

Monetary incentives of Rs. 2 Lac each were announced for the winning startups along with an opportunity to avail mentorship and facilitation for testing/ validation through relevant departments. The winners under the challenge are yet to be announced.

MONETARY INCENTIVE OF RS 2 LAC

EMPOWERING 500 MILLION PEOPLE

Calling India’s most innovative startups to solve for Ayushman Bharat PM-JAY

7 CHALLENGES - 7 SOLUTIONS

Top 7 Startups will get to work with Ayushman Bharat PM-JAY and make a difference in the lives of half a billion people.

Benefits: Cash Prizes | Piloting and Testing Opportunities | Industry Mentorship | Procurement | Funding support

Last date of registration: 30th November, 2019, 5PM

MNRE STARTUP GRAND CHALLENGE:

The Ministry of New and Renewable Energy (MNRE) launched a unique opportunity for startups and innovators to solve some key challenges being faced in the renewable energy sector in India. Launched in August 2019, the MNRE identified eight key problem statements encompassing innovative use of renewable energy for enhancing quality of life, mobility, and energy storages, offering energy solutions for regions with difficult terrain, etc.

Top three startups were to be provided funding support totalling upto Rs 22 lac. The results of the challenge are yet to be announced.

RS 22 LAC TOTAL TO THE WINNING STARTUP

ACCELERATE WITH NSG

The National Security Guard (NSG) along with Startup India sought solutions to help the counter-terrorism unit of NSG to take “countermeasures against a rogue autonomous drone including swarm of drones”. The applications were invited “to help solve the menace of terrorism” from startups belonging to sectors viz aerospace, defence, robotics, and security solutions till 13 April 2020, while the winners would be declared on 14 October 2020.

The three winning startups would receive a cash incentive of Rs 5 lac, Rs 3 lac, and Rs 2 lac each. Helping curb terrorism menace with the support of startups reflects the Government’s earlier emphasis on the significance of the country’s startups along with MSME base to help India achieve indigenisation and self-reliance in the defence sector.

CASH INCENTIVE OF RS 5 LAC, RS 3 LAC, AND RS 2 LAC

Help solve the menace of terrorism through

ACCELERATE WITH NSG

Nation Security Guard is looking for countermeasures against a rogue autonomous drone including swarm of drones.

The top 3 winners will be awarded cash prizes, an opportunity for paid pilot projects and mentorship.
The Startup India Single-Use Plastic International Grand Challenge was hosted by DPIIT on the Startup India Portal from 2 to 22 October 2019 inviting entries for three problem statements i.e., Discard of Single Use Plastic, Consumption of Single Use Plastic, and Production of Single Use Plastic, cumulatively receiving 68 applications.

Of the top 15 startups (five per problem statement selected after second round of evaluation), the top 6 startups were awarded first prize of Rs 3 lac and second prize of Rs 2 lac each based on their final scores under their respective problem statements. Six startups were incubated at the Amity Incubator, free of cost. A total impact of Rs 30 lac was made through the challenge to encourage sustainable startups.

**TEXTILE CHALLENGE**

The first edition of the challenge was aimed at finding replacement of plastics – both in single and multi-use category. The challenge was open to all individuals and startups across textile & apparel which have a minimum viable product or a PoC for the problem areas. Total six winners would be awarded with Rs 12 lac worth of prize money i.e. Rs 3 lac, Rs 2 lac and Rs 1 lac for 1st, 2nd and 3rd winner across each problem statement. The challenge was launched on 14 January 2020 and applications closed on 29 February 2020.
ANIMAL HUSBANDRY STARTUP GRAND CHALLENGE

The Department of Animal Husbandry and Dairying, in partnership with Startup India, launched the ‘Animal Husbandry Startup Grand Challenge’, to scout for innovative and commercially viable solutions to address the problems faced by the animal husbandry and dairy sector. The challenge was launched by Hon'ble Prime Minister, Shri Narendra Modi, on 11 September 2019 at a national animal disease control programme in Mathura.

The challenge was open to all startups with unique solutions for six problem statements that were identified under the categories of:

- Value added products
- Single use plastic alternatives
- Eliminating milk adulteration
- Breed improvement and animal nutrition
- E-commerce solutions
- Product traceability

Until 30 October 2019, 157 applications were received, pre-screened and shortlisted for the second round of evaluation conducted through video conferences. A total of 12 startups were then selected to receive cash grants, and incubation, along with masterclasses for all the finalists.

**Cash Grants:** Two winners under each problem statement were awarded with cash grants worth Rs 10 lac (Winner) and Rs 7 lac (Runner-up) each

**Mentorship:** Masterclasses are being organised for providing mentorship to startups and innovators

**Incubation Programmes:** A10 winners have been provided with incubation offers - the incubator is responsible for virtual incubation of these startups for up to three months, mentor matchmaking, lab facility for POC development, testing facilities, conducting business and investor workshops, and tracking the activities of the startups for up to nine months after the completion of the programme.
**SWACHH BHARAT GRAND CHALLENGE**

Startup India worked with the Ministry of Water and Sanitation to recognise startups spearheading novel innovations in the field of waste management, water management, air management, and sanitation. The Challenge was hosted on the Startup India website from 25 October to 10 November 2018, inviting startups to apply for the programme. 165 applications were received from 70 districts in 22 States, offering unique solutions from startups that had also filed for intellectual property rights.

Two startups under each sector of waste management, air management, water management, and sanitation, were awarded a cash grant of Rs 2 lac and Rs 1 lac 1st and 2nd prize respectively. The winners were also felicitated by Secretary, DPIIT with a certificate of award.

**RS 2,00,000 AND RS 1,00,000 AS 1ST AND 2ND PRIZE RESPECTIVELY**

“Thank You Startup India” for supporting our entrepreneurial journey”

“Setting up a startup at my prime age was a hard decision... more so, for setting up a Biotech Startup! However, with the support from a very cohesive and well-integrated startup ecosystem that has been built in India, we have successfully completed our PoC validation, technology scale-up, and all set to commercialise our products. During this journey, we have been awarded as winners of India-Israel Innovation Challenge, Integrate to Innovate, and Swachh Bharat Grand Challenge, and these achievements have put more vigour in us. Thank you Startup India... for supporting, guiding and motivating us in our entrepreneurial journey!!”

- Dr. Vanita Prasad, Founder & Director, REVY Environmental Solutions Pvt. Ltd.
Through this blog post, I wanted to share my story and the role of Startup India in supporting me in my entrepreneurship journey. When I first faced the facts, I couldn’t believe how something as innocuous as our garbage could be negatively connected to so many of my personal concerns. I wanted to stop being a part of the problem. I had to address my own trash problem first. My solution – live a lifestyle that best reflected the values I cared about. I had called myself an environmentalist for about six years at the time. I studied environmental planning, environmental policy, and environmental economics in college and graduate school, but I thought I needed to live a life more congruent to my environmental and social justice values. In my zero-waste journey, I realised we lived in a world with LANDFILL destined products. Toothbrushes for instance- 4.7 billion of them end in the landfill every year, take 200-700 years to start decomposing. So, every toothbrush you and I have ever produced is sitting on our planet somewhere! In response to this problem, I wanted to create a company that mirrored the values of zero waste, ethical consumption, and sustainability. I wanted to make it easy and accessible for other people looking to consume more mindfully, and to encourage others to produce less waste. Thus, Bare Necessities was born. At Bare Necessities, it’s not just about selling products. It’s about encouraging an earth friendly lifestyle. In the larger sense, BN seeks to change the narrative on waste in India. In the future, Bare Necessities seeks to become an interdisciplinary hub, a home for product designers to design products with a cradle to cradle philosophy, a place for policy analysts to work with local government on policy recommendations to manage our waste better, and to reduce our waste. A place for behaviour economics, ecologists, researchers and consumers alike to build the ecosystem towards a circular economy. In March 2020, I was fortunate enough to be a part of the CII-Startup India delegation to attend the India– Bhutan Startup Summit in Bhutan. I had the amazing opportunity to learn all about the gross happiness index from the PM of Bhutan himself, among senior leaders from the Chamber of Commerce and UNDP in Bhutan. I met amazing Bhutanese entrepreneurs, and got to travel and know some of my fellow Indian entrepreneurs. Additionally, I had the opportunity to attend SLUSH in Helsinki, Finland. SLUSH is a world famous startup event! A gathering of more than 20,000 change-makers, including thousands of startups and investors. One of my favourite sessions was talking about breaking taboos and building future companies for the next generation with Andrea Barrica, Valentina Milanova and Sophia Bendz! So grateful for this opportunity, thank you Startup India. Lastly, I wanted to share that Bare Necessities won the ‘Single-use Plastic Challenge’ organised by Startup India. Plastic pollution is something that has been often overlooked for many years. We are currently living in the largest global garbage crisis of our lifetime. I am extremely glad that there was a competition hosted around such an important issue. We additionally were invited to do a pitch with Amity University Incubation Lab. Startup India has helped facilitate a variety of competitions, national and international opportunities, and more. The most beneficial being: Through financial initiatives, Startup competitions such as (the Single-use Plastic Challenge), and International startup opportunities – Sahar Mansoor, Founder and CEO of Bare Necessities
One of the key objectives under the Startup India programme is to help connect the Indian startup ecosystem to global startup ecosystems through various engagement models. Startup India has launched bridges with over 10 countries that provide a soft-landing platform for startups from the partner nations and aid in promoting cross collaboration. The partnerships and collaborations with other startup ecosystems have also proven to be overarching propellants to India’s startup enthusiasm by fostering partnerships, knowledge exchanges, and fund support mechanisms.

The flagship event of the Finnish startup environment, Slush, is the largest venturing event in Europe. The unique event is organised annually in Helsinki to facilitate innovator and investor meetings so as to build a world-wide startup community. The philosophy behind Slush is to help the next generation of great, world-conquering companies develop further.

The Startup India team has participated in various annual events since 2018:

**The Slush 2018 event had over 20,000 visitors and prominent speakers including Werner Vogels, CTO of Amazon; Justin Rosenstein, Co-founder and Head of Product at Asana and Julia Hartz, CEO of Eventbrite.** It was stated that over 16,000 meetings took place in Slush 2018 event among the participants.

Startup India participated in the Slush Tech-Fest 2018 held in Helsinki Finland in December 2018. 26 DPIIT-recognised startups were provided a Startup Pass to attend the global festival and to showcase their innovation at the exhibition.

**Slush 2019 attracted over 25,000 attendees, including 3,500 startups and 2,000 investors, to Helsinki.** The stage programme showcased 200 speakers, including the legendary venture capitalist Michael Moritz and Stripe Co-founder John Collison. Startup India participated in the Slush Tech-Fest 2019 held in Helsinki Finland in November 2019. 25 startups were provided a Startup Pass to attend the Global Festival and to showcase their innovation at the event (India Pavilion). Additionally, an exposure visit was organised for startups to the Alto Startup Center where they learned about the Finnish startup ecosystem, how to succeed at Slush and had a networking lunch with the German delegation.
Two challenges have been hosted under the India–Russia collaboration:

**Startup India– MTS Innovation Challenge**: The objective of the MTS Innovation Challenge was to tap into a pool of technology-based Indian startups that had developed a product to solve major problems in sectors such as Fintech, HR Tech, Internet of Things, B2C Digital Products, and Soft/ SaaS for E-commerce. Launched in June 2019, applications were received and top four startups received a travel grant of up to Rs 2,16,400 for two months’ free acceleration at MTS, Moscow along with paid pilot opportunity with MTS Startup Hub.

Winners: MYOperator Services Private Limited; Shrofile Technologies Private Limited, Cool Crop Technologies Private Limited

**Startup India Kalyani EdTech Challenge**: Launched in September 2019, the challenge invited tech-enabled innovative solutions from both Indian & Russian startups in the education sector. The winning startup will be awarded a cash prize of USD 25,000 along with incubation support.

**INDO-DUTCH COLLABORATION**

**INDIA–NETHERLANDS COLLABORATION**: Prime Minister of Netherlands, Mark Rutte along with a delegation of CEOs visited India in May 2018. Hon’ble Minister for Foreign Trade & Development Cooperation, Netherlands, Ms. Sigrid Kaag along with Mayor of Bangalore, Mr. Sampath Raj launched the Indo-Dutch Startup Link portal. The Indo-Dutch #StartUpLink is developed for Indian and Dutch startups that are exploring each other’s markets and offers access to key information, relevant networks, and navigators for the respective startup ecosystems.

**India-Netherlands Tech Summit**: GITR #NLIndia Startup Nexus: India–Netherlands Tech Summit 2019 was held in New Delhi from 15-16 October 2019. The 25th edition of the iconic annual conference-cum-exposition was organised jointly by the Confederation of Indian Industry (CII) and the Department of Science & Technology (DST), Government of India. The summit focused on innovations related to water, agri/food and health. The pillar of ‘young entrepreneurship’ being a cross cutting theme of the summit, *get in the Ring #NLIndia Startup Nexus* organised in partnership with Get In The Ring, CII and the Netherlands, gave opportunity to Indian and Dutch startups to pitch their innovative solutions.

Indian as well as Dutch startups pitched in front of a jury at GITR NL India Startup Nexus They were divided into three categories (health, water/ key enabling technologies and agriculture), and the jury comprised of sector experts. At the finale, winners were announced – winning a ticket to the GITR Global Event in 2020.
UK – INDIA COLLABORATION

The UK - India Startup Launchpad was launched by DPIIT and the Department for International Development-UK (DFID) on 19th September 2019 at the TechXchange to foster deeper collaboration between two leading startup ecosystems – the UK and India. The Launchpad has been envisaged to bring together resources, connect participants, and encourage startups in both the countries to innovate and find solutions to some of the most pressing development challenges, and explore expansion opportunities, thus becoming a global force for driving mutual growth and prosperity.

UK’s commitment to Indian startups was announced in November 2016 through a joint statement between Prime Ministers of India and UK. DFID worked closely with DPIIT to design the programme, referred to as UK – India Fast-track Startup Fund (FSF). A MoU was signed between the Government of the United Kingdom of Great Britain and Northern Ireland through The Department for International Development (DFID) and Department of External Affairs.

INDIA – SWEDEN COLLABORATION

DPIIT had called for applications from startups belonging to the AI, VR, ML & gaming sector and a delegation of the top 10 startups was chosen belonging to the above-mentioned categories to represent India at the Festival held in Stockholm from 1st to 4th September 2018. The startups got a chance to interact with key stakeholders from the Swedish Startup ecosystem. Also, the startups were showcased at the India Pavilion which was the largest area at the fest that year. DPIIT had sponsored the delegation by providing them with Rs 1 lac Grant-in-Aid for covering their travel expenses.

Stockholm Tech Fest 2018

Photo: Indian delegates during Stockholm Tech Fest 2018
“The tech fest in itself was great but what set aside this trip for LocoBuzz were the amazing opportunities and experiences as we were being represented by Startup India-Invest India. The access we got to some key people both in Sweden and in India to discuss at length opportunities, challenges, and solutions was truly the highlight! We are already in discussions with at least three different companies for possible partnerships and business opportunities. The Startup India team also organised meeting with Dr Raghavan. It was truly inspiring to meet such a humble and remarkable person”
- LocoBuzz

“It was simply great to be on a platform like Startup India and participate in Stockholm Tech Fest. Direct interactions with Dr. Vijay Raghavan and Madam Shruti Singh. I could talk at length discuss the issue with Chinese product in-flux into the CCTV and how start up like PiOctave can make the difference. It’s an honour for PiOctave to be in company with Dr. Vijay Raghavan and Madam Shruti Singh.”
- PiOctave

“We connected with some great startups with whom we are now partnering. I learned valuable advice from the field visits and knowledge workshops.”
- Pure Paani

“It is important to understand mutual cultures to work in the right direction.”
- Oceo Water

“We’ve identified some of the best research, tech and business partners in Israel, all of who can benefit from strong actionable strategic partnership”
- Innnov4Sight Health & Biomedical Systems

“Indirectly helped us reach various markets in Karnataka and Gujarat.”
- Jagadeesh B Henjarappa

“Media visibility is one of the key features that this initiative has provided us with, there are various investors who contacted us for future funding rounds. The credibility from this platform also helped us to establish contacts with Government organisations like FCI.”
- Amber Warehouse Solutions

“We have founded an industrial design firm and a medical center whom we are currently communicating with to sign a preliminary agreement for product design and conducting clinical validation study respectively.”
- Bioscan Research
India Singapore Entrepreneurship Bridge is a digital platform to enable startups, investors, and aspiring entrepreneurs of both countries to connect with one another with focus on:

- Knowledge exchange
- Networking opportunities
- Capacity building

The India-Singapore Entrepreneurship Bridge (InSprenuer) was launched on 7th January 2018 at the ASEAN – India Pravasi Bharatiya Divas Conference by the then Hon’ble External Affairs Minister of India, Late Smt. Sushma Swaraj.

India-Korea Collaboration

The Hon’ble Prime Ministers of India and Korea launched the India – Korea Startup Hub at Seoul on 21 February 2019. The Hub was conceptualised as part of a joint statement signed between the Korea Trade-Investment Promotion Agency (KOTRA) and Invest India on 9 July 2018 to enable collaboration between startups, investors, incubators, and aspiring entrepreneurs of both countries and provide the requisite resources for market entry and global expansion.

Two challenges namely, SBI Startup Challenge and Mahindra Rural Healthcare Challenge have been conducted as a part of India-Korea collaboration.

STARTUP CHALLENGE

India invited applications from Indian and Korean startups under the Fintech and Healthcare sectors.
Startups were selected as the winners with cash prizes worth **RS 43.5 LAC** along with pilot opportunities.

### STARTUP CHALLENGE

#### RURAL HEALTHCARE CHALLENGE

- Grand challenge to identify innovative solutions for India's rural healthcare sector
- USD 10,000 prize money and pilot opportunity with Mahindra Partners

**Apply before 21st April 2019!**

India invited applications under the rural healthcare sectors – Primary care, Secondary/Tertiary care, Preventive care, Enablers, Integrated Business models.

The following is the breakup of applications basis problem statements:

<table>
<thead>
<tr>

Preventive Care | Integrated Business Model | Primary Care | Secondary/Tertiary Care | Enablers
India Israel Innovation challenge: This Challenge was launched by the Hon’ble Prime Ministers of India and Israel (July 2017), calling on Israeli and Indian startups to combine forces to develop solutions for critical problems in the field of agriculture, water, and healthcare.

18 startups were selected from the challenge and were awarded, as per the following:

- 6 Indian winners were granted Rs 5 lac each and 6 months free of cost incubation at T-Hub (Healthcare) & iCreate (Agri-tech, Water-tech)
- 12 Indian winners were given a grant of Rs 2 lac each

India Japan Collaboration

The Japan India Startup Hub was launched on 29 October 2018 by the Hon’ble Prime Ministers. A MoU was signed between Ministry of Economy, Trade and Industry of Japan, and Ministry of Commerce and Industry, Government of India.
As per this JDI, India and Germany are expected to promote cooperation in the field of startups through collaboration with Government agencies and facilitate cooperation with the private sector, on the basis of equality, mutual respect, and benefit, in accordance with their respectively applicable laws and regulations. The scope of cooperation may include but not be limited to the following areas:

- Actively supporting and facilitating market access for startups,
- Facilitating exchanges and supporting networking between startup ecosystems themselves and between traditional business environment with the aim of developing innovative business projects
- Jointly support programmes and activities that foster collaboration in the theme of innovation and technology entrepreneurship between India and Germany with a focus on startups.
- Creating an ‘India-German Startup Bridge’ through the domain www.startupindia.gov.in that will act as a dedicated micro-site for listing all recent updates, hosting programmes, reaching out to the startup communities of both sides and ensuring smooth execution of call for applications and other activities for startups between India and Germany.

**Tech4Future Grand Challenge:** As part of the activities of the Japan India Startup Hub, Invest India and SoftBank Group launched “Tech4Future”, a Grand Challenge to identify and support innovative startup enterprise in the fields of artificial intelligence, machine learning, face recognition, and cyber security for funding and potential incubation opportunity.

One startup was awarded **CASH PRIZE GRANT OF OVER RS 35 LAC**

**INDIA PORTUGAL COLLABORATION**

The India Portugal Startup Hub was launched by Prime Minister Antonia Costa and his Indian counterpart, Prime Minister Narendra Modi, in June 2017. The platform was designed to strengthen and foster connections between the startup ecosystems of the two countries. Earlier in 2017, the Portuguese Government announced in India the ‘Startup Visa’ programme during the India – Portugal Summit.

The ‘Startup Visa’ programme is a visa facilitation programme for Indian entrepreneurs, aimed at those who want to launch their startups in Portugal. For many, Portugal is seen as a gateway to the larger EU market. The MoU between Startup Portugal and Invest India was renewed on 14 February 2020 to further collaboration between startup ecosystems of the two countries. Additionally, a startup exchange programme between the two countries has been envisioned under this MoU.

**JOINT DECLARATION OF INTENT (JDI) WITH GERMANY**

To boost collaboration between the German and Indian startup ecosystems, a joint declaration of Intent was undertaken between Hon’ble Prime Minister Narendra Modi and the German Chancellor Angela Merkel on 1st November 2019. The underlying scope of this association was to strengthen and further expand the fruitful economic and startup cooperation that exists between India and Germany. In this context, enhanced cooperation and exchange of experience for innovative application of technologies and new business models in the field of startups was specifically envisaged.

As per this JDI, India and Germany are expected to promote cooperation in the field of startups through collaboration with Government agencies and facilitate cooperation with the private sector, on the basis of equality, mutual respect, and benefit, in accordance with their respectively applicable laws and regulations. The scope of cooperation may include but not be limited to the following areas:
I, Dr. Vanita Prasad, am the founder of REVY Environmental Solutions Pvt. Ltd. My research bent has always been in analysing challenges and looking for innovative solutions. However, due to lack of resources and funds, I kept my ideas on hold for a long time. Having learnt about Government of India schemes to support startups, I was motivated to embark on the journey of entrepreneurship.

During this journey, we got handholding support and recognition by Startup India. We were recognized as winners in the Indo Israel Innovation Challenge in the category of ‘Low energy and cost effective sustainable solutions for wastewater treatment’ organized by Startup India, this worked as a booster for our cause. We also got a chance to collaborate with Israeli companies and are currently working with them. Further in this journey, to fulfill the mission of Swachh Bharat, we also focussed on the treatment of Biodegradable waste, sewage, and industrial effluents contaminating the freshwater resources of India. This helped us win the ‘Swachh Bharat Grand Challenge’ under the aegis of the Swachh Pakhwada in Waste Management category organized by Startup India.

Further, with the support from a very cohesive and well-integrated startup ecosystem that has been built in India in line with the Government’s mission to promote entrepreneurship and innovation in the country, Invest India’s Integrate to Innovate (i2i) Programme helped us get connected with Exxon mobile. This unique collaboration supported us in addressing the growing need of treating produced water as and helped in commercializing our offering, improving its competitive positioning, and generating larger revenue.

Also, having DPIIT recognition and now access to a host of tax benefits, easier compliance, fast-tracking of IPR have indeed helped us grow and expand at a faster rate. Presently, we are scaling up our operation and reach within Gujarat and have plans to ramp it up further as national solution provider. Our vision is to strive for innovation and provide economically feasible, eco-friendly and sustainable solutions to our customers.

Thank You Startup India for supporting, guiding, and motivating us in our entrepreneurial journey!!

Dr. Vanita Prasad, Founder & Director, REVY Environmental Solutions Pvt. Ltd.
5. EMPOWERING THE STATES

5.1 STATE RANKING FRAMEWORK

Since 2016, DPIIT has taken various steps to support and encourage States in developing their startup ecosystems to further institutionalise and strengthen India’s culture of entrepreneurship. Under this endeavour, Startup India has aimed at creating a conducive environment for all startups, accelerating the revolution and inspiring entrepreneurs to support India in order to become a startup nation. Startup India, in nexus with DPIIT has worked relentlessly to build an ecosystem that promotes entrepreneurship at the startup level and has undertaken a number of initiatives to ensure that the startups get appropriate facilitation and support.

In the past four years, potential investors and policy leaders have acknowledged the strength of the Indian startup ecosystem which cumulatively comprises of over 28,000 startups. Thus, Startup India has propelled the ecosystem with key enablers for the growth of entrepreneurship wherein the number of startups have increased manifold.

The Startup India Initiative has laid immense emphasis on creating infrastructure for mentoring startups, to further create awareness and build an entrepreneurial environment in the country. Furthermore, government’s efforts to increase access to seed capital to startups has resulted in spawning a number of successful startups. These steps by the government to recognise the importance of startups have been lauded with efforts to obtain good utilisation of the money reserved for startup activities.

INTRODUCTION TO STATES’ STARTUP RANKING: CONCEPTUALISATION, ITS IMPORTANCE AND OBJECTIVES

The States’ Startup Ranking was conceptualised by DPIIT in April 2017, as an exercise to rank States and union territories (UTs) on the basis of policy measures being taken by them to promote their startup ecosystems. The core functioning of an enabling ecosystem in a State/UT is a function of the effective implementation of the framework and policies put in place. The States’ Startup Ranking Framework primarily aims to assess states and UTs on key areas of interventions that are pertinent to a healthy startup ecosystem.

The ranking exercise is aligned with the objective of the Startup India initiative that seeks to have a “Startup in each block and each zila in the country”. The key objective of the exercise is to encourage States and UTs to take proactive steps and has provided the required momentum to the startup initiatives by channelizing efforts through a guiding framework for States.

The framework is of utmost importance in achieving the following objectives, to:

- Help bring to fore progress made by the states/UTs for promoting startup ecosystem
- Foster competitiveness & propel the states/UTs to work proactively
- Facilitate states/UTs to identify, learn and replicate good practices
The intent of the ranking exercise is consultative and collaborative to ensure key learnings are documented. DPIIT further held extensive consultations from October - November 2017 with State Government officials, and ecosystem players, including startups, incubators, venture fund managers, and mentors among others, for the formulation of the first Ranking Framework. DPIIT, along with Startup India team explored good practices of leading startup ecosystems across the world to identify pillars and themes to serve as the foundation for the ranking framework. The State Startup Ranking Framework 2018 was launched by Shri Suresh Prabhu, Hon’ble Minister of Commerce & Industry, on 6 February 2018.

The launch of the ranking framework galvanized the states/ UTs into action, thereby giving impetus to the startup movement across the country.

**CHRONOLOGY OF EVENTS**

A number of key events and initiatives have helped many states initiate effective measures to support startups. These include events and activities, such as Ranking Awareness workshops in all states, knowledge workshops in leading incubators, pairing of states for intensive mentoring, international exposure visits to USA and Israel, and intensive engagement between the States with Startup India team, through video conferencing. Main events of the Ranking Exercise are given below:

- **RANKING AWARENESS WORKSHOPS IN ALL STATES**: Several capacity development workshops and meetings were organized to apprise States about the ranking portal functionalities and features. From February 2018 to March 2018, more than 30 such meetings were held. DPIIT appointed a team that ensured that the State government officials could understand the framework, submit responses with ease, and had a dedicated single point of contact (SPOC) to troubleshoot the problems of the state.

- **KNOWLEDGE WORKSHOPS IN LEADING INCUBATORS**: DPIIT organized knowledge exchange workshops for dissemination of good practices and mutual learning among three States. The workshops were conducted in Telangana, Gujarat, and Andhra Pradesh. These workshops offered an opportunity for the participating states to interact with each other, exchange best practices, interact with leading startups, investors, and incubators.

- **INTERNATIONAL EXPOSURE VISITS TO US AND ISRAEL**: To handhold and support States and UTs, selected representatives from States visited successful startup nations such as the United States of America (USA) and Israel to understand and learn key startup initiatives with intensive engagement between the States with Startup India team.

- **VIDEO CONFERENCING**: Video conferences helped in understanding the initiatives undertaken by States post the launch of ranking framework and to resolve any queries related to compliance with framework guidelines.

- **PAIRING OF STATES FOR INTENSIVE MENTORING**: Realizing the need for handholding and mutual learning, DPIIT took an initiative to pair States and UTs to facilitate mentoring. The key objective of pairing was to promote cross-learning and provide impetus to upcoming States for building their startup community.

The entire exercise was conducted to further the spirit of cooperative federalism and capacitate the states as per the following events.
FEEDBACK AND EVALUATION PROCESS

For the purpose of evaluation, implementation of action points and feedback from startup ecosystem components had been given due weightage. As part of ranking methodology, for each action point where feedback is to be collected; minimum 30 beneficiaries were selected on random basis from the entire pool of beneficiaries. If the total pool comprised of less than 30 beneficiaries, all were selected. Feedback was sought from startups recognised under Startup India and other relevant ecosystem components registered under Startup India Hub. The feedback was collected by the call center under the Startup India Hub Team.

The approach towards the States’ Startup Ranking Framework is based on the feedback collected from startup ecosystem stakeholders, which includes startups, mentors, investors, accelerators, incubators, and government bodies.

The pillars of the Ranking Framework covered parameters such as startup policy and implementation, incubation support, seed funding support, venture funding support, simplified regulations, easing public procurement and awareness and outreach.

DPIIT consulted all stakeholders of the startup ecosystem wherein the ‘States’ Startup Ranking Framework’ was developed across SEVEN AREAS OF INTERVENTION WITH A TOTAL OF 38 ACTION POINTS AND AN OVERALL SCORE OF 100 MARKS.

The evaluation of States involved assessing supporting documents for each action point and collecting feedback from the Startup beneficiaries on 17 action points out of 38 action points to understand their point of view. The methodology ensured fair and objective assessment of States’ efforts. A total of 27 states and 3 UTs participated in the exercise. An evaluation committee comprising independent experts from the startup ecosystem assessed the responses across various parameters. Many parameters involved getting feedback from beneficiaries.

A team of call centre professionals collected feedback survey responses from the 18 states in nine different languages including English, Hindi, Bengali, Kannada, Punjabi, Odiya, Tamil, Telugu and Malayalam; to connect with beneficiaries to get a real pulse at the implementation levels.

3,200 SUCCESSFUL CALLS WERE MADE FROM A TOTAL OF 42,000 CALLS.

88% of the respondents using online system for registering startups were highly satisfied with the systems

While 82.97% of the respondents using online system to avail benefits were satisfied by the performance of such systems.

Thus, based on approved supporting documents and data from feedback exercise, all the participating States were grouped on the basis of merit. A percentile score assigned to each State indicates how well a State has performed in comparison to others.
Six grading categories were formed defining the range of state's percentile rank. The grading categories are:

<table>
<thead>
<tr>
<th>Category</th>
<th>Range</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>BEST PERFORMER:</strong></td>
<td>100 PERCENTILE</td>
</tr>
<tr>
<td><strong>TOP PERFORMERS:</strong></td>
<td>MORE THAN 85 TO LESS THAN 100 PERCENTILE</td>
</tr>
<tr>
<td><strong>LEADERS:</strong></td>
<td>MORE THAN OR EQUAL TO 70 PERCENTILE TO LESS THAN OR EQUAL TO 85 PERCENTILE</td>
</tr>
<tr>
<td><strong>ASPIRING LEADERS:</strong></td>
<td>MORE THAN 50 PERCENTILE TO LESS THAN 70 PERCENTILE</td>
</tr>
<tr>
<td><strong>EMERGING STATES:</strong></td>
<td>MORE THAN 25 PERCENTILE TO LESS THAN OR EQUAL TO 50 PERCENTILE</td>
</tr>
<tr>
<td><strong>BEGINNERS:</strong></td>
<td>LESS THAN OR EQUAL TO 25 PERCENTILE</td>
</tr>
</tbody>
</table>

**RESULTS**

Results of the Ranking Exercise were announced by DPIIT on 20 December 2018 at a special event organized at Pravasi Bhartiya Kendra, New Delhi.

*Gujarat* was rated the ‘BEST-PERFORMING STATE’ for the year.

*Karnataka, Kerala, Odisha, and Rajasthan* were judged as ‘TOP PERFORMERS’.

*Andhra Pradesh, Bihar, Chhattisgarh, Madhya Pradesh and Telangana* were ranked as ‘LEADERS’.

States identified as ‘ASPIRING LEADERS’ were Haryana, Himachal Pradesh, Jharkhand, Uttar Pradesh, and West Bengal.

*Assam, Delhi, Goa, Jammu & Kashmir, Maharashtra, Punjab, Tamil Nadu, Uttarakhand* were considered to be ‘EMERGING STATES’.

*Chandigarh, Manipur, Mizoram, Nagaland, Puducherry, Sikkim, and Tripura* were recognised as ‘BEGINNERS’.
The Startup Ranking Framework 2018 was a huge success for the startup ecosystem of India. To acknowledge the evolving needs of a dynamic ecosystem, learnings and feedback from previous years’ ranking exercises have also been incorporated in this year’s framework. To further develop the startup ecosystem in the country, the States’ Startup Ranking 2019 has given impetus to the vision of India becoming a startup nation.

STAKEHOLDER DISCUSSION WORKSHOP
As a part of State Ranking Framework 2019, DPIIT discussed key learnings from the ranking exercise conducted in 2018. Consultation Workshop was organized in Bangalore with the States and UTs in order to understand the current state of their startup ecosystems, collect feedback on the draft framework and thus come up with a conducive framework for the 2019 Ranking Exercise.

LAUNCH OF THE FRAMEWORK
The second edition of the State Ranking Framework on startup initiatives was launched on February 18, 2019. The framework aims to evaluate States/UTs in a balanced and transparent manner and has thus made documentary evidence of compliance on action points by the State/UT Government a pre-requisite for collection of feedback. Scoring has been done on the basis of the feedback received. The consideration period (the period in which compliance on action points will be considered for the evaluation process) for the 2019 ranking exercise is made from 1st May to 30th September 2019. Under the framework, all 30 action points require submission of supporting document(s).

The second edition of States’ Startup Ranking saw participation from 22 States and 3 Union Territories. The framework measures States and UTs on 30 Action Points across seven pillars and rates the overall efforts by states on a scale of 0 to 100. The seven diverse pillars of the ranking framework cover parameters such as Institutional Support, Simplifying Regulations, Ease in Public Procurement, Incubation Support, Seed Funding support, Venture Funding support, and Awareness and Outreach.
CHRONOLOGY OF EVENTS

SENSITIZATION WORKSHOPS
A dedicated team from DPIIT visited States to meet with the designated officials of the State Startup policy team. The objective was to introduce the Startup India initiative, the States’ Startup Ranking Framework, 30 action points, and assessment methodology.

REGIONAL KNOWLEDGE EXCHANGE WORKSHOPS
As a capacity development exercise for the states, DPIIT organised Knowledge Exchange Workshops for the dissemination of good practices and mutual learning among States and UTs. These workshops provided startups an opportunity to learn from peers across regions giving them a larger exposure of different cultures and their thinking.

FIRST REGIONAL KNOWLEDGE EXCHANGE PROGRAMMES: RAJASTHAN – JULY 2019
The first knowledge sharing workshop was conducted on 29 & 30 July 2019 in Jaipur and saw participation from seven States & UTs viz. Punjab, Delhi, Uttar Pradesh, Madhya Pradesh, Haryana, Kerala, Jammu & Kashmir.

The workshop comprised of panel discussions on the Rajasthan startup ecosystem, future of innovation, innovation funding and procurement challenges, Agri- innovation, governance and smart solutions, and Command Center was organised for all the officials from State governments to discuss ideas on developing a vibrant and creative infrastructure for innovators.

Over the two days, the workshop offered the representatives from different States an opportunity to interact, brainstorm and exchange best practices for more effective formulation and implementation of policies within their jurisdiction.

SECOND REGIONAL KNOWLEDGE EXCHANGE PROGRAMMES: MAHARASHTRA – AUGUST 2019
The second Regional Knowledge Exchange Workshop was conducted in Mumbai from 5 to 6 August 2019 and with a total participation from 10 States & UTs viz Andhra Pradesh, Gujarat, Karnataka, Mizoram, Tamil Nadu, Telangana, Uttarakhand, Rajasthan, Dadra & Nagar Haveli, Daman & Diu. Maharashtra State Innovation Society (MSInS) presented Maharashtra’s Startup Pillars & Best Practices for the participating States, explaining the journey of building an innovative and entrepreneurial culture in the State.

Open discussions were organised around Startup Policy of States, implementation & the challenges involved. As part of the workshop, several Maharashtra-based Startups also showcased their ideas and products. Panel discussions included the role of government in the startup space from the viewpoint of VCs, Debt & Investors.

The State officials visited the Society for Innovation and Entrepreneurship (SINE), an umbrella organisation at IIT Bombay for fostering entrepreneurship and nurturing tech start-ups. Field visits to BETiC, Biomedical Engineering and Technology (Incubation) Center, IIT Bombay and Riidl – Research Innovation Incubation Design Labs were also conducted.

16. iStart Rajasthan is the flagship programmes by the Department of Information Technology & Communication, Government of Rajasthan to foster innovation, create jobs and facilitate investment in the State. The State representatives were given a tour of the incubation space where they interacted with the current cohort of startups at iNest.
17. Bhamashah Techno Hub is spread across 1000 SFt and has seating for 700 startups. At Bhamashah, the State Officials got a chance to tour the digital museum and a tinkering lab for development of products, experience adaptive learning through Augmented Reality, Virtual Reality and 5D technologies, computational thinking, lending a major fillip to entrepreneurial ecosystem in Rajasthan.
The third workshop was conducted in Kochi from 20 to 21 August 2019 and with participation from 12 States & UTs viz Maharashtra, Bihar, Arunachal Pradesh, Andaman & Nicobar Islands, Assam, Puducherry, Jharkhand, Madhya Pradesh, Nagaland, Odisha, Karnataka and Chhattisgarh. Two panel discussions each day of the workshop were conducted with important ecosystem builders and Government organisations on subjects around funding support, procurement, incubation & growth acceleration. The State officials visited the Integrated Startup Complex, BioNest and InQ Co-Working Space.

Kerala Startup Mission, the state nodal agency for supporting startups has developed the Technology Innovation Zone (TIZ), a 13 acre startup campus where multiple sector incubators and accelerators come together with Industry participation. Startups under TIZ have more than 30 patent applications and is one of the best hardware incubators in the country named Maker Village that is supported by MeitY (Ministry of Electronics and Information Technology). The States interacted with the startups at the Innovation Zone and understood their respective journeys from ideation to the market stage. Participants also explored areas of collaboration to leverage mutual strengths and knowledge for effective policy initiatives. The workshops proved to be pivotal in creating added impact and value through mutual cooperation of central and State agencies.
INTERNATIONAL EXPOSURE VISITS

STATES’ EXPOSURE VISIT: USA
The USA being the best and the most progressive Startup ecosystem of the world, offer’s huge opportunities for learning the best practices to support entrepreneurship in the states. 10 States & UTs (Odisha, Assam, Bihar, Chandigarh, Jharkhand, Punjab, Uttarakhand, Jammu & Kashmir, Puducherry, Goa) were selected for the exposure visit. From each of the above states, bureaucrats from all states, also in charge of startups were nominated. The total delegation size was 20 state officials.

The visit was planned across two locations viz. San Francisco, California & Seattle, Washington wherein delegates had interactive sessions with prominent firms and startups such as CISCO, Google Cloud, Facebook, Silicon Valley Bank, Boeing, Microsoft and Amazon.

The visiting State officials appreciated the efforts of DPIIT and the Startup India team in organising the visit. The impact of the visit can be gauged by the fact that many of the states (individually) started follow-up discussions with stakeholders such as TiE Silicon Valley in building their local ecosystems.
SECON D STATES’ EXPOSURE VISIT: GERM A N Y

Germany has developed one of the leading startup ecosystems in the world, especially known for its technology and manufacturing prowess. The German government’s support for their local startup ecosystem has proved impactful and provides great learning opportunities for understanding and replicating best practices to support entrepreneurship in Indian states.

Seven out of 10 nominated states by DPIIT were eligible for the Ecosystem Exposure Visit to Germany 2020 – Andaman & Nicobar, Haryana, Uttar Pradesh, Delhi, Madhya Pradesh, Himachal Pradesh, and Uttarakhand.

The visit was planned across three locations – Berlin, Dusseldorf, and Frankfurt conducted knowledge exchange and on-site tours. Some of the prominent public and private organisations covered under the visit were Berlin Senate, MotionLab, Bitcom, Volkswagen, Vodafone, Startplatz, Innoplexus, Deutsche Bank, etc.

“Thanks to DPIIT and Invest India team for organising excellent exposure and study visit. It was truly enriching and educating Visit and it will definitely help us to develop an enabling startup ecosystem in the states”

- Dr KK Dwivedi, Industries Commissioner, Industries & Commerce Department, Government of Assam

“I take this opportunity to thank DPIIT for organising the visit to US. Exposure to the best startup ecosystem in the world will go a long way in helping us frame policies in our states.”

- Manisha Panwar, Principal Secretary, Industries Department, Government of Uttarakhand

FEEDBACK AND EVALUATION PROCESS

For the purposes of evaluation, all states and UTs had been divided into two categories – Category X and Category Y. Category X entailed states with a well-established startup ecosystem. Category Y included all UTs, except Delhi, and all states in North East India, except Assam.

The State/UT Startup Ranking Exercise required states and UTs to share supporting documents under each action point, these documents serve as evidence for the progress under the concerned action points. Some of the documents include state policies, amendments, a list of startups, acknowledge letters, proof of fund release, and event reports.

Post the submission, process Startup India Team conducted an interim assessment to ensure that the documents submitted by the states adhered to the norms and guidelines of the framework. This is a crucial step as it ensures that all submitted documents are complete, accurate, and valid.

Dedicated Evaluation Committees (EC) were appointed to analyse these documentary evidences from the states. These committees comprised of independent experts from the startup ecosystem to assess each pillar of the ranking framework. The members were a mix of experts from the Government and private organisations.

A parallel exercise of feedback collection was conducted by an external agency appointed by DPIIT. Out of the total of 30 Action Points, 25 Action points were selected to collect feedback from the direct beneficiaries. The feedback collection mechanism was driven through an online system to ensure transparency in the feedback exercise.

States’ responses were evaluated for both supporting documents and feedback components. Based on approved supporting documents and data from the feedback exercise, all the participating states were grouped based on merit. The entire exercise took two rounds of assessment and 14 EC meetings to finally arrive at a conclusion.
After the successful completion of a rigorous evaluation process, Shri Piyush Goyal, Hon’ble Minister of Railways and Commerce & Industry, announced the results of the 2nd edition of States’ Startup Ranking on 11 September 2020, at an event held at the National Media Centre, New Delhi.

Gujarat was rated the ‘Best Performer’ in Category X. Karnataka and Kerala were judged as ‘Top Performers’ and four states, Maharashtra, Odisha, Rajasthan and Bihar, were ranked as ‘Leaders’. Five States identified as ‘Aspiring Leaders’ were Telangana, Uttarakhand, Haryana, Jharkhand and Punjab. Emerging Startup Ecosystems consisted of Chhattisgarh, Himachal Pradesh, Andhra Pradesh, Tamil Nadu, Madhya Pradesh, Uttar Pradesh, Assam, and Delhi.

Under Category Y, Andaman and Nicobar was rated as the ‘Best Performer’ followed by Chandigarh as the Leader. The state of Nagaland was rated ‘Aspiring Leader’ whereas Mizoram and Sikkim were identified as emerging startup ecosystem.

IMPACT OF SRF 2019

Results of the exercise reveal painstaking efforts by all participating States to support startups. A total of 29 States and UTs now have Startup Policies in place. 23 States have a dedicated Nodal officer and a dedicated team for startups. More than 19 States offer special incentives to Startups founded by women entrepreneurs. A total of 37 amendments have been made by States in various rules, regulation or Acts for supporting Startups. More than 300 incubators have been upgraded by State governments’ support across the country. And now, we have at least one startup recognized from each of the 28 States and 8 Union Territories! These outcomes have made the Ranking exercise a valuable instrument in directing efforts of States into meaningful directions.

With stimulated investments, developed Intellectual property rights, strong mentor networks, preferences in public procurement, subsidised incubation support and above all the introduced regulatory support have been some significant contributions towards developing State’s Startup ecosystem.

Overall, States’ Startup Ranking 2019 has pushed the growth of the Startups’ business aggressively while increasing its capacity to grow in a sustainable manner.
## 5.2 States’ Startups Policies

### Kerala
**Highlights**
The policy balances both fiscal and non-fiscal incentives such as establishing at least 10 incubators or accelerators, developing one million sq. ft. of incubation space, venture capital funding of minimum Rs 2000 crore, etc.

**Startup India’s Support**
- Facilitated cross-subject learnings among the States. Kerala shared its practises in procurement
- Conducted Regional Knowledge Workshop for sharing best practises of the ecosystem among the States.
- Support in terms of outreach for their startup focussed events

### Gujarat
**Highlights**
Gujarat was among the first few States to have announced a Startup and Innovation Policy in 2015

**Startup India’s Support**
- Vibrant Gujarat Startup Summit 2019 was conducted to sensitize ecosystem enablers
- Advisory on incorporating best practises within startup ecosystem
- Conducted Startup India meetup in Ahmedabad

### Telangana
**Highlights**
The State of Telangana is known for T-Hub, a unique public private partnership between Government of Telangana, three academic institutions (IIIT Hyderabad, ISB and NALSAR) and key private sector leaders. It is the largest and the fastest growing technology Incubator in India

**Startup India’s Support**
- Collaboration during World Design Assembly (59th Edition)
- Support in terms of outreach for their startup focussed events

### Jharkhand
**Highlights**
The policy provides financial support of Rs 10 lac to startups for development of prototype at seed stage

**Startup India’s Support**
- Advisory on incorporating best practises within startup ecosystem
- Conducted mentorship workshop for startups in the region

### Odisha
**Highlights**
The State provides a one-time grant of 50% of capital cost up to max. Rs 1 crore and performance grant of Rs 5 lac for each successful startup created or supported

**Startup India’s Support**
- Assistance in formulation of State’s startup policy
- Assistance in conceptualising district level infrastructure support for startups and structuring the proposed Odisha startup funds

### Madhya Pradesh
**Highlights**
The State has leveraged a network of over 100 researchers, professors, and other academicians, to be a part of the State mentor network

**Startup India’s Support**
- Assistance in sharing the seed fund models available across various Governments.
- Conducted a startup investor facilitation session in the State
- Advisory on incorporating best practises of various pillars of a State startup ecosystem

### Uttar Pradesh
**Highlights**
The State has supported 5 Incubators in the following locations: IIM Lucknow, IIT BHU, IIS Hubs, Kamla Nehru Institute of Technology Sultanpur, and IT Upvan

**Startup India’s Support**
- Advisory on incorporating best practises within startup ecosystem
BIHAR
HIGHLIGHTS
As part of its policy, it provides reimbursement for incubating a startup, up to Rs 2 Lac per incubatee to Government recognised private and State supported incubators.

STARTUP INDIA’S SUPPORT
• Advisory on incorporating best practises within startup ecosystem

ASSAM
HIGHLIGHTS
Assam’s startup policy envisions to facilitate at-least 1000 new startups across all sectors over the next five years and attract funding opportunities of Rs 1840 crore (USD 250 million) for State based startups and incubators.

STARTUP INDIA’S SUPPORT
• Assistance in formulating their startup Policy & operating guidelines
• Drafted the RFP for Assam Incubation Hub (A-Hub)
• Conducted Startup India meetup in Guwahati

PUNJAB
HIGHLIGHTS
Punjab has formed strategic alliances with diverse organisations to foster innovation and startup growth such as STPI (Mohali), State Department of Industries & Commerce, ISB, and Punjab Technical University for setting up Startup Punjab Hub.

STARTUP INDIA’S SUPPORT
• Advisory on incorporating best practises within startup ecosystem and structuring of a startup cell in Punjab
• Outreach support to State for startup focused events

HARYANA
HIGHLIGHTS
State provides 50% rental subsidy to women entrepreneurs at State supported Incubators

STARTUP INDIA’S SUPPORT
• Corporate services connect for startups within Haryana

JAMMU & KASHMIR
HIGHLIGHTS
More than 2000 State Startups have benefited from Seed Capital Fund Scheme

STARTUP INDIA’S SUPPORT
• Assistance in formulation of State’s startup policy & operating guidelines
• Assistance in policy implementation
• Conducted Startup focussed sensitisation workshop and virtual mentorship session for startups

MAHARASHTRA
HIGHLIGHTS
The policy envisions to transform Maharashtra by catalysing the growth of an innovation driven entrepreneurial ecosystem to achieve wholesome and inclusive socio-economic development.

STARTUP INDIA’S SUPPORT
• Advisory on incorporating best practises within startup ecosystem
• Provided assistance in aligning State’s startup recognition system to Startup India’s
• Conducted Regional Knowledge Workshop for sharing best practises of the ecosystem among the states.
• Support in outreach events for State’s startups

JAMMU & KASHMIR
HIGHLIGHTS
More than 2000 State Startups have benefited from Seed Capital Fund Scheme

STARTUP INDIA’S SUPPORT
• Assistance in formulation of State’s startup policy & operating guidelines
• Assistance in policy implementation
• Conducted Startup focussed sensitisation workshop and virtual mentorship session for startups

UTTARAKHAND
HIGHLIGHTS
The policy aims to facilitate and nurture the growth of at least 500 new startups in Uttarakhand

STARTUP INDIA’S SUPPORT
• Assisted in formulating their startup policy

ANDAMAN & NICOBAR ISLANDS
HIGHLIGHTS
The UT aims to provide a startup growth grant of upto three lac rupees to startups

STARTUP INDIA’S SUPPORT
• Drafted their startup policy & operating guidelines
• Assisted the UT in implementing their policy and launching their startup website
• Conducted ideation workshop for startups in the UT

TAMIL NADU
HIGHLIGHTS
The State targets to create one lac high skilled job creation, direct and indirect, in the startup ecosystem by 2023.

STARTUP INDIA’S SUPPORT
• Assisted the State in structuring their proposed startup funds
• Advisory on incorporating best practises within startup ecosystem
• Support in terms of outreach for their startup focussed events
Handholding the UTs: Government of Andaman & Nicobar Islands’ initiative for supporting startups

Andaman and Nicobar Islands are widely known for beautiful beaches, ethnocentric tribes, and tropical forests. However, less known are the endeavours of the union territory in hosting a startup policy. On 30 December 2018, Hon’ble Prime Minister Shri Narendra Modi launched the Innovation and Startup policy for Andaman & Nicobar (A&N) Islands, making it the first union territory to have a dedicated policy for startups.

Startup India team helped Andaman & Nicobar in drafting the startup policy and the operating guidelines to implement the policy and creating a website for the startup ecosystem. Such efforts have led to an increase in the spirit of entrepreneurship and the number of startups in the union territory.

The Andaman & Nicobar Administration, along with Startup India team organised a one-day startup workshop at Port Blair on July 5, 2019. The workshop was attended by more than 150 STARTUPS, students and entrepreneurs. Secretary Industries, Andaman & Nicobar Islands, Shri Indu Shekhar Mishra, launched the startup website for the startups of the Union Territory as a step to operationalize their startup policy. This website enables local startups to apply and gain the benefits offered under the scheme. Startup India conducted a session in the workshop to sensitize the audience about the benefits offered by the Central Government.

Startup India team helped in conducting hackathons for students and entrepreneurs of the Union Territory. The team also formulated the operating guidelines for effective implementation of the A&N Innovation & Startup Policy.

19. SCAMPER is an acronym formed from the abbreviation of: Substitute, Combine, Adapt, Modify, put to another use, Eliminate, and Reverse. It is a lateral thinking technique which challenges the status quo and helps you explore new possibilities
Startup India team conducted a one-day capacity building and mentorship workshop in Jammu on 6th September 2019, aiming to disseminate information about Startup India and the State’s startup policy and sensitize Chartered Accountants and Company Secretaries about compliances and regulations relevant to startups. More than 230 startups, students, entrepreneurs, and professionals from all parts of Jammu, Kashmir, and Ladakh attended the event that highlighted themes around creating a vibrant ecosystem for startups, procuring for innovation, and providing infrastructure support.

Startup India team also organised a panel discussion between various ecosystem players on the Jammu and Kashmir startup policy and ecosystem.
Since its launch, STARTUP INDIA YATRA has covered 224 DISTRICTS across 23 states.

In 3 years:
- 1.05 crore Cash Prizes distributed
- 78,346 individual outreach

Sensitising regional STARTUP ecosystems:
- 145 Bootcamps conducted
- 315 Van stops
- 441 Institutes covered
- 1424 Incubation offers

As part of awareness and outreach efforts of Startup India, the Yatra initiative was launched in 2017 to scout for potential startup ideas, spread awareness on the growing Indian startup ecosystem, and the related incentives. The “Startup India Yatra” initiative was also launched with an aim to identify grassroot level entrepreneurs in tier 2 & 3 cities of India.

This initiative provided aspiring entrepreneurs a mechanism to develop upon their ideas through incubation at selective facilities. It was conducted through a collaboration between DPIIT and State departments. The mission was to create awareness about the Indian Startup ecosystem & provide mentorship to budding entrepreneurs, provide incubation offers to the best talent within Tier 2/3 districts of the States, and provide other incentives from the resource partners of Startup India such as legal consultation, advisory services, mentorship, cash prizes, etc.

The Yatra initiative also conducted knowledge and activity based sessions wherein startup enthusiasts were imparted deeper understanding of the culture of entrepreneurship, emerging technologies, and processes involved in stagewise development of a startup.

As a part of this initiative the ‘Startup India Mobile Van’ was launched that travelled throughout participating States to record ideas during the workshops. The ideas selected were further evaluated and rewarded to mentor the Next Gen Entrepreneurs of India.

The ideas shortlisted from these bootcamps were further eligible to attend a two-day acceleration programme to develop their potential from validation of products/offerings to developing lucrative marketing pitches.

The initiative identified numerous innovative ideas from entrepreneurs chiefly in the following sectors:

- Technology
- Social Sector
- Agriculture
- Sustainability

21. SCAMPER is an acronym formed from the abbreviation of: Substitute, Combine, Adapt, Modify, put to another use, Eliminate, and Reverse. It is a lateral thinking technique which challenges the status quo and helps you explore new possibilities.
22. Shrofile is a unique video based platform that gives a snapshot into every professional’s personality, passion and preferences.
The Yatra Van covered **OVER 220 DISTRICTS IN 23 STATES** wherein **OVER 300 VAN STOPS AND 145 BOOTCamps** were noted in coordination with various State Government & educational institutes offering participation in the events. The events were received enthusiastically by **OVER 78,000 ASPIRING ENTREPRENEURS AND 1,424 INCUBATION OFFERS** were provided to budding ideas, and cash grants disbursed **RS. 105.73 LAC.**
**4 YEARS ACHIEVEMENT REPORT**

- Total no. of Districts covered: **224**
- Total no. of Institutes Covered: **460**
- Boot camps: **145**
- Van Stops: **315**
- Total Registrations: **37,688**
- Social Impact: **86,716**
- Cash Prize (Lac): **105.73**
As a pilot, Startup India Yatra was conducted in Gujarat. The programme, carrying the vision of Startup India Yatra has envisaged selection of 50 best ideas/startups for the grand finale in Ahmedabad. The shortlisted entrepreneurs pitched at IIM-A and 20+ ideas were provided incubation offers based on the business validation criteria. A one- day acceleration programme and webinar was organised for the shortlisted entrepreneurs before the grand finale to prepare them on marketing techniques.

**22 INCUBATION OFFERS** from MICA, IGNITE and LEAF incubators were offered in **4 BOOT CAMPS** conducted across the state. Selected startups were provided platform to pitch to a wider audience at IIM Ahmedabad with Startup India Certificates been offered to all finalists.

Within a span of one month from July-August 2017, 5 events comprising of **4 BOOT CAMPS WERE ORGANISED IN 5 UNIVERSITIES** viz. IIM Ahmedabad, Birla Vishwakarma Mahavidyalaya Engineering College (Anand), Sardar Vallabhbhai Patel Institute of Technology (Vasad), Ganpat University (Mehsana) and Narmarayan Shastri Institute of Technology (Jetalpur).

The bootcamps noted **OVER 1500 ATTENDEES OFFERING 150+ DIVERSE PITCHES WHEREIN 60 IDEAS** were shortlisted for further evaluation by Startup India team.
“We had a fantastic experience working with Startup India team especially with the core members of the team during the Himachal Leg of Startup India Yatra. They made the process seamless; everything was delivered more than our expectations. Facing hardships at a place like Himachal was never mentioned by the team members. Almost every individual in the team motivated innovators to show new ideas & technologies to develop a healthy innovation environment. A special thanks to Government of India for providing this kind of a platform to execute it at the grass root level to grow the innocent people of the State who are unaware of concept of innovation / Startups.”

- Ms. Deepika Khatri, Govt of HP

“First, let me express my gratitude to the Startup India team and DPIIT for organizing a month-long Startup India Jammu & Kashmir Yatra in the State. Though, we had to do some last-minute changes, it was at the end managed well by the execution partners of the Yatra. We started off on 27th September from the Jammu Campus of our Institute (JKEDI) and finally the Yatra culminated at Srinagar Campus of the Institute. The two-day accelerator programme which was done with the 79 selected ideas was one of the main highlights of the programme. Worth mentioning, the programme started shortly after the Start-up policy was issued by the State Government on 13th September 2018 and was successful in giving the required push to the policy at very early stages of its implementation”

- Mr Irtif M Lone, Incubation and Business Modelling, J&K Entrepreneurship Development Institute

“Startup India Yatra is a great initiative by the Government of India in reaching out to the core of the country, where there was no exposure for ground level innovators to get access to the world of business. We are really thankful to the Minister of Commerce and Industry, Mr. Suresh Prabhu and “Startup India Yatra”, which allowed us to participate in the event at Sambalpur, Odisha. This gave us all the support and strength to convert our idea and concept to build a business around it – with its series of mentoring sessions by Startup India team and connecting us with the right set of networking base. Out of three verticals, which we thought of initially, today we have solutions developed for two verticals which are being deployed at customer sites and going through BETA. The third vertical is under development and we are confident that being connected with Startup India we are going to be successful here as well.

Our Mission is to be known as the most stable and reliable solution provider for any kind of digital transformation using IOT enablement solution that leverages MarvellMist “Unified HUB at the edge” & “Application and Data Platform from hosted cloud” along with MarvellMist certified smart devices & sensors. And we are really thankful to “Startup India Yatra”, to make our dream successful in this journey with all its support.”

- Guru, Carin, Pradeep, and Manas from MarvellMist

“On behalf of Government of Assam and Assam Startup team, we express our gratefulness for the Yatra organised by Startup India Team. Timing of the Yatra was very appropriate as the Yatra was flagged off by Hon’ble CM of Assam on the day of inauguration of the Assam Startup hub- the Nest. It was widely publicised by both Startup India Yatra team and Assam Startup team in the state and all stakeholders including education Institutions were sensitised specially at district level. Cash Prizes were also given by Government of Assam to the best start up ideas in the contest organized by Startup India Yatra Team. We wish all success to the Startup India team”

- Additional Secretary, Industries & Commerce Department & MD AIIDC, Nodal officer, Assam Startup Government of Assam
“The Yatra helped us to reach out to aspiring entrepreneurs and students with bright ideas across the State and gave them a platform to present their ideas. With more than 10000 attendees, 3000 registrations, 523 ideas pitched, 118 shortlisted ideas and 15 idea winners, the Yatra was a tremendous success. We look forward to more such joint initiatives with Startup India team.”

-Mrs. Ashooneet Kaur, Punjab Infotech Executive Director, Government of Punjab

“The Startup India Mizoram Yatra happened at a time when the State was moving full swing in creating and facilitating a vibrant entrepreneurial and startup eco-system in Mizoram which commenced not long ago in 2017 with the launch of the State’s comprehensive Entrepreneurship Development Scheme (EDS). The Mizoram leg of the Startup India Yatra helped boost the nascent entrepreneurial ecosystem building initiative undertaken by the Department. The Startup India team and Yatra team were a delight to work with. We did not fail to notice that the Startup Teams did their best to avoid burdening the State Government and to manage the logistics of the Yatra themselves, even perhaps to their own detriment. Kudos to them. Despite the unfriendly terrain, the unpredictable weather and cultural peculiarities of the land, the Startup India Mizoram Yatra was successfully completed in a manner that benefitted the greatest possible number of people. The Startup India Mizoram Yatra happened at a time when the State was moving full swing in creating and facilitating a vibrant entrepreneurial and startup eco-system in Mizoram which commenced not long ago in 2017 with the launch of the State’s comprehensive Entrepreneurship Development Scheme (EDS). The Mizoram leg of the Startup India Yatra helped boost the nascent entrepreneurial ecosystem building initiative undertaken by the Department. Lastly, we highly appreciate the Department for Promotion of Industry & Internal Trade, Ministry of Commerce & Industry for their commendable show of Cooperative Federalism for bringing the torch of entrepreneurship to the remotest parts of the country.”

- Dr. Lalrinchhana Deputy Adviser, Government of Mizoram
The actions taken under Startup India initiative have resulted in nurturing a culture of innovation and entrepreneurship, that is taking root across the length and breadth of the country. The results are visible across all fields of human endeavour and all sectors of the economy. The ‘National Startup Awards 2020’ have been conceptualised to further strengthen the startup ecosystem in the country, by recognising and rewarding outstanding startups and ecosystem enablers, that are building innovative products or solutions, and scalable enterprises, with high potential of employment generation or wealth creation, demonstrating measurable social impact.

The National Startup Awards shall also reward exceptional ecosystem enablers – incubators and accelerators – as they are key building blocks of a robust startup ecosystem.

The recognised entities will benefit from this initiative, not only in terms of being able to attract more business, financing, partnerships and talent, but also their projection as role models for other entities and inspiring them to be purposeful and responsible about their socio-economic impact.

The awards aim to look beyond the traditional thought process of measuring the success of a startup, that is, funding, financial gains for investors etc. to parameters such as benefit for the society, solving a key problem with some innovative solution/product, developing some innovative solution/product which is a paradigm shift in the approach in the sector/sub-sector and creation of jobs (direct and indirect) in the country.

DETAILS OF APPLICATION AND PROCESS OF EVALUATION

The applications for the ‘National Startup Awards 2020’ were hosted on the Startup India portal – www.startupindia.gov.in – through which a total of 1,641 Startups and 41 ecosystem enablers (incubators and accelerators) participated in the first edition of the National Startup Awards.

A four-stage evaluation process is being followed for the applications received. The applications were pre-screened by the Startup India Team for DPIIT-recognition and other documents, to ensure that the information provided by the applicants fulfilled the criteria of application to the awards. The second and third round of evaluation and due diligence was done by a knowledge partner for the programme. The shortlisted startups will be given an opportunity to present their ideas to an expert jury panel over a video conference.

AWARDS

- A cash prize of Rs 5 Lac to be awarded to one winning startup in each of the 35 Sub-Sectors and 3 Special Categories
- The winner and 4 runners-up in each Sub-Sector and the winner in each Special Category are to be given opportunities to present their solutions to relevant public authorities and corporates for potential pilot projects and work orders
• The winners and runners-up are to be given priority for participation in various national and international startup events sponsored by DPIIT

**ECOSYSTEM ENABLERS**

• A cash prize of Rs 15 Lac is to awarded to one winning incubator
• A cash prize of Rs 15 Lac is to awarded to one winning accelerator

8. STAKEHOLDER OUTREACH AND MARQUEE EVENTS

8.1 STARTUP INDIA VENTURE CAPITAL SUMMITS

The Global Venture Capital Summit 2018 kicked off in Goa on December 7, 2018, an initiative of the DPIIT and the Government of Goa, in partnership with the International Finance Corporation (IFC) and Indian Private Equity & Venture Capital Association (IVCA), brought together international fund managers, startups, government officials and other key stakeholders from the startup ecosystem with the aim to mobilize global capital for innovation in India.

Present on the occasion were former Union Minister of Commerce and Industry, Shri. Suresh Prabhu, and former Minister of Revenue, IT, and Labour & Employment, Government of Goa, Shri. Rohan Khaunte. The Summit focused on the opportunities for investments in the Indian startup ecosystem, showcased the diverse market opportunities and technology innovations available in the country, with discussions held around the current and future regulatory changes. Other speakers included eminent names such as Priya Rajan (Silicon Valley Bank), Alok Goyal (Stellaris Venture Partners), Will Poole (Capria Investments), TCM Sundaram (IDG Ventures), Rahul Khanna (Trifecta Capital), Shweta Bhatia (Eight Roads Ventures India), Karthik Reddy (Blume Ventures), and Vikram Gupta (IvyCap Ventures), among many others.

Startup founders like Yashish Dhaniu (PolicyBazaar), Abhinav Jain (Shop 101), Mayank Kumar (UpGrad), Shradul Seth (Agrostar), and Venkatesh Bhat (Blackbuck), were also part of these panel discussions. The Startup India Global Venture Capital Summit also saw the release of a report on ‘Mobilizing Global Capital for Innovation’. The report had highlights of the Indian Venture Capital landscape, the startup ecosystem in India, and the regulatory framework in the country. Venture Capitalists at the Summit expressed their interest in investing in the AgriTech, EdTech, FinTech, and HealthTech sectors in India.

The first edition of the Summit brought together over 250 participants from over 9 countries, to showcase the investment opportunities in India and facilitated a rich exchange of ideas on various aspects of the investor world.

SESSION DETAILS

1. OPPORTUNITY TO BUILD INDIA AS A $10 TN ECONOMY BY 2030
   About the session:
   This panel focused on the role of technology disruption in driving growth in both the manufacturing and services sectors, by improving efficiencies, bringing new products and solutions to market, and expanding reach within India and abroad. Discussions were conducted on the impact of the VC ecosystem in creating and growing emerging sectors such as e-commerce, genomics, electric mobility, medical devices, and robotics, that will bring new revenue streams and new employment opportunities, supporting India’s unique growth story and delivering on the promise of building a large and globally competitive Indian economy.

2. MONETISING THE NEW INDIA OPPORTUNITY
   Diversity & Scale – India I, II & III
   About the session:
   The session covered success stories of Indian startups that have built scale and reach by building solutions that are relevant to the unique needs of the nation in developing unconventional distribution channels and payment modalities. Ideas were also shared on business model adaptations that have provided increased access at affordable pricing and supported livelihoods in Tier II and III towns.

3. DISRUPTING TRADITIONAL MODELS
   Logistics, Agriculture, Education
   About the session:
   The session discussed the impact of technology in transforming sectors like logistics, agriculture, education and healthcare in India and the importance of unlocking value by creating new business models. The discussion focussed on the opportunities and challenges of displacing conventional ways of doing business with technology-led solutions that transforms processes, build cost efficiencies and move businesses to new growth trajectories to deliver strong investor returns.

4. ENABLING REGULATIONS
   Ease of Starting up, ESOPs & Exits
   About the session:
   The session discussed the regulatory changes that have been made over the past few years with the goal of creating an enabling environment. The session also demonstrated impact of these changes for startups and investors by addressing upcoming challenges that would help build a globally unparalleled venture capital ecosystem in the country.

5. THE INDIA ADVANTAGE
   Limited Partners & Global Venture Funds
   About the session:
   The panel had institutional LPs and GPs presenting their views on India as an investment destination. It also focused on the LP-GP relationship, promoting best practices for improved governance and increased transparency to provide comfort to LPs and further continue to drive private capital into the country’s vibrant startup ecosystem.

6. INNOVATION IN INDIA
   About the session:
   Expert talks on India as an emerging leader in the high technology & innovation sphere
   - Transforming traditional packaging industry
   - Data Science for Logistics
     - Artificial Intelligence for Healthcare
     - Improving efficiency in last mile logistics

During the Summit, a report on “MOBILIZING GLOBAL CAPITAL FOR INNOVATION IN INDIA” was also released.
The second edition of the Startup India Global Venture Capital Summit, a two-day event conducted in Goa from 6th to 8th December 2019, displayed the diversity of the Indian startup ecosystem at the global stage. With participation of various stakeholder groups vital to the development of entrepreneurship in the country, the 2019 edition event showcased the potential opportunities in the Indian market with main focus on sectors such as MedTech, Healthcare, EdTech & Fintech. The event was home to numerous cutting-edge innovations and path-breaking technologies that are being used on a large scale.

Department for Promotion of Industry & Internal Trade (DPIIT), Ministry of Commerce and Industry along with Government of Goa organised this event that set new benchmarks by bringing over 350 global and domestic investors and Indian policy makers under one roof.

Investors, hailing from over ten countries explored and analysed various innovations taking place in the Indian startup ecosystem through one-on-one meetings, panel discussions and regulatory roundtables. The summit acted as a platform for the investor community to identify and resolve the issues faced by them through detailed discussions with Indian policymakers. The event was covered by more than 30 media houses, giving it a wider reach within the entrepreneurial community.

**HIGHLIGHTS**

- **350+ delegates from over 10 countries**
- **50+ speakers across 9 panel sessions**
- **30+ national and international media houses**
- **45+ startups participation through innovation showcase and investor interaction**
- **91 unique investors**
STARTUP-INVESTOR MEETINGS

Startup Investor Meetings were curated for 32 investment ready startups selected via open call for application done on the Startup India portal. The selection was an outcome of combined evaluations from the three partners including TiE Delhi, Indian Private Equity & Venture Capital Association (IVCA) and International Finance Corporation (IFC).

The objective of the curated meetings was to provide a platform to startups and investors to help them get closer to funding opportunities and thus, create a more favourable environment for both the parties. Interest was sought from investors and meetings were set up basis the interest received. Each entrepreneur got at least half an hour meeting with top investors in the respective sectors.

8.2 REGULATORY ROUNDTABLE AT GOA VENTURE CAPITAL SUMMIT

A roundtable discussion was held during the Startup India Global Venture Capital Summit on 7 December 2019, under the chairmanship of Shri Piyush Goyal, Minister of Commerce and Industry, and the representatives from the regulatory authorities and Venture Capital Funds investing in Indian startups over video conference.

Agenda of the roundtable centred on discussions with regulators and policy makers to explore options that would ease alternative investments for startups.

The roundtable concluded with a decision to formulate a special advisory committee under the chairmanship of Secretary, DPIIT, and concerned officers from various departments. The committee would examine regulatory concerns related to startup ecosystem. The roundtable also noted suggestions by investors on policy issues to be taken up with different regulators.

A Startup Advisory Council under the chairmanship of Minister of Commerce and Industry to be constituted to advise the Government of India on proactive steps that may be taken for strengthening the startup ecosystem in the country.

Furthermore, a number of measures were suggested relating to procedural changes in the Income Tax Act, AIF Regulations, Companies Act etc. and mobilisation of surplus funds available with EPFO and PSU into startups.
8.3 ROUNDTABLE WITH CENTRAL GOVERNMENT DEPARTMENTS

A roundtable was organised in May 2019 with the central government departments and was attended by representatives from over 33 ministries and departments out of which 11 presented and shared some of the best practices of engaging with the startup ecosystem. Some of the engagement models discussed were:

- Procurement
- Policy Formulation
- Grand Challenge/Hackathon
- Schemes for Startups
- Fund
- Infrastructure Support
- State Government Support

THE PRESENTATIONS FOR THE DAY WERE BASED ON FOLLOWING 3 THEMES

- CREATING A VIBRANT ECOSYSTEM
- PROCURING FOR INNOVATION
- PROVIDING INFRASTRUCTURE SUPPORT

DR MANISH DIWAN, Head- Strategic Partnership & Entrepreneurship Development at BIRAC, DBT, explained the incentives available under the Department of Biotechnology. He spoke about the “BIG Scheme” and the AcE fund which can provide upto Rs 7 crore worth of funding support to entrepreneurs.

DR HK MITTAL, Advisor, Ministry of Science and Technology, emphasized upon the importance of private partnerships for ensuring the flow of commercial knowledge. He explained that the limitation of restricting information to the technical knowledge posed as a barrier to growth.

DR CHHAVI JHA, Joint Secretary (RKVY, PC & GC), Department of Agriculture, Cooperation & Farmers Welfare, Ministry of Agriculture & Farmers Welfare explained the vision of the Ministry along with the support available including grants of upto Rs 25 lac and seed support grant.

Startup India Team briefed about the Agriculture Grand Challenge and how it helped the Ministry of Agriculture scout for applications for their 10 problem statements. The grand challenge invited over 1,000 applications through the Startup India portal.

DR. SANJEEV SAXENA, from the Indian Council of Agricultural Research (ICAR), discussed how they are supporting startups with initiatives like National Agriculture Innovation Fund and Agri-business Incubation Centres.

DR. GURU PRASAD MOHAPATRA, the then Chairman of Airport Authority of India, shared how they are supporting innovation in the country with initiatives like the AAI Startup Policy and ‘Innovate for Airports’ Challenge. An Rs 2 crore POC grant is to be provided to the winners. He also mentioned about the R&D centers that were launched in Hyderabad and the updating of the procurement manual.

MR. ROHIT MATHUR, from the Ministry of Petroleum, highlighted how PSUs in the Oil & Gas sector have 132 startups under incubation with a committed fund of Rs 155 crore, and a fund of Rs 320 crore earmarked for 3 years.
INDIAOIL’S BENEFICIARY STARTUP, SUKRITI, mentioned the equity free prototype grants, mentoring and pilot opportunities provided by Indian Oil to them.

Representative from the Invest India team shared how AGNi (Accelerating Growth of New India’s Innovations), an innovation facilitation programme spearheaded by Prof. Vijay Raghavan, Principal Scientific Advisor to the Government of India, is bridging the gap between idea generation, startup facilitation and product commercialisation.

MR. RAMANAN RAMANATHAN, Mission Director, Atal Innovation Mission (AIM), explained the lifecycle approach that AIM has adopted to develop innovation & entrepreneurial mind set, with Atal Innovation Incubators, Atal New India Challenges, and an upcoming Women Entrepreneurship Platform.

SHRI RASHMI SINGH, Secretary New Delhi Municipal Council (NDMC) spoke about the newly launched Tyro Open Innovation Zone, a collaborative Startup community based on the model of open incubation.

MR. MUDIT NARAIN spoke on iDEX (Innovation for Defence Excellence) framework under the Ministry of Defence, for setting up of independent Defence Innovation Hubs (DIHs) where innovators can get information about the defence requirements directly & create solutions.

DR. RAJEEV KANDPAL, Additional CEO, Government-E-Marketplace (GeM), shared that the GeM portal had 1800+ startups registered at that time, which had received 7,697 orders worth Rs 275 crore. The ‘GeM Startup Runway’ had also about 50 Startups registered at that time. He explained how procuring from Startups in the government can give a massive boost to the ecosystem. Mr. BS Tomar (retd. DIG, Fire and Safety) who sells motorcycle fire engines to Gram Panchayats and Nagar Panchayats, spoke about how the Government-E-Marketplace enabled him to sell to Kumbh and other govt. agencies.
India’s thriving ecosystem can be best understood by understanding our high value startups which have managed to create wealth and jobs for the country. With this in mind, to gain insight into the challenges faced by startups and evolve the policy measures to be more supportive in creation of more such companies, a roundtable meeting was conducted in November 2019.

The meeting was chaired by Dr. Guruprasad Mohapatra, Secretary, DPIIT, who highlighted the importance of startups in economic development and how states have also realised the importance of promoting this sector. The meeting also discussed the journey and hurdles faced by the startups under the current market scenarios.

The event noticed participation of over 10 startups with a total valuation of more than Rs. 72,000 crore and having a total revenue of Rs 5800 Crore.

Some of the key participating Startup included:

| Info Edge | Urban Clap | Sheroes |
| Zomato    | 1 MG       | Sagar Defence |
| Delhivery | Limeroad   |            |
| Policy Bazaar | Jet Set go |            |
The India International Trade Fair (IITF) was hosted from 14 – 27 November 2017 at Pragati Maidan, New Delhi. IITF with B2B and B2C components was one of the largest integrated trade fairs spanning across business, social, cultural, and educational dimensions weaved together. The event also provided a platform for visitors and exhibitors, media persons, marketing professionals, social activists, and NGOs to come together and explore synergies.

The theme for the 2017 trade fair was Startup India and Stand Up India. The event witnessed 40,000 business visitors during the first five B2B days, and the total viewership for the fair over the 14 days was 1.4 million. The per day footfall was capped to 60,000 on an average. Startup India was provided with a dedicated prime space. Startups from various States and sectors were given an opportunity to showcase their products and innovations either digitally (through videos) or physically (through live product exhibitions). The Startup India pavilion also digitally showcased information on the Startup India Action Plan, the benefits available under the initiative, and the achievements made under the Action Plan. Registration kiosks and engagement activities like Twitter café and ‘sling shot’ were also organised to engage with the visitors.

Photos: Key highlights of Startup India kiosks at IITF, 2017.

8.5 STARTUP INDIA PAVILION AT THE INDIA INTERNATIONAL TRADE FAIR 2017

Startup India bagged the Gold Award under “BEST THEME PAVILION” during the concluding ceremony in the presence of Hon’ble Minister of State for Commerce and Industry, Shri C.R. Chaudhary.

KEY HIGHLIGHTS OF THE EVENT:

- **Innovation Showcase**: Products/concepts of 271 innovative startups from varied locations and sectors were showcased free of cost, physically and digitally.

- **Startup India Pavilion**: The central pavilion was taken up by Startup India, DPIIT to digitally showcase the achievements made under the Action Plan, show the Startup India benefits audio-visualy, and have live registrations via two LED screens/ kiosks on the Startup India Hub.

- **Unicorn Spotlights**: Stories of unicorns like Flipkart, Zomato, ImMobi, Ola, etc. were showcased digitally through touch screen at the Startup India pavilion.

- **Startup India Hub**: Through interactive digital kiosks, usability and features of the Startup India Hub were displayed and showcased. The kiosk also enabled on the spot registration for users to register themselves on the Startup India Hub.

- **Startup India Cafe**: Startup India Café was made available on sharing basis for the representatives of startups and other startup stakeholders to conduct meetings.

- **Geographic and Sectoral Diversity**: Startups were chosen from varied locations and sectors to show diversity.
“It was really a fantastic podium and we got tremendous response and people loved our idea and appreciated us. We have received more than 500 queries and some projects are in pipeline amongst those queries. We learned a lot from the audience feedback and public who suggested us some improvements concept.” — EASY NIRMAN

“An amazing platform for us. Our innovative toys, concepts and ideas were highly appreciated & received media attention. With thousands of visitors from around the world, we still can’t measure the scope of opportunities that lie ahead of us. Thank you, Startup.” — BE CRE8V

“It was a great experience where we got in touch with big media houses, which helped us in gaining traction. We are thankful to Startup India for providing us with such a great platform.” — CLENSTA

“The response was overwhelming. Not only was the audience genuinely interested in understanding new products in the market, they were also willing to try it out themselves and become paying customers. We generated more than 300 leads from the event alone. Many of these leads were from corporate stakeholders who connected with us to use our solution for betterment of their fleet management requirements. Apart from this, the media coverage of the event was also unanticipated. Reporters from all over the country poured in to interview us about the products and this kind of organic PR is genuinely something that is hard to get. We thank #Startupindia team to give us this incredible opportunity to reach out to the masses.” — ZYME TECHNOLOGIES PVT. LTD.

“We highly benefited in creating visibility among the audience about our product. We received Pre-Booking interest of about Rs 30,00,000.” — CEREBROZ EDUTREE

“Startup India Pavilion is one of the best platforms that a startup can get to showcase themselves. The kind of exposure any startup could get here is phenomenal. We got an inquiry for close to Rs 25 lac, potential tie up with Government of Afghanistan for one their projects, and corporate tie ups. Government of India has appreciated our vision which has converted into a tie up with them for promoting the Geographical Indication. The event has benefited us in the best possible ways. We look forward to more such events.” — IMITHILA HANDICRAFTS & HANDLOOM PVT. LTD.
Startup India got the opportunity to showcase itself at the Republic Day Parade 2020. Startup India’s tableau was one of the six tableaus from the Departments of Government of India, selected to be showcased at the 71st Republic Day celebrations.

The tableau of Startup India was built on the theme ‘Startups: Reach for the Sky’. It showcased various stages of the lifecycle of a startup and the all-round support provided by the Government in this journey. The tableau depicted how ideas come to life and how the innovations that emerge positively affect lives of the citizens of India. The objective was to inspire and motivate the creative youth of India to follow their dreams, to generate wealth, and become job creators, instead of job seekers.

The front portion of the tableau depicted a creative mind, full of ideas to solve real world problems. The leaves of the ‘Startup India Tree’ in the middle represented various kinds of support provided to startups. The staircase denoted the stages of growth of a startup – proving a concept, creating a prototype, preparing a business plan, building a team, launching into markets, and eventually scaling up. The wheel at the rear depicted varied sectors of economy where Indian startup entities have driven economic growth and created employment opportunities at large scale. The map of India represented the spread of the startup movement, steadily reaching the semi-urban and rural areas. The wheel and the map together depicted the width and depth of the Startup India movement in the country.
The first wave of Startup revolution saw an unprecedented growth in the number of startups. When the Startup India Action Plan was launched by the Hon’ble Prime Minister in January 2016, there were a handful of startups that were working out of their garages and college e-cells. There were only four States that had a dedicated policy for startups.

**WE HAVE OVER 21 UNICORN STARTUPS TODAY THAT HAVE CREATED A VALUATION OF OVER $ 73 BILLION.**

**FOUR YEARS THE LINE, THERE ARE OVER 28,000 STARTUPS FROM 566 DISTRICTS.**

**30 STATES AND UNION TERRITORIES TODAY HAVE A DEDICATED POLICY FOR STARTUPS.**

**THE COUNTRY HAS OVER 450 INCUBATORS AND ACCELERATORS THAT ARE PROVIDING SUPPORT TO THE ENTREPRENEURS WITH MENTORSHIP, LAB TESTING, PROTOTYPING AND SEED FUNDING.**

This is the first wave of revolution, categorised by creation of a nation of job creators over job seekers, surge of a new class of assets that are not just agile but are also disrupting the technological landscape at an unmatched pace.

To accelerate the growth of startup movement and create a culture of innovation, coordinated efforts are required by all stakeholders to holistically support this ecosystem. Enabling ease of doing business for startups remains a core focus for Startup India and will continue to remain so. It is necessary to work towards reducing regulatory burden for startups, thereby reducing compliance costs. Emphasis will be placed on making it easier for startups to start, operate, grow, and exit. Regulatory amendments aim to promote access to capital, ease of compliances and lower barriers.

Today, new technologies and social innovations are pushing our societies to continuously adapt. For a lot of such social innovations, Government is the major buyer and thus it is necessary to create a culture of innovation in all Ministries with a view to improve public service delivery. We will work with Ministries to enable procurement of products or processes based on innovative ideas in their respective domains.
Technology-based new enterprises are high risk and high growth ventures and require an enabling environment to enhance the prospects of their success, which is provided by incubators. In addition to encouraging all Departments, States and private companies to establish and support new incubators, focus will also be on enhancing and upskilling the existing incubators by training incubator managers. Easy availability of capital is essential for entrepreneurs at the early stages of growth of an enterprise. We will aim to reduce the risk of market failure that may impede the success of the startup, by inflow of required seed money into the upcoming innovations in India. Innovative startups will be promoted in the seed stage with focused support to relatively underfunded sectors. Not just equity but debt funding will also be enabled for startups through a credit guarantee scheme.

May the startup ecosystem of the nation continue to be driven by the energy, enterprise and innovation of our youth. India is aspiring to become a $5 TRILLION ECONOMY and as the Hon’ble Prime Minister envisions it for startups “Your innovation, aspiration and application of technology will fuel this dream”
