

National Startup Awards 2020

The results of the first edition of the National Startup Awards were declared by Hon'ble Minister of Railways and Commerce & Industry **Shri Piyush Goyal**, in the august presence of Hon'ble Minister of State for Commerce & Industry **Shri Som Parkash**. Shri Piyush Goyal congratulated the participants for building innovative products and scalable enterprises, emphasizing the key role that startups are playing and will continue to play in steering the nation towards greater heights. He also congratulated DPIIT for conceptualizing and executing the awards, recognizing and rewarding the startup talent in the country. **Shri Som Parkash** talked about the success of the Startup India initiative in building a strong ecosystem for nurturing innovation and entrepreneurship across the length and breadth of the country. He emphasized how **586** out of **739** districts have at least one startup. He commended the role of DPIIT in conducting the awards, which will inspire the younger generation to become job creators than job seekers.

Shri Guruprasad Mohapatra, Secretary, DPIIT, Government of India highlighted how each of the **28** states and **8** Union Territories have at least one startup, with large amounts of global capital being invested in these companies and generating handsome returns. He congratulated the winners and finalists, announcing that opportunities would be extended to all the winners and finalists for further growth.

Shri Anil Agrawal, Joint Secretary, DPIIT remarked how the execution of National Startup Awards has been a journey to explore

the spread and depth of entrepreneurship based on innovation in India.

He further acknowledged the role that Government of India and States officers have played in supporting startups at different levels. He appreciated Startup India Division, PwC and Startup India team for carrying out the exercise diligently and meticulously.

The felicitation ceremony was accompanied by the release of an e-Report on National Startup Awards 2020 highlighting the journey of First National Startup Awards including details of winners. The report can be accessed here with further details available on our website [here](#). You can watch the full award ceremony [here](#).

Applications Received and Trends

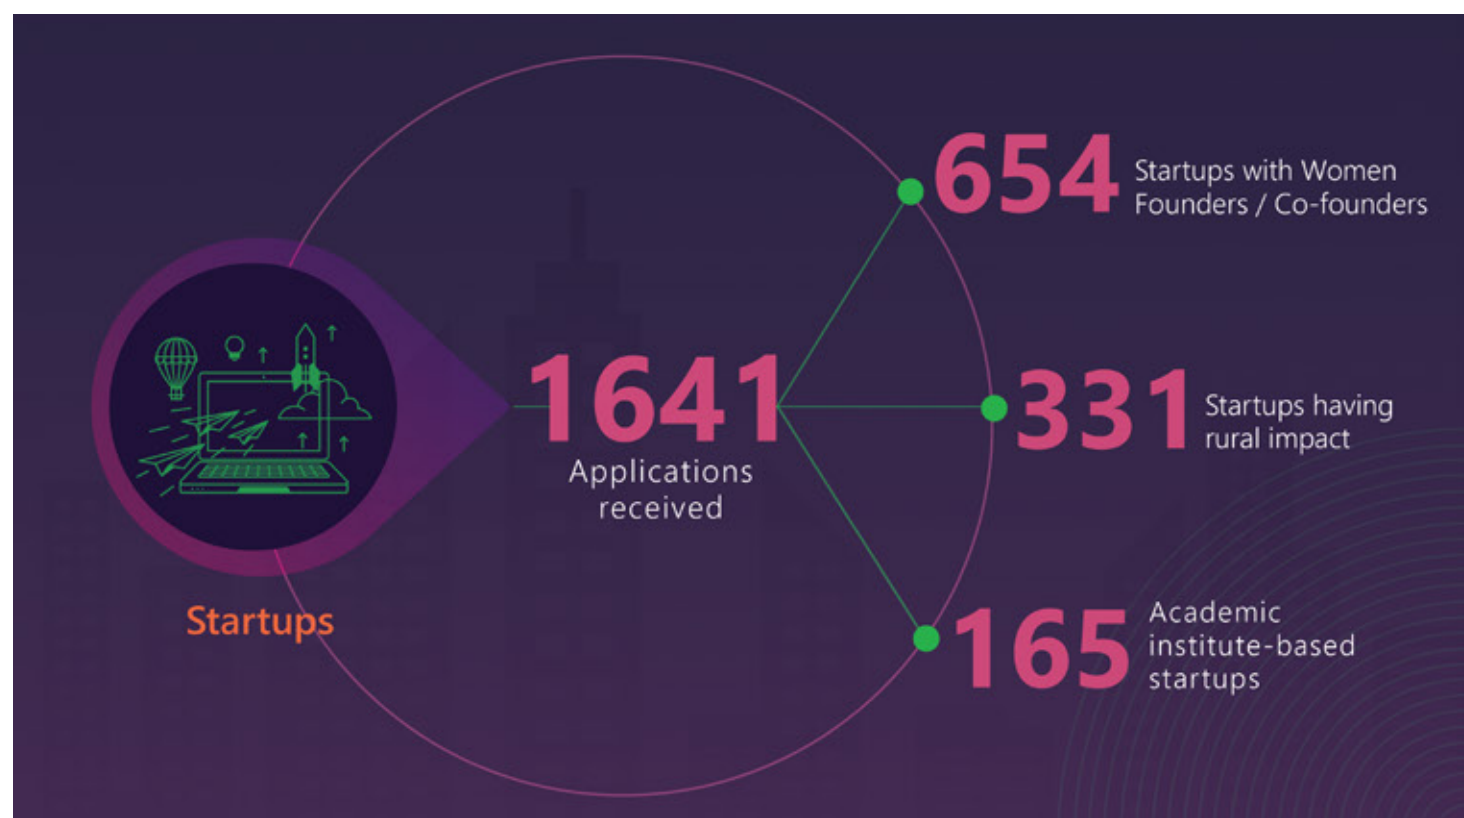

The first edition of the Awards invited applications across **12** sectors, which were further sub-classified into a total of **35** categories. These **12** sectors are Agriculture, Education, Enterprise Technology, Energy, Finance, Food, Health, Industry 4.0, Space, Security, Tourism and Urban Services. Apart from these, startups are to be selected from those which create impact in rural areas, are women-led and founded in academic campuses.

A total of **1641** applications were received from startups spread across **23** States and **4** Union Territories. **38%** of these applicants (**620**) were from Tier II/Tier III cities. The applicants included **654** Women-led, **165** academic institution based and **331** startups working in rural areas. The maximum applications were received from Enterprise Technology sector, followed by Health and Industry 4.0. Karnataka, Maharashtra and

Delhi had the highest number of applicants at **336**, **215** and **136** each. The finalists represented 20 states and Union Territories with the winners coming from **9** states and **1** Union Territory. At the city level, **12** winners are from Bengaluru, **7** from Delhi, **3** from Hyderabad and **2** each from Chennai, Mumbai and Mysuru. The fact that we have a national winner each from Bhopal, Ernakulam, Gurugram, Kochi, Lucknow, Margao, Sonipat and Thiruvananthapuram - is evidence that exceptional innovation is thriving much beyond the metros.

Also, **31** applications were received from Incubators and **10** applications were received from Accelerators. The fact that they came from government as well as private sectors, demonstrates the depth of innovation ecosystem in the country.

Applications Received

Evaluation Process and Methodology

A robust four stage evaluation methodology was evolved to assess these entities on parameters namely Innovation, Scalability, Economic Impact, Social Impact, Environmental Impact, and Inclusiveness and Diversity. After three rounds of detailed evaluation, **199** startups were selected for presentation before the jury. **192** out of these made presentations before the **15** specialist jury panels. The jury comprised of distinguished individuals from industry, investment specialists, academia, startup ecosystem and government. And, they have all worked overtime during Covid19 situation to identify the best of entities that are innovative and are delivering measurable development goals.

9 incubators and **5** Accelerators were selected after three rounds of evaluation for presentation before Jury Panel. All of them gave presentations before the Jury.

36 Startups, including that of **3** special categories, across **12** sectors and **35** categories were declared winners. One incubator and one accelerator were declared winners.

Right from Agriculture to Space, these awards reflect the innovation that is thriving at the grass-root in all areas of human endeavour. Many of these entities are working on truly world class, game changing solutions. Many them are providing out of the box solutions for solving real life problems of rural India. They are creating products and services which are accessible to all, irrespective of geographical locations or social strata. They have created viable business models out of frugal innovation and are fulfilling critical needs of our society.

Evaluation Methodology

NSA through Social Media

The event and its participants were congratulated and encouraged by our jury Debjani Ghosh, President, ASSOCHAM and Ritesh Agarwal, Founder and CEO, Oyo Rooms among

others on their social media posts. This support was extended by ministers of the central and state governments, with the event and its winners being widely shared and congratulated.

The event saw heavy engagement across social media platforms. On twitter, **#NationalStartupAwards2020** was the **#2** trending topic with over **5,000** tweets and 1.1 million impressions on the website. The awards

and subsequent posts also saw commendable traction on other social media platforms like Facebook and LinkedIn. The awards were also widely covered in news media.

National Startup Awards 2020

The startup cells of various state governments along with ministers of states like Karnataka, Maharashtra, Kerala, Telangana and Goa shared

extensively about the winning startups from their state and congratulated DPIIT for hosting such an impactful event.

We also saw the winning and finalist startups thanking DPIIT for this recognition and sharing it widely among their social media handles. Various incubators like T-Hub, IITM Incubation Cell, TiE,

Bharat Petroleum among others also shared extensively about the startups from their respective cohorts.

Meet The Winners Of National Startup Awards 2020

A dozen startups from 12 different sectors received the national award from commerce minister Piyush Goyal.

@inc42.com

IITM Incubation Cell @IITMIC · Oct 6

Two #IITMIC (IIT Madras) incubated startups @planystech & @fabheads wins #NationalStartupAwards2020 for 'Industry 4.0', constituted by @startupindia, @DIPPGoI in '#Robotics' & '3D printing' categories, respectively. Inspiring accomplishment & Congrats to the two teams!

INDUSTRY 4.0

3D PRINTING

FABHEADS AUTOMATION PRIVATE LIMITED
(DIPP344 (CHENNAI, TAMIL NADU))

- Designed and manufactured a new series of 3D printers - Fibrebots - which uses carbon fibre as a printing material instead of plastic or metal
- Asia's first and only company with this capability

TECHNOLOGIES

PLANYST

Water inspection solutions
Mapping, ultrasonic thickness
meters
Completed over 70 projects over

IIT Madras Foundation and 4 others

Indian Angel Network @ianetwork · Oct 8

@startupindia, DPIIT acknowledges #IANPortfolio @minionlabs as the winner of Industry 4.0 in the category 'Internet of Things'. They use ML and AI to derive actionable insights, bringing savings to electricity bills, helping with savings up to 30%.

#NationalStartupAwards2020

INDUSTRY 4.0

INTERNET OF THINGS

MINIONLABS INDIA PRIVATE LIMITED
(DIPP11922, BENGALURU, KARNATAKA)

- Using Machine Learning and AI to derive actionable insights, they bring about massive savings on electricity bills
- Currently monitors over 1 lakh assets in real-time
- Enable energy transparency and energy savings up to 30%

You and 2 others

Bharat Petroleum @BPCLimited · Oct 7

Four Startups, funded by #BPCL's initiative "Project Ankur", which started in 2016 to encourage & incubate the promising startups, won First #NationalStartupAwards2020 organised by Startup India today. Out of total 16 categories, these startups won in four categories.

CAMPUS-INITIATED STARTUPS

GENROBOTIC INNOVATIONS PRIVATE LIMITED
(DIPP11922, BENGALURU, KARNATAKA)

- Water inspection solutions as an alternative to manual monitoring
- Automated to replace the heavy water meters used in various sectors
- The robot has been deployed in 10 states in India

TOURISM

PIRAM PEOPLE INFOTECH SOLUTIONS PRIVATE LIMITED
(DIPP11922, BENGALURU, KARNATAKA)

- Empowers online to a digital ecosystem through very rich content database, enabling tourists to plan their trip better
- Current users: More than 100,000 of high-end users
- Current users: More than 100,000 of high-end users

INDUSTRY 4.0

PLANYST

Specialized in smart underwater inspection solutions
Water inspection solutions, ultrasonic thickness meters, and acoustic sensors
New specialized products and completed over 70 projects over 70 states in India

AGRICULTURE

HAVA DESIGN & INNOVATION PRIVATE LIMITED
(DIPP11922, BENGALURU, KARNATAKA)

- They have created a new type of device - HAVA - to monitor the health of crops
- Reduces the number of harmful pesticides from 100 to 10 in the field
- The device and process has been patented in 10 countries, making them more than 100% of national growing area in the world

Mumbai Angels @MumbaiAngels · Oct 6

Mumbai Angels Network portfolio company Dhruva Space gets recognized by Startup India, DPIIT for 'Space' in the category Satellite Technology.

#NationalStartupAward2020 #portfolio #startup #space #funding #investment #entrepreneur

Startup India @startupindia · Oct 6

Startup India, DPIIT recognizes Dhruva Space as the Co-Winner for 'Space' in the category 'Satellite Technology'. They build small satellite constellations for Earth observation and scientific application, helping countries to have satellites in orbit.

MyGov Corona Hub

The Startup India Showcase

The 'Startup India Showcase', a part of the Startup India portal, is intended to be an online discovery platform for the most promising startups of the country. The startups showcased here shall be handpicked by experts and will span across different sectors like FinTech, EdTech, Social Impact among others. The showcase will

help industry, investors and public authorities find and connect with startups for potential partnerships, investments and public procurement respectively. This showcase will help the ecosystem connect with them better while also serving as an inspiration.

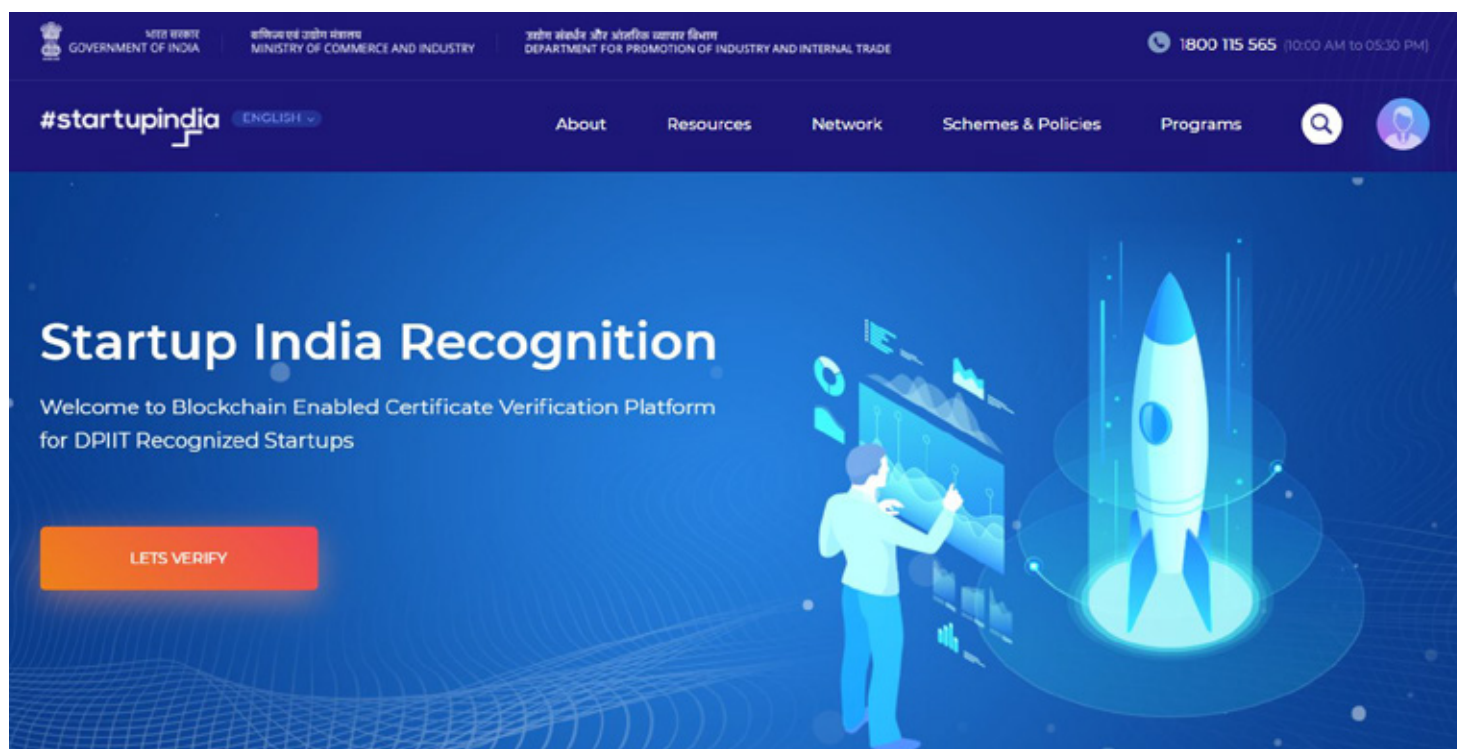

Blockchain-based Certificate Verification System

The 'Blockchain-based Certificate Verification System' will enable instant verification and access to certificates of recognitions issued by DPIIT. This feature introduces an added layer of security to the startup certificates. It can be accessed by Government Departments,

procurement entities, investors, and other third parties to verify status of recognized startups for accessing different opportunities.

More information on both these projects may be viewed [here](#).

The Next Stage of the Startup Growth Story

A cash prize of **Rs 5 Lakh** each is being awarded to each winner startup and a cash prize of **Rs 15 lakh** each is being awarded to winner incubator and accelerator. Along with this, all finalists will be given opportunities to help their startup grow and scale by DPIIT. The department will be handholding the startups in their growth journey through:

1) **Mentorship Program:** Specific mentorship programs that are being ideated with partners like NASSCOM, ASSOCHAM, CII, FICCI, Indian Angel Network, and TiE among others.

2) **Investor Connect:** DPIIT shall organize specific pitching sessions for potential investments. These will be done in coordination with partner organizations like SIDBI, IVCA, Indian Angel Network, Mumbai Angels, and other angel networks.

3) **Corporate Connect:** The department shall be formulating a corporate connect program in association with CII, FICCI, NASSCOM,

ASSOCHAM, PHDCCI, and other relevant organizations.

4) **Government Connect:** Government Connect Programs shall be organized to connect all of you with relevant departments of Government of India and State Governments to explore pilot projects.

5) **International Market Access:** For startups interested in exploring markets abroad, discussions are being held with Indian Missions and High Commissions abroad to develop market access programs for NSA finalists.

6) **Regulatory Reforms:** Support on any regulatory reforms if needed, or any assistance in getting authorizations, licences etc.

7) **Startup India Showcase:** All finalists will be onboarded to the 'Startup India Showcase' - a virtual online discovery platform for the most promising startups of the country.

WINNERS NSA 2020

SN	Sector	Subsector	Company Name	Product Description
1.	Agriculture	Farmer Engagement and Education	Mandya Organic Foods Private Limited	They have enabled farmers to develop high yield organic products leading to increased self-reliance, economic independence, and growth of farmers.
2.	Agriculture	Allied Areas (Fisheries, Poultry, etc.)	Cornext Agri Products Private Limited	Their innovation enhances availability of high-quality green fodder, in the form of Silage, for cattle herders. This ensuring availability of quality food for better cattle health and increase in milk yield.
3.	Agriculture	Post Harvest	Intello Labs Private Limited	They have digitized food quality assessment across the supply chain from farm to table enhancing value addition for farmers and food processing industry.
4.	Agriculture	Productivity	Nava Design & Innovation Private Limited	They have developed a solar powered robotic device for coconut sap tapping. The product provides an environmentally friendly tool to increase productivity and safety.
5.	Education	Access to Open Education	Kickhead Softwares Private Limited	This open education platform enables students from the remotest areas of the country to prepare for competitive exams by providing access to high quality content at nominal costs.
6.	Education	Access to Institutional Education	Robotguru Education Technologies Private Limited	The VR RobotGuru solution allows students to understand topics better by enabling them to explore, experience and perform activities and experiments.
7.	Energy	Clean Energy	Aloe Ecell Private Limited	They have developed the world's first 100% eco-friendly and non-hazardous 1.5V AA size batteries from Aloe Vera.
8.	Energy	Energy Efficiency	Esyasoft Technologies Private Limited	By introducing AI, machine learning and deep learning analytics into a smart grid platform, this product supports enhancing energy efficiency of the transmission and distribution system till the end consumer level.

SN	Sector	Subsector	Company Name	Product Description
9.	Enterprise Technology	Enterprise Solutions	Unnati Online Private Limited	Unnati Online is an automated platform for recruitment of skilled and semi-skilled workers in formal and informal sectors.
10.	Finance	Fintech	Resilient Innovations Private Limited	BharatPe is a platform enabling UPI payments and lending along with other financial services to merchants belonging to the SME sector.
11.	Food	Access to Food	Food Cloud Private Limited	This platform empowers homemakers to become entrepreneurs from within their homes, while giving customers the chance to enjoy delicious and healthy homemade meals without cooking.
12.	Food	Food Processing	God's Own Food Solutions Private Limited (OPC)	By development of jackfruit flour, the firm is creating an organized market for jackfruits from India, augmenting farmers' income in the lean months of summer.
13.	Health	Access to Healthcare	Wellthy Therapeutics Private Limited	They have created a condition management solution that can be remotely monitored and managed by physicians and healthcare workers, reducing the need for physical interventions. This can be a game changer for ensuring quality chronic condition management for all.
14.	Health	Diagnostics	Niramai Health Analytix Private Limited	By offering a solution for early detection of breast cancer, this product is a game changer for reducing health complications and fatalities.
15.	Health	Life Sciences	Bonayu Lifesciences Private Limited	They have developed a patented manufacturing platform for topical thin films for higher drug loading, fast dissolution, excellent muco-adhesion, taste, masking and delayed release.
16.	Health	Medical Devices	Innaumation Medical Devices Private Limited	They have developed a cost-effective device to enable persons who have lost their voice due to throat cancer to speak through this product.

SN	Sector	Subsector	Company Name	Product Description
17.	Industry 4.0	3D Printing	Fabheads Automation Private Limited	This company has developed a 3D printer with capabilities to use carbon fibre as the raw material. The firm is one of the few companies in the world to have this technology.
18.	Industry 4.0	Augmented Reality Products or Wearables	Scapic Innovations Private Limited	Their product enables brands to create 3D and AR experiences without the need of writing any code while distributing it through cloud and web with no app installations required.
19.	Industry 4.0	Big Data	UptimeAI Tech Private Limited	UptimeAI operationalizes artificial intelligence to the needs of plant engineers enabling them to predict equipment and performance issues in advance before they become significant failures.
20.	Industry 4.0	Computer Vision	Gingermind Technologies Private Limited	They have developed Wearable Products to support the visually impaired for living independently. This has the potential to change the existing paradigm in the abilities of the visually impaired.
21.	Industry 4.0	Internet of Things	Minionlabs India Private Limited	This is an IoT based platform for increasing energy efficiency levels using Machine Learning and AI to derive actionable insights for various real estate establishments.
22.	Industry 4.0	Robotics	Planys Technologies Private Limited	They have developed an 'Underwater Remote Operated Vehicle' for underwater inspections and surveys.
23.	Security	Citizen Security Solutions	Staqu Technologies Private Limited	Using AI and other intelligent tools, the firm has developed solutions to identify repeat offenders.
24.	Security	Cyber Security	Lucideus Tech Private Limited	Their product SAFE is a unique product in the cybersecurity market that covers 100% of the technology stack of an organization for evaluating enterprise level Cyber Risk Quantification (CRQ).
25.	Space	Launch Vehicles	Skyroot Aerospace Private Limited	With the commissioning of 'Vikram Launch Vehicle' the firm is on way to develop one of the most cost-effective small satellite launch vehicles in the world.

SN	Sector	Subsector	Company Name	Product Description
26.	Space	Satellite Technologies	Dhruva Space Private Limited	Their capabilities in development of small satellite constellations for Earth Observation and other scientific applications on account of modular designs will reduce the development time and manufacturing costs.
27.	Space	Satellite Technologies	Bellatrix Aerospace Private Limited	Their electric propulsion systems offering effective alternative technology to chemical propulsion that offers 10 times more specific impulse (fuel efficiency), 3 times more payload carrying capacity, and reduces the mission cost by half.
28.	Tourism	Hospitality	Feeinsta Consulting & Services Private Limited	This firm has developed products such as smart e-toilets, smart nap zones and other public convenience services that can be retrofitted at any transit location and availed through the mobile app.
29.	Tourism	Travel Planning and Discovery	Param People Infotech Solutions Private Limited	Their product enables travellers to ideally plan their trip by discovering facilities and transact with verified highway services and amenities.
30.	Urban Services	Construction/ Development Monitoring Solutions	SNPC Machines Private Limited	They have developed an automated brick manufacturing and laying machine, with a potential to greatly increase efficiency in construction.
31.	Urban Services	Traffic Management	Wickedride Adventure Services Private Limited	This bike sharing service will be extremely beneficial not just in tier-I cities, but also tier-II and III cities. The impact of this service would be profound in the context of urban mobility.
32.	Urban Services	Waste Management	Sukriti Social Foundation	They have developed smart toilets with hygiene maintenance, black water treatment, and centralized health monitoring systems. This is a complete sanitation solution which enables effective waste management and treatment.
33.	Urban Services	Water and Water Networks	Taraltec Solutions Private Limited	The clean water innovation is a solution that can be retrofitted to the borewell hand pumps to provide safe water for those who continue to use this due to lack of other options.

Special Category Winners

Startups	Sector	Subsector	Company Name	Brief
Campus-Initiated	Industry 4.0	Robotics	Genrobotic Innovations Private Limited	The one of its kind human-controlled robot, Bandicoot is a complete solution to end manual scavenging. This startup was founded in 2015 in MES Engineering College, Kuttippuram, Kerala.
Rural Impact	Education	Access to Open Education	Bodhami Private Limited	Driven by Artificial intelligence, the product offers personalized online learning platform that caters to students, job seekers, and employees.
Women-Led	Healthcare	Life Sciences	Azooka Labs Private Limited	They have created a unique class of safe nucleic acid stains and fluorescent stains for genomics research and molecular diagnostics.
